سورة الفلق (من الآية إلى الآية ٥)

To

Very special people in my life

- *My Parents and my wife*
- *Spirit of Professor Hussien Mohfouz*
Professor of clinical Oncology
Assiut University

ACKNOWLEDGMENT

First and foremost, thanks to **GOD**, the most beneficent and most merciful.

I would like to express my sincere appreciation and deepest gratitude to Dr. **Ashraf Zedan Abd-Alla**, for his continuous supervision, illuminating guidance constructive criticism and wise counsel as well as his kind support throughout this work. It has been a great honour and extreme pleasure for me to proceed with this work under his supervision.

I am also deeply indebted and grateful to Dr. **Sameer Shehata** for his generous supervision, precious advices, productive guidance, valuable instructions, great effort, encouragement and continuous follow up throughout this work..

I am also thank full to all the staff and my colleagues in South Egypt Cancer Institute and clinical oncology department in Assiut University and every one who contributed to his work and helped in its final accomplishment.

LIST OF TABLES

	Page
Table No (1) Clinical, radiological and biochemical features of common skeletal disorders that may mimic bone metastases.....	12
Table No (2) Parameters used for assessment of the patients before and after treatment.....	22
Table No (3) Biochemical markers of bone resorption and formation.....	23
Table No (4) Risk factors for impending pathological fracture in bone metastases.	37
Table No (5): Patients' characteristics	52
Table No (6): Distribution of menopausal status among the whole patients involved in the study	53
Table No (7): Comparison between single dose versus fractionated palliative radiotherapy groups according to site of bone metastases ...	55
Table No (8): Comparison between single dose versus fractionated palliative radiotherapy groups according to onset of metastases	58
Table No (9): Comparison between single dose versus fractionated palliative radiotherapy groups according to performance status before radiotherapy	60
Table No (10): Comparison between single dose versus fractionated palliative radiotherapy according to performance status before and after radiotherapy	62
Table No (11): Comparison between single dose versus fractionated palliative radiotherapy groups according to pathological grade	64

Table No (12): Comparison between single dose versus fractionated palliative radiotherapy groups according to No of sites	65
Table No (13): Comparison between single dose versus fractionated palliative radiotherapy groups according to response rate	68
Table No (14): Comparison between single dose versus fractionated palliative radiotherapy	71
