ACKNOWLEDGMENT

First of all, I thank *Allah* for helping me to accomplish this work.

My deepest thanks, sincere indebtedness and appreciation to *Prof. Aida Aly Reda Sherif*, professor of Epidemiology for her whole- hearted guidance, valuable instructions, enormous support, great advice & very ready cooperation at any time throughout the whole work.

No words can adequately express my deepest gratitude and great appreciation to *Prof. Sunny Sallam* Prof. of Epidemiology and Vice Dean, for her valuable guidance, fruitful efforts, continuous encouragement & endless help that made the accomplishment of this work possible.

I would like to express my deepest appreciation to *Dr. Ahmed Mandil* Assistant Prof. of Epidemiology for his infinite patience, kind guidance, precious advice which helped me to overcome many obstacles & also his careful review of this work deserve my unlimited gratitude.

I wish to express my heartfelt thanks to all the staff in the Epidemiology department, who helped me very kindly throughout my whole work.

I wish to express my great appreciation to all officials and health workers in Alexandria Health Directorate for their kindness and full cooperation during the study.

It seems impossible to say how I am indebted to my family and my friends for their incredible help and unfailing support. Without their love & encouragement this work may have never come to light.

DEDICATION

To My Mother
