# ABSTRACT

The aim of this study is to evaluate one of the newest volatile anesthetics, desflurane which is characterized by low blood solubility, high vapor pressure, ultrashort duration of action and moderate potency. The Tec 6 desflurane vaporizer is electrically heated, thermostatically control, constant temperature and pressurized. Desflurane has several advantages including rapid induction and recovery, hemodynamic stability and safety for hepatic and renal systems.

## **Key Words:**

Anesthesia, Inhalational- Desflurane.

## Acknowledgement

First and foremost, I feel always indebted to God, the kindest and the most merciful.

Words will never be able to express my deepest gratitude to all those who helped me during preparation of this study.

I am so grateful to Prof. Dr. Amr zaki Mansour, Prof. Of anesthesiology, faculty of medicine, Cairo university, who kindly supervised and motivated the performance of the work with keen interest and in dispensable advices.

I express my sincere appreciation to Assist. Prof. Dr. Mohamed Farok Youssef, Assistant Professor of anesthesiology, faculty of medicine, Cairo university for his valuable scientific supervision and guidance.

Finally, I would like to express my deep thanks to my parents who gave and still giving me their guidance, support and their love.
