B7V1Y

Molecular Characterization of Schistosomal Egg Antigen-induced Nucleotide Sequences in Uroepithelial Cells.

A thesis Submitted to
Biochemistry Department
Faculty of Science
Ain Shams University

In partial fulfillment of the requirements for the degree of
Master of Science in Biochemistry

By

Noha Gamal EL Din Samy Bader EL Din

Research assistant
Human Genetics Department
National Research Center

Supervised by

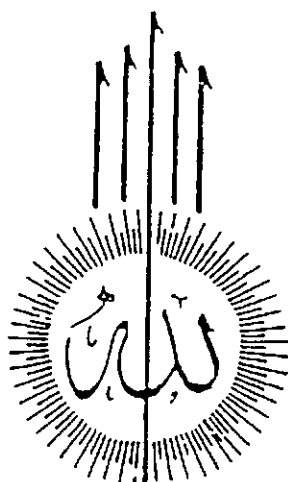

Zeinab
Prof. Dr. Zeinab Z. El Dardiri
Prof. of Biochemistry
Head of Biochemistry Dept.
Faculty of Science
Ain Shams University

M. El Awady
Prof. Dr. Mostafa K. El Awady
Prof. of Molecular Genetics
Human Genetics Department
National Research Center

Dr. Yehia Z. Gad
Associate Prof. of Molecular Genetics
Human Genetics Department

Dedication

I dedicate this work

To my family:

My Kind Mama

My Great Dad

My Dearest Husband

My Lovely Brother

I have to thank God for choosing you to be my family

I can not imagine how was my life without you

Thank you for your presence in my life

Thank you for supporting me

With kindness, patience,.....and love

Yours

Noha Gamal El Din Samy

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has grown from 10% of the economy to 17% of the economy.

There is a growing awareness of the need to improve the efficiency of the public sector. The public sector is a major employer in the UK, and its performance is a key indicator of the health of the economy. The public sector is also a major source of revenue for the government, and its performance is a key indicator of the health of the public sector.

The public sector is a complex organization, and its performance is influenced by a number of factors. These factors include the size of the public sector, the quality of the public sector, the efficiency of the public sector, and the transparency of the public sector.

The public sector is a complex organization, and its performance is influenced by a number of factors. These factors include the size of the public sector, the quality of the public sector, the efficiency of the public sector, and the transparency of the public sector.

The public sector is a complex organization, and its performance is influenced by a number of factors. These factors include the size of the public sector, the quality of the public sector, the efficiency of the public sector, and the transparency of the public sector.

The public sector is a complex organization, and its performance is influenced by a number of factors. These factors include the size of the public sector, the quality of the public sector, the efficiency of the public sector, and the transparency of the public sector.

The public sector is a complex organization, and its performance is influenced by a number of factors. These factors include the size of the public sector, the quality of the public sector, the efficiency of the public sector, and the transparency of the public sector.

The public sector is a complex organization, and its performance is influenced by a number of factors. These factors include the size of the public sector, the quality of the public sector, the efficiency of the public sector, and the transparency of the public sector.

The public sector is a complex organization, and its performance is influenced by a number of factors. These factors include the size of the public sector, the quality of the public sector, the efficiency of the public sector, and the transparency of the public sector.

The public sector is a complex organization, and its performance is influenced by a number of factors. These factors include the size of the public sector, the quality of the public sector, the efficiency of the public sector, and the transparency of the public sector.

The public sector is a complex organization, and its performance is influenced by a number of factors. These factors include the size of the public sector, the quality of the public sector, the efficiency of the public sector, and the transparency of the public sector.

Declaration

I declare that this thesis has been composed by myself and that the work of which it is a record has been done by myself.

It has not been submitted for a degree at this or any other university.

Contents

	Pages
Abstract	i
Acknowledgment	ii
List of abbreviations	iii
List of Figures	v
 Chapter I : Introduction & Aim of the work	 1
 Chapter II: Review of Literature	
2:1 Urothelium	4
2:2 Urinary Bladder Carcinoma	7
2:3 Schistosomiasis and Urinary Bladder Carcinoma	8
2:4 Prognostic Markers for Bladder Cancer	15
2:4:1 Chromosomal abnormalities and loss of heterozygosity.	16
2:4:2 Oncogenes	19
2:4:2:1 H-ras oncogene	19
2:4:2:2 MDM2	20
2:4:2:3 C-myc	21
2:4:2:4 C-erbB-2	22
2:4:3 Growth factor receptors	23
2:4:3:1 Epidermal growth factor receptor	23
2:4:4 Tumor Suppressor Genes	24
2:4:4:1 Retinoblastoma tumor suppressor gene	25
2:4:4:2 p53 tumor suppressor gene	26
2:5 Methods for Studying Different mRNA Population	29
2:5:1 Rot curve	29
2:5:2 Northern blotting hybridization	30

2:5:3 Nuclear run-on assay	31
2:5:4 cDNA library	31
2:5:5 Differential and Subtractive hybridization	32
2:5:6 Arbitrarily primed PCR fingerprinting of RNA	32
2:5:7 Differential display analysis	33
2:5:8 Microarray analysis	36

Chapter III Material & Methods

3:1 Differential Display Reverse Transcription Analysis	38
3:1:1 Cell line	38
3:1:2 RNA extraction	38
3:1:3 DDRT-PCR reaction	40
3:1:4 Denaturing polyacrylamide gel electrophoresis	41
3:1:5 Drying of the gel and autoradiography	43
3:2 Elution and Reamplification of Isolated cDNA Fragments	44
3:3 Cloning of DNA Fragments	45
3:3:1 Purification of PCR product	45
3:3:2 Ligation of the pGEM-T vector and purified PCR product	46
3:3:3 Preparation of competent cells	47
3:3:4 Transformation of ligated PCR : pGEM-T vector.	48
3:3:5 Isolation of recombinant DNA plasmid	50
3:3:6 Restriction enzyme digestion	52
3:4 Sequencing Reaction	53
3:5 Sequencing Analysis	57

Chapter IV : Results

4:1 Detection of differential mRNA expression in
