Acknowledgment

Praise be to Allah, the Cherisher and Sustainer of the Worlds, Who grants me with guidance and support all the time.

It is my honor to acknowledge and thank ***Prof. Dr./ Salah A. Abo-El-Enein (D.SC.),*** Professor of physical Chemistry and building materials, Ain-Shams University, for his supervision, assistance, support and guidance during the course of this study.

I wish to express my sincere gratitude to ***Prof. Dr./ Abd- Allah A. Helal,*** Professor of Radioenvironmental Chemistry, Atomic Energy Authority, for suggesting the problem, continuous support, his patience, motivation, eagerness, and immense knowledge. His guidance helped me during the research and writing of this thesis.

I am extremely grateful and express my deeps thanks to ***Dr./ Ismail M. Ahmed***, Assistant Professor of Inorganic Chemistry, Atomic Energy Authority, for his supervision, help, support and encouragement, solving any problem in this work, providing me with knowledge and all the necessary facilities to complete the work and fruitful discussions.

I am also greatly indebted to ***Dr./ Aly A. Helal***, Lecturer of Inorganic Chemistry, Atomic Energy Authority in Hot laboratories Center for his cooperation and support during this study.

Special thanks to all my colleagues and staff members in Nuclear Fuel Chemistry Department and the Hot Lab. Center, for their cooperation.

Finally, **my special thanks are due to my family** for their constant love, support and encouragement to complete this work.
