**A STUDY OF TELOMERASE ACTIVITY IN PERIPHERAL  
BLOOD CELLS IN TREATED AND UNTREATED CHRONIC  
MYELOGENOUS LEUKEMIA PATIENTS**

**Thesis**  
Submitted in partial fulfillment for  
Masters Degree  
in  
**BIOCHEMISTRY**

by  
**Loaa Abdalla Tag Eldeen**  
M.B.B.Ch.

**Supervisors**

**Prof. Taher Ibrahim Elserafi**  
Professor of Biochemistry  
Faculty of Medicine  
Suez Canal University

**Dr. Emad Ibrahim Abdelfattah**  
Assistant Professor of Biochemistry  
Faculty of Medicine  
Suez Canal University

**Dr. Mohamed Tarek Mansour**  
Assistant Professor of Virology  
and Immunology  
National Institute Of Cancer  
Cairo University

**Faculty of Medicine**  
**Suez Canal University**  
**2000**

*Dedication:*

*To my family*

Acknowledgement

**“First and foremost praise is due to Allah”.**

I wish to express my deepest gratitude to Prof. Dr. *Taher El-Serafi*, Professor and Head of Biochemistry Department, Faculty of Medicine, Suez Canal University, for his great help starting from giving me the chance to work in this field, passing through many directions and valuable advice throughout the work and ending by his prominent finger print during finalization of this work.

I wish also to express my sincere appreciation to Dr. *Emad Ibrahim Abdelfattah*, Assistant Professor of Biochemistry, Faculty of Medicine, Suez Canal University, for his kind assistance and fruitful suggestions. It is a great honor to work under his supervision.

My deepest thanks are extended to Dr. *Tarek Mansour*, Assistant Professor of Virology and Immunology, Cancer Institute, Cairo University, for his kind assistance, suggestions and expert guidance.

I wish to thank all the staff, colleagues and members in Biochemistry Department Faculty of Medicine, Suez Canal University and Clinical Pathology Department in Cancer Institute, Cairo University especially Dr. *Heba Raslan*, assistant lecturer of hematology, for their appreciable help and support during preparing this thesis.

Last but not least, my deepest thanks are extended to my family, without them, this work would not have been done.

# *Contents*

	Page
<b>Introduction</b>	1
<b>Aim of the Work</b>	4
<b>Review of the Literature</b>	
* <b>Telomeres</b>	
• Chromosome structures	5
• Telomeric DNA sequences	6
• Telomere-Binding Proteins	7
• Replication of telomeric DNA	9
* <b>Telomerase</b>	10
- The telomerase reaction	13
- Recognition of the primer 3' end sequence	13
- The RNA moiety of telomerase	15
- The template function of telomerase	18
- The mechanism of telomeric DNA synthesis by telomerase	22
- DNA polymerization	22
- Translocation	24
- Processivity of telomerase in vivo	27
- Primer specificity of telomerase	29
- Healing of broken chromosome by telomerase in vivo	31
- Synthesis of cytosine-rich strand	32
- Regulation of telomere length	33
- Telomere length and telomerase activity in cellular aging	34
- Telomeres and telomerase activity in human cancer	35
* <b>Chronic Myelogenous Leukemia</b>	39
• Definition	39
• Molecular pathogenesis	39
• Symptoms and signs	41
• Laboratory findings	42
• Diagnosis	43

• Treatment	44
• Prognosis	47
* Telomerase Activity in Leukemia	48

## **Subjects and Methods**

<b>Subjects</b>	51
-----------------	----

<b>Methods</b>	53
----------------	----

* Blood sample collection	53
* Separation of mononuclear cells	53
* Preparation of extract from mononuclear cells	54
* Telomerase activity assay by PCR	55
* Hybridization and ELISA detection	57
* Blood picture	60
* Clinical data	60
* Statistical analysis	60

<b>Results</b>	61
----------------	----

<b>Discussion</b>	86
-------------------	----

<b>Conclusions</b>	95
--------------------	----

<b>Recommendations</b>	96
------------------------	----

<b>References</b>	97
-------------------	----

<b>Arabic summary</b>	112
-----------------------	-----

# *List of Tables*

	<b>Page</b>
Table (1) Comparison between the studied groups as regards mean age	61
Table (2) Comparison between the studied groups as regards age group	62
Table (3) Comparison between the studied groups as regards sex distribution	63
Table (4) Comparison between the studied groups as regards the distribution of telomerase activity	65
Table (5) The relation between telomerase activity and mean age in the studied groups	67
Table (6) Relation between telomerase activity and age group in the study subject	68
Table (7) Sex distribution among telomerase positive subjects in the studied groups	69
Table (8) Sex distribution among telomerase negative subjects in the studied groups	70
Table (9) Relation between telomerase activity and the frequency of splenomegaly in patients groups	71
Table (10) Relation between telomerase activity and frequency of hepatomegaly in patients groups	72
Table (11) Relation between telomerase activity and mean WBC count (x1000) in the studied groups	74
Table (12) Relation between telomerase activity and mean RBC count ( $10^6$ ) in the studied groups	76
Table (13) Relation between telomerase activity and mean hemoglobin concentration (gm/dl) in studied groups	78
Table (14) Relation between telomerase activity and mean platelet count(x1000) in the studied groups	80
Table (15) Relation between telomerase activity and mean blast cells percentage in the studied groups	82
Table (16) Relation between telomerase activity and mean lymphocyte percentage in the studied groups	83
Table (17) Relation between telomerase activity and mean myelocyte percentage in the studied groups	84
