

The Genotoxic Effect Of Tetragonal Zirconia On Human Peripheral Blood Lymphocytes.

Thesis Submitted to the Faculty of Dentistry,

Ain-Shams University

In Partial Fulfillment Of The Requirements Of The Master

Degree In Fixed Prosthodontics

By

Sarah Sayed Ahmed Hanafy

Faculty of Dentistry

Ain Shams University

BD.S (2005)

Faculty of Dentistry

Ain-Shams University

2015

SUPERVISORS

Prof. Dr. Gehan Farouk.

Professor of Fixed Prosthodontics

Faculty of Dentistry, Ain Shams University

Dr.Tarek Salah Morsi

Assistant Professor of Fixed Prosthodontics

Head of Crown and Bridge Department

Faculty of Dentistry, Ain Shams University

Prof.Dr.MostafaIbrahimMostafa

Professor of Oro-dental genetics

Oro-dental genetics department

National Research Center (NRC)

DEDICATION

To my beloved Dad ...

I am happy to achieve one of your dreams

To my great Mum ...

Thank you for your support

& great care

To my beloved Husband ...

The best one ever, my first love

From you I get my strength and belief

Thank you for everything

To my angel Malak & my hero Omar

To my sister Soha and my brothers Ehab and Osama my
soul mates for their patience, help and encouragement

ACKNOWLEDGMENT

To my professor ***Dr. Tarek Salah Morsi.*** Professor and Head of Crown and Bridge Department, Faculty of Dentistry, Ain-Shams University, thank you for your support, patience, encouragement and precious experience in guiding and teaching me. You are a great professor and a wonderful person. Words cannot explain my deep gratitude and respect to you.

I would like to express my deepest gratitude to ***Prof.Dr. Gihan FaroukYounis,*** Professor of Fixed Prosthodontics, Ain Shams University, for her meticulous advice and valuable comment.

To my professor ***Dr. Mostafa Ibrahim Mostafa,*** Professor of Oro-Dental Genetics, National Research Centre, this work would not have been possible without your support and encouragement. Thank you for always being there when I needed you.

To ***Dr. Safinaz El-toukhy,*** Assistant Professor of Medical Biochemistry Department, National Research Center, working with you was a privilege. I would like to record my gratitude for your advice, and guidance from the very early stage of this research and for giving me extraordinary experiences throughout the work. I am indebted to you more than you know.

I'd like to express my endless gratitude to all the staff members of Fixed Prosthodontics, Faculty of Dentistry, Ain Shams University.

I thank my professors & colleagues in Oro dental genetics department, National Research Centre, Giza, Egypt.

Finally, I'd like to thank my dear colleague **Maie Abd-Allah**, Biomaterials specialist, National Research Centre, for her great help and support.

LIST OF CONTENTS

List of Tables	III
List of Figures	VII
Introduction	1
Review of Literature	5
Statement of the Problem	47
Aim of Study	49
Materials and Methods	51
Results	77
Discussion	105
Summary	119
Conclusion	123
References	125
Arabic Summary	1

ListofTables

Table 1: Materials used in the study	51
Table 2: Technical data of sintered inCoris TZI.....	53
Table 3: Firing chart of VITA AKZENT glaze	59
Table 4 : Descriptive analysis showing number, mean, standard deviation and standard error of each group of damaged DNA cells per 100 cells.....	78
Table 5: Analysis of variance (ANOVA) of number of damaged DNA cells per 100 cells	79
Table 6: Mean standard deviation values and significance of DNA damage in aged subgroups and nonaged subgroups compared to negative control group using Dunnett test *......	80
Table 7: Descriptive analysis of number of damaged DNA cells per 100 cells	82
Table 8: Analysis of variance (ANOVA) of number of damaged DNA cells per 100 cells	83
Table 9: Mean, standard deviation values and significance of DNA damage in aged group and non aged group compared to negative control group using Dunnett test.....	83

Table 10: Descriptive analysis of number of damaged DNA cells per 100 cells	85
Table 11: Analysis of variance (ANOVA) of number of damaged DNA cells per 100 cells	86
Table 12: mean, standard deviation values and significance of DNA damage in of non-aged non-glazed,non-aged glazed,aged non-glazed and aged glazed sub groups using Bonferroni test	86
Table 13: mean, standard deviation values and significance of DNA damage in mean of non aged group with mean of aged group using Independent Samples t-Test	87
Table 14: mean, standard deviation values and significance of DNA damage in mean of non-aged non-glazed with non-aged glazed using Independent Samples t-Test.	88
Table 15: Independent Samples t-Test.....	89
Table 16: Wt% and At% of elemental composition of blank zirconia disc.....	99
Table 17: Wt% and At% of elemental composition of glazed blank Zirconia disc.	100
Table 18: Wt% and At% of elemental composition of non-glazed non-aged zirconia disc.	101

Table 19: Wt% and At% of elemental composition of non- aged glazed zirconia disc.....	102
Table 20: Wt% and At% of elemental composition of non- glazed aged zirconia disc.....	103
Table 21: Wt% and At% of elemental composition of glazed aged zirconia disc.	104

List of Figures

Figure 1: Schematic diagram for probable path of biological side effects of dental materials.....	17
Figure 2: Structure of DNA	32
Figure 3: Chromosome structure	35
Figure 4 : Reciprocal translocation with exchange of segments between non homologous chromosomes.	38
Figure 5: Robertsonian translocation between two acrocentric chromosomes	38
Figure 6: Formation of a terminal deletion by a single break with loss of terminal segment	39
Figure 7: Formation of an interstitial deletion by two breaks in the same arm, loss of the interstitial segment, and reunion of the two remaining segments.....	39
Figure 8: Formation of ring chromosome by break in each arm, loss of the terminal segments and union of the centric segment	40
Figure 9: Direct duplication (a) Inverted duplication (b).	40
Figure 10: Pericentric inversion (a), Paracentric inversion (b).....	41
Figure 11: Isochromosome	42
