**Approved by**

***Prof. Dr. Adel Abd El –Sattar***

Professor of Solid State Physics  
Physics Department, Ain Shams University

***Prof. Dr. Ahmed Hussien Ashour***

Professor of Physics  
Atomic Energy Authority

***Prof. Dr. Hamdy Mohammed Osman Kalifa***

Professor of Physics  
Physics Department, Cairo University

**2016**

**Degree: Master Degree in Physics**

**Title: Synthesis and characterization of rubber-ferrite composites**

**Name: Mohammed Adel Abd El-Aal Aly Nough**

**Thesis Supervisors:**

***Prof. Dr. Adel Abd El-Sattar***

Professor of Solid State Physics

Physics Department, Faculty of Science

Ain Shams University

***Prof. Dr. Doaa Essamy El-Nashar***

Professor of Polymer chemistry

Polymer and Pigments departments

National Research Center

***Assoc.prof. Waleed Ragab Abd El-Rasheed Agami.***

Assoc.prof. of Solid State Physics

Physics Department, Faculty of Science

Ain Shams University

**Abstract.....1**

**Introduction.....3**

## **Chapter 1: Theoretical background**

**1.1 Classification of polymers.....6**

**1.2 Rubbers.....7**

**1.2.1 Types of rubbers**

i- Natural rubbers.....8

ii- Synthetic rubbers.....8

Acrylonitrile Butadiene Rubber (NBR).....10

**1.3 Rubber ferrite composites(RFC).....11**

**1.4 Ferrites.....13**

**1.4.1 Chemical composition of spinel ferrites .....13**

**1.4.2 Crystal Structure of Spinel Ferrites .....14**

**1.4.3 Distribution of the metal ions over octahedral and tetrahedral sites in spinel ferrites .....17**

**1.4.4 Mechanisms of the electrical conduction in transition metal oxides and ferrimagnetic materials.....18**

**1.4.5 Dielectric properties of ferrites.....21**

## Chapter 2: Literature Survey

<b>Co-Zn ferrite properties.....</b>	<b>30</b>
<b>Effect of some spinel ferrites on the different properties of natural rubber (NR).....</b>	<b>33</b>
<b>Effect of some spinel ferrites on the different properties of synthetic rubber.....</b>	<b>36</b>
<b>Aim of the Work.....</b>	<b>40</b>

## Chapter 3: Experimental Techniques

<b>3.1 Preparation of Samples.....</b>	<b>41</b>
Preparation of Ferrite .....	41
Rubber preparation.....	43
<b>3.2 Rubber compounding.....</b>	<b>43</b>
<b>3.3 Characterization.....</b>	<b>50</b>
I- X-ray diffraction.....	50
II- FTIR spectroscopy.....	50
III- Scanning electron microscopy.....	52
IV- Transmission electron microscopy.....	52
V- Rheometric characteristics.....	52
<b>3.4 Mechanical properties.....</b>	<b>55</b>
I-Tensile strength & Young's modulus.....	55
II- Hardness measurements.....	56
<b>3.5 Dielectric Measurements .....</b>	<b>57</b>

### Chapter 4: Results and Discussion

#### Group I

<b>4.1 Physical Properties.....</b>	<b>60</b>
4.1.1 X-ray Analysis.....	60
4.1.2 FTIR Analysis.....	66
4.1.3 Transmission Electron Microscope (TEM).....	70
4.1.4 Scanning Electron Microscope (SEM).....	71
<b>4.2 Rheological Properties .....</b>	<b>73</b>
4.2.1 The variation of torque and hardness with different samples.....	73
4.2.2 The variation of time (scorch, cure) and cure rate index with different samples.....	74
<b>4.3 Mechanical properties.....</b>	<b>75</b>
4.3.1 The variation of stress and Young's modulus with different samples.....	75
<b>4.4 Electrical properties.....</b>	<b>77</b>
4.4.1 The variation of the electrical resistivity, real and imaginary parts of dielectric constant with frequency...77	
4.4.2 Composition dependence of resistivity, real and imaginary part of dielectric constant.....	80

#### Group II

<b>4.5 Physical Properties.....</b>	<b>82</b>
4.5.1 Scanning Electron Microscope (SEM).....	82
<b>4.6 Rheological Properties .....</b>	<b>84</b>
4.6.1 The variation of torque and hardness with different ferrite load.....	84
4.6.2 The variation of time (scorch, cure) and cure rate index with different ferrite load.....	85

## Contents

---

<b>4.7 Mechanical properties.....</b>	<b>86</b>
4.7.1 The variation of stress and Young's modulus with different ferrite load .....	86
<b>4.8 Electrical properties.....</b>	<b>88</b>
4.8.1 The variation of the electrical resistivity, real and imaginary parts of dielectric constant with frequency...88	
4.8.2 The variation of resistivity, real and imaginary part of dielectric constant with different filler loading.....	91

### Group III

<b>4.9 Physical Properties.....</b>	<b>93</b>
4.9.1 X-ray Analysis.....	93
4.9.2 Transmission Electron Microscope (TEM).....	96
<b>4.10 Rheological Properties .....</b>	<b>99</b>
4.10.1 The variation of torque and hardness with different particle size of ferrite.....	99
4.10.2 The variation of time (scorch, cure) and cure rate index with different particle size of ferrite .....	100
<b>4.11 Mechanical properties.....</b>	<b>101</b>
4.11.1 The variation of stress and Young's modulus with different particle size of ferrite .....	101
<b>4.12 Electrical properties.....</b>	<b>102</b>
4.12.1 The variation of the electrical resistivity, real and imaginary parts of dielectric constant with frequency..	102
4.12.2 The variation of the resistivity, real and imaginary parts of the dielectric constant with particle size of ferrite filler.....	105
<b>Conclusion .....</b>	<b>107</b>
<b>References.....</b>	<b>109</b>

# Acknowledgement

## **ACKNOWLEDGEMENT**

First, I thank **Allah**, the most **Beneficent**, the most **Merciful**, Who gave me the ability to do this work and I am asking **His** support for further success in my scientific work.

*This work is dedicated to my loving family, for I would not be who I am today without their love, friendship and everlasting support. I am forever thankful.*

It was honor for me that I could be one of the students of **Prof.Dr. Adel Abd El-Sattar Mohammed**, Physics Department, Faculty of Science, Ain Shams University and **Prof. Dr. Doaa El-Nashar**, polymer and pigment department, National research center for proposing and planning this investigation and their continuous encouragements, valuable suggestions, capable supervision and reading throughout the manuscript that have rendered the realization of this work to be possible. The valuable discussions and continuous assistance which were so willingly during the course of this work will never be forgotten.

Deep thanks to **Assoc.Prof.Dr. Waleed Ragab Abd El-Rasheed Agami**, Physics Department, Faculty of Science, Ain Shams University for proposing and planning this investigation and his continuous encouragements, valuable suggestions, capable supervision and friendship.

I would like to express my deepest thanks to **Prof. Dr. Ahmed Abd El-Ghany** and **Assoc.Prof.Dr. Hesham El-Sayed**, Physics Department, Faculty of Science, Ain Shams
