**Oral Health Condition Among Workers
Exposed to Lead In Alexandria Governorate**

137540

A thesis Submitted to the High Institute of Public Health, University
of Alexandria, in partial fulfillment of the requirements for the
Degree of Master of Public Health
(Biostatistics)

By

Nagwa Abd El-Monem Ahmed El-Bestawy

B.D.M.S. Faculty of Dentistry, University of Alexandria, 1979

D.D.P.H. Faculty of Dentistry, University of Alexandria, 1989

High Institute of Public Health

University of Alexandria

2005

Supervisors

Dr. Amina Mohamed El Ghamry

Professor of Biostatistics

To
Soul of My Parents

&

TO My Family

ACKNOWLEDGMENT

First o all, Thanks to **God** for help and strength offered to me to complete this work.

I would like to express my deepest thanks to all those who shared by their time, efforts and encouragement in the fulfillment of this work.

Firstly, I would like to thank my supervisors:

My deepest thanks, appreciation and profound gratitude to Professor **Dr. Amina Mohamed El-Ghamry**, Professor of Biostatistics, High Institute of Public Health, Alexandria University, for her valuable guidance and continuous assistance and great efforts she had devoted in the supervision of this work.

No words can adequately express my sincere gratitude and warmth appreciation to Professor **Dr. Hafez Mahmoud Ahmed**, Professor of Public Health Dentistry, Faculty of Dentistry, Alexandria University, for his great efforts, unlimited help and continuous encouragement throughout the work.

I am very grateful and indebted to **Dr. Nehad Hassan Mahdy**, Assistant Professor of Biostatistics, High Institute of Public Health, Alexandria University, for her great efforts and unlimited cooperation and help in guiding and supervising this research.

My deepest thanks to **Dr. Khalid Fikry El-Saeed**, Assistant Professor of Industrial Hygiene, High Institute of Public Health, Alexandria University, for his valuable advice, helpful suggestion and encouragement during the course of this study.

I wish to express my sincere appreciation and unlimited gratitude to **Prof. Dr Mohamed Hussein**.

I would like to extend my appreciation to all personnel in the Statistical Department in High Institute of Public Health, Alexandria University, for their cooperation and support.

Last but not least, I wish to thank **my Family** for their never ending support and tolerance.

Arabic Summary

LIST OF TABLES

No.		Page
I.	Distribution of sociodemographic characteristics among exposed and non-exposed groups.	54
II.	Distribution of habits (smoking and tooth brush-use) among exposed and non exposed groups.	55
III. A	Distribution of DMFT and its components among exposed and non exposed groups	57
B	Mean values of DMFT and its components among exposed and non exposed groups	58
IV.	Distribution of Erosion, Abrasion and Coloured teeth among exposed and non exposed groups	60
V.	Distribution of teeth colour among exposed and non exposed groups.	61
VI.	Distribution of gum condition (gingivitis, pockets, blue line, coloured and bleeding gums) among exposed and non exposed groups	63
VII.	Distribution of gum colour among exposed and non exposed groups	64
VIII. A	Distribution of oral health simplified index (OHS-I) and its two components (debris index simplified DI-S and calculus index simplified CI-S among exposed and non exposed groups.	66
B	Mean values of oral health simplified index (OHS-I) and its two components (DI-S and I-S) and periodontal index (PI) among exposed and non-exposed groups.	67
IX.	Distribution of pH of saliva before shift among exposed and non exposed groups.	69

No.		Page
X.	Distribution of pH of saliva after shift among exposed and non exposed groups.	70
XI.	Distribution of blood lead levels among exposed groups.	71
XII.	Distribution of DMFT by age among exposed and non-exposed groups.	75
XIII.	Distribution of PI by age among exposed and non-exposed groups.	76
XIV.	Distribution of OHS-I by age among exposed and non-exposed groups.	77
XV.	Distribution of DMFT by income among exposed and non-exposed groups.	80
XVI.	Distribution of PI by income among exposed and non-exposed groups.	81
XVII.	Distribution of OHS-I by income among exposed and non-exposed groups.	81
XVIII.	Distribution of DMFT by work duration among exposed and non-exposed groups.	85
XIX.	Distribution of PI by work duration among exposed and non-exposed groups.	86
XX.	Distribution of OHS-I by work duration among exposed and non-exposed groups.	87
XXI.	Distribution of DMFT by educational level among exposed and non-exposed groups.	90
XXII.	Distribution of PI by educational level among exposed and non-exposed groups.	91
XXIII.	Distribution of OHS-I by educational level among exposed and non-exposed groups.	92

No.		Page
XXIV.	Distribution of DMFT by marital state among exposed and non-exposed groups.	95
XXV.	Distribution of PI by marital state among exposed and non-exposed groups.	96
XXVI.	Distribution of OHS-I by marital state among exposed and non-exposed groups.	97
XXVII.	Distribution of DMFT by smoking among exposed and non-exposed groups.	100
XXVIII.	Distribution of PI by smoking among exposed and non-exposed groups.	101
XXIX.	Distribution of OHS-I by smoking among exposed and non-exposed groups.	102
XXX.	Distribution of DMFT by toothbrush-use among exposed and non-exposed groups.	104
XXXI.	Distribution of PI by toothbrush-use among exposed and non-exposed groups.	105
XXXII.	Distribution of OHS-I by toothbrush-use among exposed and non-exposed groups.	106
XXXIII.	Distribution of DMFT by blood lead levels among exposed groups.	108
XXXIV.	Distribution of PI by blood lead levels among exposed groups.	108
XXXV.	Distribution of OHS-I by blood lead levels among exposed groups.	109
XXXVI.	Mean concentrations of lead in work atmosphere and in blood of workers of the two exposed subgroups.	113

No.		Page
XXXVII.	The mean age, income and work duration among workers of the two exposed subgroups.	115
XXVIII.	Distribution of marital status, educational level, smoking and toothbrush-use among workers of the two exposed subgroups.	116
XXXIX.	Distribution of DMFT and its components among workers of the two exposed subgroups.	118
XL.	Distribution of erosion, abrasion and coloured teeth among workers of the two exposed subgroups.	121
XLI.	Distribution of coloured teeth among workers of the two exposed subgroups.	122
XLII.	Distribution of gum condition (gingivitis, pocket formation, blue line, bleeding gums and coloured gums) among the two exposed subgroups.	124
XLIII.	Distribution of coloured gums among workers of the two exposed subgroups.	126
XLIV.	Distribution of OHS-I and its two components DI-S and CI-S among workers of the two exposed subgroups.	128
XLV.	Results of stepwise logistic regression analysis of variables related to oral health indices among the two examined groups. (Study sample n=800)	132
XLVI.	Results of stepwise logistic regression analysis of related to oral health indices among exposed group. (n=400)	133

LIST OF FIGURES

No.		Page
1	Percentage of oral health conditions and indices among exposed and non exposed groups.	57
2	Mean values of DMFT and its components among exposed and Non exposed groups	58
3	Mean values of oral health simplified index (OHS-I) among exposed and non-exposed groups.	67
4	Distribution of lead blood levels among exposed groups.	72
5	Distribution of exposed workers with oral conditions (expressed as indices) according to blood lead level.	110
6	Percent of DMFT and its components among the two exposed subgroups.	119
7	Distribution of some oral conditions among the two exposed subgroups.	129
