Date of Research: / / 2015

Approval Stamp: **Date of Approval: / / 2015**

Approval of Faculty Council. **Approval of University Council.**

NAME OF STUDENT:	Islam Mohamed Ahmed Ibrahim
TITLE OF THESIS:	Preparation and physical properties of $CuSbS_2$ thin films.
SCIENTIFIC DEGREE:	DOCTOR OF PHILOSOPHY IN PHYSICS -SOLID STATE PHYSICS.
DEPARTMENT:	PHYSICS
NAME OF FACULTY:	FACULTY COLLAGE OF WOMEN FOR ARTS, SCIENCE, AND EDUCATION.
UNIVERSITY:	AIN SHAMS.
B. SC. GRADUATION DATE:	2005
M. SC. GRADUATION DATE:	2011
Ph. D. GRADUATION DATE:	2015

CONTENTS

CONTENTS		Page no
Title page……		i
Contents……..…..		v
Acknowledgements…….……..		x
List of Figures…….……		xvi
List of Tables…….…….		xx
Abstract……		xxv
Keywords……..……		xxvii
Aim of the work……..		xxviii
Chapter I GENERAL INTRODUCTION		
1.1	Thin film……..…..…..….	1
1.2	Semiconductor materials ……..….....	3
1.3	Conductivity, Resistivity and sheet resistance…….	4
1.4	Applications of semiconductor thin films ……	8
1.4.1	Solar cells applications…….....	9
1.4.2	Thermoelectric applications……	10
1.4.3	Light emitting diodes…….....	10
1.4.4	Biological applications…….....	10
1.5	Types of optical transitions…….....	11
1.6	Literature survey on the $CuSbS_2$ thin films……	12
CHAPTER II THEORETICAL BACKGROUND		
2.1	Difference between semiconductors, insulators and conductors ……..	29
2.1.1	Difference in electrical conductivity……	29
2.1.2	Difference in the band gap …….	29
2.2	Types of Semiconductor ……..……..	33
2.2.1	Intrinsic Semiconductors ……..……	33
2.2.2	Extrinsic Semiconductors ……	36
2.3	Solar Energy ……..……..	39

CONTENTS

2.4	Light Absorption ……..…… ..……..	40
2.5	The photovoltaic effect ……..……	42
2.6	Benefits of photovoltaic ……..……	46
2.7	Basics of the p-n Junction ……	47
2.7.1	The p-n Junction ……..	47
2.7.2	Equivalent circuit of solar cell……..……..	49
2.8	solar cell ……..…….	50
2.9	Requirements of the materials in Solar cell…….	51
2.10	Structure of solar cell ……...	54
2.11	Solar cell principle…….……...	55
2.12	Solar cell parameters…….	56
2.13	Losses in a solar cell…….	59
2.14	Methods of reducing the optical losses.....	62
	CHAPTER III **EXPERIMENTAL TECHNIQUES**	
3.1	Substrate Cleaning ……..……..	64
3.2	The chemical bath deposition technique. .…….	65
3.2.1	Principle of chemical bath deposition technique …	65
3.2.2	Factors influencing the chemical bath deposition process…….……..	69
3.2.3	Film thickness measurements for chemically deposited thin films…….	71
3.2.4	Preparation of $CuSbS_2$ powder and thin films ……	72
3.2.5	Preparation of CdS powder and thin film. …….	74
3.3	Thermal evaporation ……. …….	75
3.3.1	Thermal evaporation technique ……	75
3.3.2	Advantages of vacuum evaporation method…….	76
3.3.3	Quartz crystal thickness monitor…….…….	78
3.4	Thermal analysis……	80
3.5	Theoretical background of X-ray diffraction ……	81
3.5.1	Basics of X-ray diffraction……	81
3.5.2	The Bragg condition …….	83
3.6	Transmission electron microscope……..	87
3.6.1	Operation of Transmission electron microscopy	87
3.6.2	Sample preparation for TEM investigation……	89
3.6.3	Electron diffraction……..	90

CONTENTS

3.7	Scanning Electron Microscope (SEM)……..	92
3.8	Energy dispersive X-ray spectroscopy (EDX)…….	96
3.9	Spectrophotometric measurements……..	98
3.10	Electrical Measurements……	101
3.10.1	Carrier type determination……..	101
3.10.2	The current-voltage characteristic of MSM configuration system…….	103
3.10.3	DC conductivity measurements…….	104
3.11	Fabrication and characterization of solar cells…..	106
3.11.1	Fabrication of solar cells……	106
3.11.2	Current-Voltage Measurements……..	107
	CHAPTER IV CHARACTERIZATION OF $CuSbS_2$ and CdS thin films	
4.1	Structural characterizations of the $CuSbS_2$ samples	109
4..1.1	The X-ray diffraction analysis of the prepared $CuSbS_2$ powder ……	109
4.1.2	Differential thermal analysis (DTA)……	113
4.1.3	X-ray diffraction analysis of $CuSbS_2$ thin films….	116
4.1.4	Transmission electron microscope and electron diffraction of as deposited and annealed $CuSbS_2$ thin films……	122
4.1.5	Scanning electron microscope and EDX spectra of as-deposited $CuSbS_2$ thin films. …….	124
4.1.6	Scanning electron microscope and EDX spectra of annealed $CuSbS_2$ thin films……..	128
4.2	Optical properties of $CuSbS_2$ thin films…….	133
4.2.1	Optical properties of as-deposited $CuSbS_2$ thin films	133
4.2.2	Effects of annealing temperature on the optical properties of $CuSbS_2$ thin films……	143
4.3	Electrical properties of $CuSbS_2$ thin films…….	153
4.3.1	Identification of the material conduction type…..	153
4.3.2	I-V characteristics of $CuSbS_2$ thin films…….	154
4.3.3	The temperature dependence of electrical resistance, dc conductivity and activation energy for $CuSbS_2$ thin films…….	158

CONTENTS

4.4	Structural characterizations of the CdS samples…	168
4.4.1	The X-ray diffraction analysis of the prepared CdS powder……	168
4.4.2	X-ray diffraction analysis of CdS thin film. …….	170
4.4.3	Transmission electron microscope and electron diffraction of as deposited CdS thin film	171
4.4.4	Scanning electron microscope and EDX spectra of as-deposited CdS thin film…….	172
4.5	Optical properties of as-deposited CdS thin films	174
4.6	Electrical properties of CdS thin film……	179
4.6.1	Identification of the material conduction type…..	179
4.6.2	I-V characteristics of CdS thin films…….	180
4.6.3	The temperature dependence of electrical resistance, dc conductivity and activation energy for CdS thin films…….	181
	CHAPTER V	
	Solar Cells Fabrication	
5.1	Fabrication and characterization of chemically prepared [FTO / CdS/ $CuSbS_2$/Ag] solar cell…….	185
5.2	Fabrication and characterization of [FTO / CdS/ $CuSbS_2$/ metal electrode] solar cells by thermal evaporation……	188
5.2.1	The Dark and illumination I–V characteristics for the [FTO / CdS/ $CuSbS_2$/ different metal electrode] solar cells…….	189
5.2.2	The calculations of solar cell parameters for the [FTO / CdS/ $CuSbS_2$/ different metal electrode] solar cells.	191
5.2.2.1	The calculations of resistance R_s and the diode ideality factors for the [FTO / CdS/ $CuSbS_2$/ different metal electrode] solar cells…….	191

CONTENTS

5.2.2.2	The calculations of the Fill factor efficiency for the [FTO / CdS/ $CuSbS_2$/ / different metal electrode] solar cells prepared by thermal evaporation……	195
5.3	Fabrication and characterization of [Al/ Si (n-type) /$CuSbS_2$/ different metal electrode] solar cells by thermal evaporation……	200
5.3.1	The Dark and illumination I–V characteristics for the [Al/ Si (n-type)/ $CuSbS_2$/ different metal electrode] solar cells……..	201
5.3.2	The calculations of solar cell parameters for [Al/ Si / (n-type)/ $CuSbS_2$/ different metal electrode] solar cells…….	203
5.3.2.1	The calculations of resistance R_s and the diode ideality factors for the [Al/ Si/ (n-type)/ $CuSbS_2$/ different metal electrode] solar cells…….	203
5.3.2.2	The calculations of the Fill factor efficiency for the [Al/ Si/ (n-type)/ $CuSbS_2$/ different metal electrode] solar cells……...	206
	Conclusion……	211
	Reference……	219
	Arabic Summary…….	230
