MOTHER TO INFANT TRANSMISSION OF HEPATITIS C VIRUS INFECTION IN RURAL AND SEMI-URBAN AREAS IN MENOUEFIYA GOVERNORATE

Thesis

SUBMITTED IN PARTIAL FULFILLMENT OF
THE REQUIREMENTS OF M.D. DEGREE
IN PEDIATRICS

By

Magdy Anwer Saber

Assistant Lecturer of Pediatrics, Liver Institute

Supervisors

**Prof. Dr.
Soheir S. Abou El-Ella**

Professor and Head of
Pediatrics Department
Faculty of Medicine,
Menoufiya University

**Prof. Dr.
Ahmed Abbas Raouf**
Head of Biochemistry Department
and Dean of Liver Institute
Menoufiya University

**Prof. Dr.
Farahat El-Gazzar**

Professor of Pediatrics
Faculty of Medicine,
Menoufiya University

**Dr.
Fahima M. Hassan**

Ass. Professor of Pediatrics
Faculty of Medicine,
Menoufiya University

**FACULTY OF MEDICINE
MENOUEFIYA UNIVERSITY**

B 10001

[خَلِّجْ فَضْلَهُ اللَّهُ يُؤْتِيهِ مَنْ يَشَاءُ وَاللَّهُ خَدُّو الْفَضْلَ الْعَظِيمِ]

صَلَّى اللَّهُ الْعَظِيمِ

الآية ٢١ سورة الحديد
القرآن الكريم

*To
My Family*

Acknowledgement

I would like to express my sincerest and deepest appreciation to **Dr. Soheir Abul-Ella**, Professor and Head of Pediatrics Department, Faculty of Medicine, Menoufiya University for her generous supervision, continuous encouragement and kind advice during the conduction of this work, without her help, this work could never been completed.

No words can express my deep gratitude and appreciation to **Prof. Dr. Ahmed Abbas Raouf**, Head of Biochemistry Department and Dean of Liver Institute, Menoufiya University not only for giving me the honour to make this work, but also for his sincere devotion, great patience, valuable advice and honest guidance.

I am particularly indebted to **Dr. Farahat El-Gazzar**, Professor of Pediatrics, Faculty of Medicine, Menoufiya University for his honest assistance, his helpful advice, constant guidance and follow up throughout this work.

Deep thanks to **Dr. Fahema Hassan**, Assistant Professor of Pediatrics, Faculty of Medicine, Menoufiya University for her continuous guidance, encouragement and valuable suggestions throughout the whole work.

I would like to offer my thanks to my colleagues and staff in Biochemistry and Immunology Department in Liver Institute for their kind help and cooperation during the conduction of this work.

I am greatly indebted to mothers and infants sharing in this work whom I bleed twice or thrice in return of nothing except for this study to be completed.

CONTENTS

Introduction	1
Aim of the work	2
Review of literature	3
Hepatotropic viruses	3
Identification of HCV	7
Immune escape	38
Epidemiology of Hepatitis C	55
Natural history and consequences of HCV infection	75
Pathogenesis of HCV infection	99
Diagnosis and prevention	107
Treatment of Hepatitis C	111
Subjects and Methods	124
Results	129
Discussion	166
Summary and conclusion	200
Recommendations	206
References	207
Arabic Summary	

LIST OF ABBREVIATIONS

Alp	Alkaline phosphatase
ALT	Alanine transferase.
AST	Aspartate transferase
ANA	Antinuclear antibody
Anti-HAV	Antibody against hepatitis A.
Anti-HBc	Antibody against hepatitis B (c antigen)
Anti-HCV	Antibody against hepatitis C virus.
Anti-LKM1	Antibody against liver-kidney-microsomal antigen.
ASMA	Antismooth muscle antibody.
AUG	Adenine-Uracil-Guanine
CAH	Chronic active hepatitis
C/E	Clinical examination.
cDNA	Complementary deoxyribonucleic acid.
ELISA/EIA	Enzyme linked immunosorbent assay.
HAV	Hepatitis A virus
HBsAg	Hepatitis B surface antigen.
HBV	Hepatitis B virus
HCC	Hepatocellular carcinoma.
HCV	Hepatitis C virus
HDV	Hepatitis Delta virus
Head circ.	Head circumference
HEV	Hepatitis E virus
HFV	Hepatitis F virus
HGV	Hepatitis G virus
HIV	Human immunodeficiency virus.

IFN α	Alpha interferon.
IgG	Immunoglobulin G.
IgM	Immunoglobulin M
IL	Interleukin
Inf	Infant
NANBH	Non-A, Non-B hepatitis
NCR	Non-coding region.
nd	not done
nt	Nucleotide
ORF	Open reading frame.
PCR	Polymerase chain reaction.
PT-NANBH	Post-transfusion non-A, non-B hepatitis.
rDNA	Recombinant deoxyribonucleic acid
RIA	Radioimmunoassay
RIBA	Recombinant immunoblot assay.
RNA	Ribonucleic acid.
RT	Reverse transcriptase.
Sch.	Schistosomiasis.
Ser. Alb.	Serum albumin
Ser. Bil.	Serum bilirubin.
Ser. Prot.	Serum protein
Sig.	Significant
Stat. Sig.	Statistically significant
UDCA	Uro-deoxycholic acid.
UTR	Untranslated region.

LIST OF TABLES **(IN REVIEW)**

Table (1):	Properties of hepatitis C virus	9
Table (2):	Properties of HCV proteins	15
Table (3):	Comparison of different classifications for HCV genotypes	26
Table (4):	Percent sequence similarity between type, subtype and isolate in E1, NS-4, and NS-5 regions	29
Table (5):	World prevalence of HCV based on anti-HCV seroprevalence studies	56
Table (6):	Prevalence of anti-HCV in high risk groups	60
Table (7):	Prevalence of anti-HCV among patients with HCC in selected countries	86
Table (8):	Results of randomized controlled trials of IFN-alpha in the treatment of acute hepatitis C	113
Table (9):	Results of randomized controlled trials of IFN-alpha in the treatment of chronic hepatitis C	114
Table (10):	HCV infection and autoantibodies: Implications for treatment	122

LIST OF FIGURES (IN REVIEW)

Figure (1): Scheme of isolation of HCV cDNA and development of assay of anti-HCV	11
Figure (2): Genetic organization of the hepatitis C viral genome	13
Figure (3): Organization of the ORF of HCV-1	20
Figure (4): Phylogenetic analysis of nucleotide sequences in part of the HCV NS5 region	24
Figure (5): Typical sequence of events in a case of acute hepatitis C that progresses to chronic infection with liver disease	43
Figure (6): Hepatitis C virus antibody tests	47
Figure (7): Appearance and disappearance of anti-HCV antibodies during HCV infection	49
Figure (8): Prevalence of anti-HCV in different patient populations	74
Figure (9): Potential routes of transmission of HCV	74
Figure (10): Typical sequence of events in acute post-transfusion hepatitis C virus infection	75
Figure (11): Patterns of liver disease in HCV infected individuals	79
