Abstract

Evaluation of Prostatic Massage in Treatment of Chronic Prostatitis

Awwad AA, Fayez AH, Mohammad RH, Abd Al-Gabbar MM.

This study was done to evaluate the efficacy of prostatic massage in treatment of chronic bacterial prostatitis (CBP=category II) and chronic non-bacterial prostatitis (CNBP=Category IIIa). Patients were divided into four groups. Treatment consisted of triweekly prostatic massage combined with specific culture directed and/ or empirical antimicrobial therapy for at least one month. This study showed that there was no significant difference in symptoms between patients treated with prostatic massage and antibiotics and patients treated with antibiotics alone. Premature ejaculation was significantly improved in cases of chronic pelvic pain, inflammatory type (category IIIa) treated with prostatic massage more than category IIIa treated with antibiotics alone.

Key Words: chronic prostatitis, prostatic massage, prostate gland, chronic pelvic pain syndrome, TRUS, NIH-CPSI, O'Leary Sexual Function Inventory, sexual dysfunction, urinary symptoms.

ACKNOWLEDGEMENT

First, thanks to **ALLAH, most merciful, most gracious**, for giving me the strength and power to continue this work.

I would like to express my appreciation and profound gratitude to my **Prof. Dr. Ahmad Ateyah**, Professor of Andrology, STDs, and Sexology, Cairo University. His kind care, sincere supervision, valuable, and leading advices have made this work possible to be accomplished. No words can express my sincere thanks and deep obligation for **Prof. Dr. Ahmad Ateya**.

Also I would like to thank **Prof. Dr. Ashraf Fayez**, Professor of Andrology, STDs, and Sexology, Cairo University, for his continuous help, invaluable advice, and scientific supervision.

My best thanks, gratitude, and respect are to **Dr. Ragab Hani**, Lecturer of Radiodiagnosis, Cairo University, for his help, guidance, valuable remarks, and precious time he offered throughout this work.

I am also deeply grateful to all my professors and colleagues in the Andrology Department, Kasr Al Aini Hospital, especially **Dr. Wael Zohdy** and **Dr. Mohammad Arafa**, for their help, support, and co-operation throughout my work.

Lastly, I would like to express my deep appreciation and thanks to my patients, who shared in this study and gave me such a good chance to fulfill this work.
