

Faculty of commerce

Economics department

PhD Thesis on

**The impact of the fluctuations in global
markets for agricultural crops on the
future of food security in Arab countries**

(An econometric study)

Submitted by

Sarah Hassan Mohammed Serag

Under Supervision of

Prof. Ali Lotfy

Professor of Economics

Faculty of commerce at Ain Shams University

Former prime minister

Dr. Eman Hashem

Lecturer of Economics

Faculty of commerce at Ain Shams University

2015

Acknowledgements

I would like to thank Prof. Ali Lotfy, who was more than a teacher and a father to me and he was always there when I needed any help while preparing this study. For my whole life I will not forget his generosity and kindness. And these words are not enough for admitting what I learned from him.

I would also like to thank Prof. Farag Ezzat, Prof. Ehab Nadim, and Prof. Amr el Taky for their valuable comments that contributed to the enhancement of this study.

In addition, thanks to Dr. Eman Hashem, this work was improved. As she helped when I needed help most and gave me the chance to fulfill my potential.

I would also like to thank Miss Amira Elserafy, Instructor of English language at the American University in Cairo for revising the English writing.

Finally, I would like to say that I owe this work and success to my dear husband whose support has made me a stronger person and I will forever be grateful.

*To my Mother, father,
husband and daughter*

Table of contents

	Page no.
I. Introduction	I
II. Research problem	III
III. Literature review	III
IV. Research Hypotheses	IV
V. Research objective	IV
VI. Research Methodology	V
VII. Research importance	V
VIII. The scope of the study	V
IX. Research plan	VI
<u>Part One: An overview of the fluctuations in global markets of agricultural food crops</u>	1
<u>Chapter one: An Overview of global markets of main agricultural food crops</u>	2
I. An overview of major agricultural food crops	3
II. The importance of cereals as a major food group	5
1. <u>Wheat:</u>	7
A. World production and consumption of wheat	7
B. Major importers and exporters of wheat	9
2. <u>Rice:</u>	15
A. World production and consumption of rice	15
B. Major importers and exporters of rice	17
3. <u>Maize:</u>	19
A. World production and consumption of maize	19
B. Major importers and exporters of maize	21
III. The state of changes in international food prices	26
IV. How are the prices of agricultural food commodities determined?	30
<u>Chapter two: Main reasons behind the fluctuations in the international prices of major agricultural food crops</u>	34
I. Factors that affect the trend of global agricultural crops prices	35

Table of contents cont.

	Page no.
1. Factors that affect the supply side:	35
A. Effects of climate change	35
B. Concentration of world food exports in few areas	39
C. Export restrictions of major food commodities	40
2. Factors that affect the demand side:	43
A. Increasing the demand of biofuels' feedstocks	43
B. Aggressive food imports	48
3. Other factors that affect volatility in the international prices of agricultural food crops:	50
A. Impact of futures trading	50
B. Lack of information on world food market	53
C. The role of emerging countries	54
D. Decline in world food reserves	60
II. Role of crude oil and fertilizers	63
Summary of part one	65
<u>Part Two: Agriculture and food security in Arab countries</u>	66
<u>Chapter One: Main agricultural characteristics of the Arab region</u>	67
I. An overview of agriculture in the Arab region	68
II. Agricultural natural resources in Arab countries:	69
1. Agricultural Land	69
2. Water Resources	73
III. The role of human resources in Arab agricultural sector	86
IV. Investments and governmental expenditures in Arab agricultural sector	88
V. The role of R and D in Arab agricultural sector	93

Table of contents cont.

	Page no.
VI. The impact of climate change	96
<u>Chapter Two: The problem of food security in Arab countries</u>	100
I. An overview of Arab's food consumption of each food group	101
II. Different indicators of food security in Arab countries	104
1. Definition of food security	104
2. FAO Indicators of food security in the Arab region	105
A. Indicators that measure the availability of food:	105
• Average dietary energy supply adequacy	105
• Share of dietary energy supply derived from cereals, roots and tubers	107
B. Indicators that measure the access of food:	109
• The prevalence of undernourishment	109
• The prevalence of food inadequacy	110
C. Indicators that measure the utilization of food:	112
• Percentage of population with access to improved water resources	112
• Percentage of population with access to sanitation facilities	114
D. Indicators that measure the stability of food:	116
• Cereal import dependency ratio	116
• Value of food imports in total merchandise exports	118
3. Self-sufficiency ratio (SSR) as an indicator of food security in Arab countries	120
III. Evaluating food security in Arab countries based on food security indicators	122

Table of contents cont.

	Page no.
IV. Share of each food group in the food gap of Arab countries	124
V. Factors that contribute to the problem of food security in Arab countries	126
1. Problems of the agricultural sector in Arab countries	126
2. Increasing growth in the number of Arab population	126
Summary of part two	129
<u>Part three: The impact of international food price transmission on food security in Arab countries and suggested policies to face their fluctuations</u>	130
<u>Chapter One: Measuring the impact of the transmission of international prices of agricultural food crops on food security in Arab countries</u>	131
I. Definition of food price transmission	132
II. Methods of measuring food price transmission	134
III. The econometric method of measuring food price transmission	134
1. Specifications of the models	134
A. Variables of the models	134
B. Signs and magnitudes of the parameters	135
C. Mathematical form of the models	136
2. Estimation of the models	139
A. Gathering data for the estimation of the model	139
B. Examination of the identification conditions of the functions	141
C. Choice of the appropriate econometric technique	142
D. Evaluation of estimates	142
IV. Discussion of the results	143
1. Results of model one	143
2. Results of model two	144

Table of contents cont.

	Page no.
3. Analysis of the results	144
V. The impact of food price transmission on the future of food security in Arab countries	162
Chapter Two: Suggested policies to face the fluctuations in the international prices of agricultural food crops	165
I. Arab's dependency on cereals and the fiscal ability to face the fluctuations in the international prices of food	166
II. Policies that help in coping with the fluctuations in the international prices of food	169
1. Policies adopted by the international community to face the fluctuations in the international prices of food	169
2. Policies adopted by Arab countries to face volatility in the international prices of cereals	172
III. Agricultural policies that should be adopted to decrease Arab's dependency on imports	176
1. Management of natural resources policies	177
A. Management of Agricultural land	177
B. Management of water resources	178
2. Rural development and poverty reduction policies	180
3. Policies of agricultural investment and finance	181
4. Policies of marketing and foreign trade in the agricultural sector	183
5. Policies of strategic reserves of staple crops	184
6. Farmers support policies	188
7. R and D policies	189
8. Policies of facing the climate change phenomenon	189
9. Enhancing the role of labor force in the agricultural sector	190
Summary of part three	192
Results and recommendations	194
References	199
