**BIOCHEMICAL STUDY
ON THE ANDROGENS, CERVICAL
MUCUS AS PROLIFRATIVE TESTS IN
INFERTILITY**

THESIS

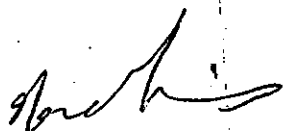

**For fullfilment of the requirements
for the master degree of science**

Submitted by

Saad Zaghoul Hassan Hussein El-Deib

Supervised by

Prof.Dr. Ibrahim Hassan Borai
Prof. of Biochemistry
Faculty of Science
Ain Shams University

Dr. Magdi Mahmoud Mohamed
Ass. Prof. of Biochemistry
Faculty of Science
Ain Shams University

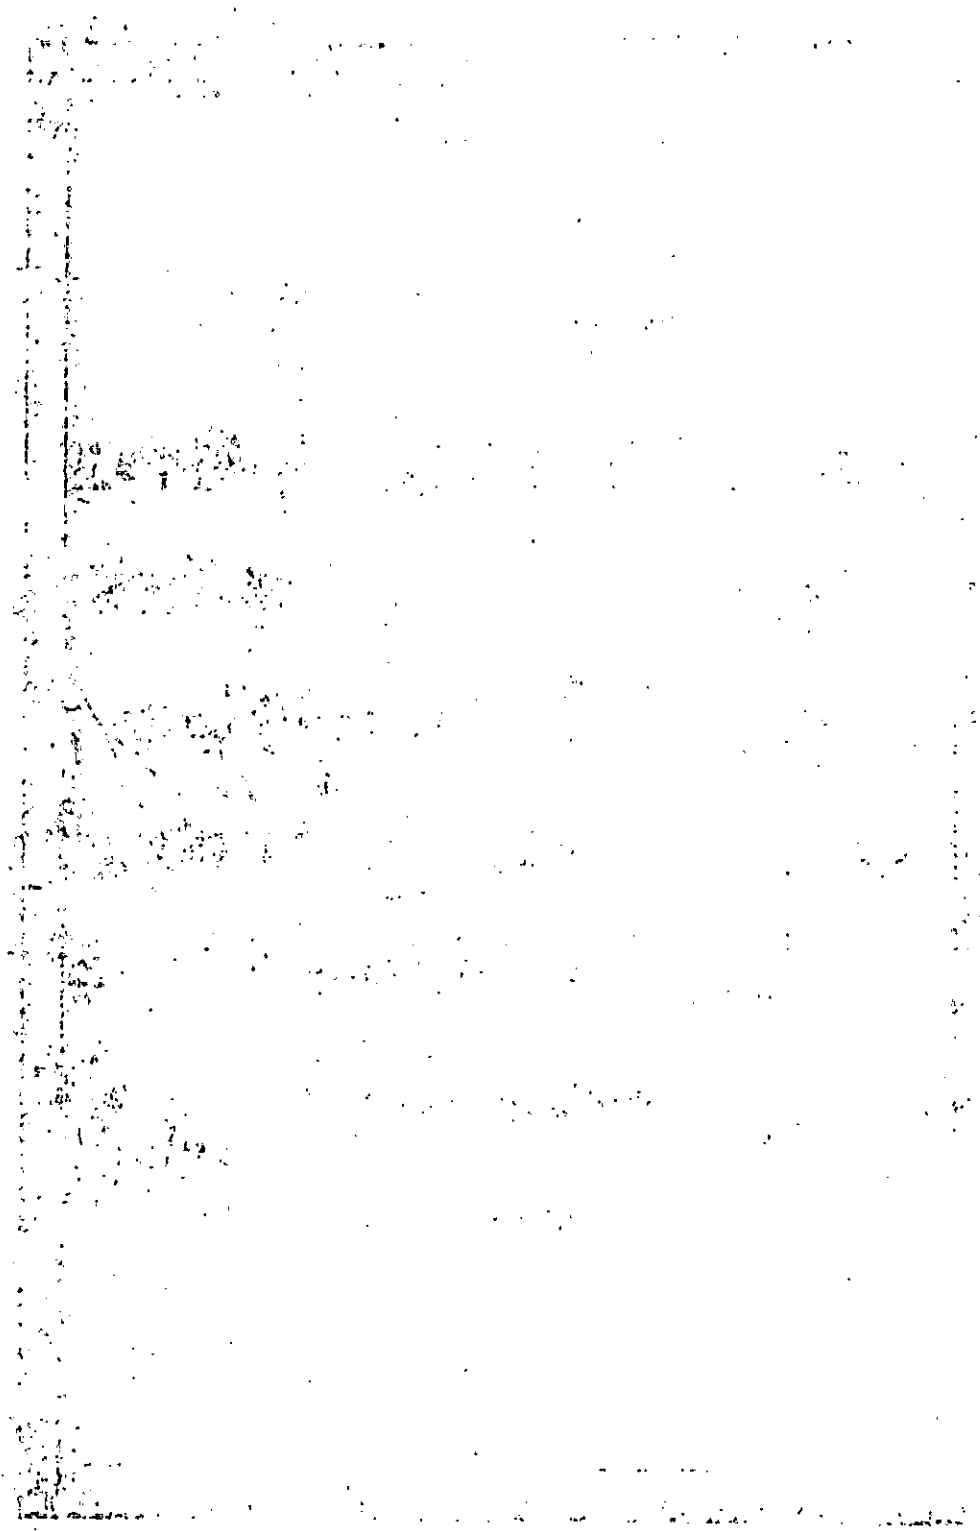

Dr. Mohamed Hassan Nasr El-Din
Lecturer of Gyn. & Obst.
Faculty of Medicine
Ain Shams University

الشورى (٤٩ ، ٥٠)

DECLARATION OF INDEPENDENCE

When in the course of the human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. — That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, — That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness.

Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly the people have suffered long by abuses of this kind. Yet in the most extensive view of the subject, it is unjust to oppress a single Man, in order to secure the good behavior of the rest. Therefore, the British people have the right to alter or to abolish any form of Government, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness.

CONTENTS

	Page No.
INTRODUCTION AND AIM OF THE WORK	1
REVIEW OF LITERATURES	3
Anatomy of the Cervix	3
Histology of the endocervix	3
Physiology of the cervix	5
Physiologic characters & physiologic properties of cervical mucus	10
Evaluation of cervical mucus	21
Abnormal cervical mucus	25
Postcoital test	27
Female androgens	31
Hyperandrogenism in female	39
Pituitary gonadal relationship	41
SUBJECTS AND METHODS	44
Subjects	44
Methods	45
Measuring of endocervical mucus	45
Postcoital test	46
Quantitative determination of Luteinizing hormone	48
Quantitative determination of Prolactin	49

	Page No.
Quantitative determination of testosterone	51
Quantitative determination of androstenedione	53
Quantitative determination of dehydroepiandrosterone- sulphate	56
Statistical analysis	58
RESULTS	61
DISCUSSION	88
SUMMARY	95
CONCLUSION AND RECOMMENDATION	96
REFERENCES	97
ARABIC SUMMARY	112

LIST OF TABLES

	Page No.
1 - Grades of cellularity of cervical mucus	20
2 - Moghissi scoring system of evaluation of cervical mucus parameters..	23
3 - Insler's cervical scoring system.	24
4 - Giner classification of postcoital test.	29
5 - Postcoital scoring system of WHO.	29
6 - Individual data table of control group.	61
7 - Individual data table of group-I.	62
8 - Individual data table of group-II.	63
9 - Statistical analysis of Age, IP, pH, PCT, and CM in all studied groups.	65
10- Statistical analysis of serum hormones in all studied groups.	67
11- Comparison between control group and group-I regarding PCT results.	69
12- Comparison between group-I and group-II regarding PCT results	71
13- Comparison between control group and group-II regarding PCT results.	73
14- The correlation between PCT and all studied parameters in group-I.	75
15- The correlation between CM (Inseler-score) and all studied parameters in group-I.	75

	Page No.
16- The correlation between pH and studied parameters in group-I.	76
17- The correlation between PRL and all studied parameters in group-I.	76
18- The correlation between age and all studied parameters in group-I.	77
19- The correlation between IF and all studied parameters in group-I.	77
20- The correlation between T and all studied parameters in group-I.	78
21- The correlation between DHEA-SO ₄ and all studied parameters in group-I.	78
22- The correlation between A and all studied parameters in group-I.	79
23- The correlation between LH and all studied parameters in group-I.	79
24- The correlation between PCT and all studied parameters in group-II.	80
25- The correlation between CM and all studied parameters in group-II.	80
26- The correlation between T and all studied parameters in group-II.	81
27- The correlation between DHEA-SO ₄ and all studied parameters in group-II.	81

	Page No.
28- The correlation between A and all studied parameters in group-II.	82
29- The correlation between pH and all studied parameters in group-II.	82
30- The correlation between PRL and all studied parameters in group-II.	83
31- The correlation between LH and all studied parameters in group-II.	83
32- The correlation between pH and all studied parameters in control group..	84
33- The correlation between LH and all studied parameters in control group.	84
34- The correlation between PCT and all studied parameters in control group.	85
35- The correlation between CM and all studied parameters in control group.	85
36- The correlation between PRL and all studied parameters in control group.	86
37- The correlation between T and all studied parameters in control group.	86
38- The correlation between DHEA-SO ₄ and all studied parameters in control group.	87
39- The correlation between A and all studied parameters in control group.	87

LIST OF FIGURES

	Page No.
1 - The relative contribution of the adrenal glands and ovaries to the circulating androgens.	32
2 - Percent change of age, PCT, pH and CM among all studied groups.	66
3 - Percent change of serum hormones among all studied groups.	68
4 - Comparison between control group and group-I regarding PCT.	70
5 - Comparison between group-I and group-II regarding PCT.	72
6 - Comparison between control group and group-II regarding PCT.	74
