

Evaluation of antitumor activity of zinc selenite nano particles compared with ionic liquid in tumor-bearing animal

A thesis

Submitted for the degree of Master of Science as a partial fulfillment
for requirements of the Master of Science

Submitted by

Islam Mamdouh Younis El-Diasty

B.Sc. in Chemistry/Biochemistry (2009) - Mansoura University

To

**Faculty of Science
Ain Shams University
Department of Biochemistry**

Under the Supervision of

Prof. Dr. Eman I. Kandil

Professor of Biochemistry - Biochemistry Department
Faculty of Science
Ain Shams University

Prof. Dr. AbdelFattah M. Badawi

Professor of Applied Surfactant Chemistry
Egyptian Petroleum Research Institute
Scientific Consultant for Science & Technology Center of Excellence

Prof. Dr. Somaya Z. Mansour

Professor of Biochemistry
National Center for Radiation Research and Technology
Atomic Energy Authority
(2016)

Evaluation of antitumor activity of zinc selenite nano particles compared with ionic liquid in tumor-bearing animal

A thesis

*Submitted for the degree of Master of Science as a partial fulfillment
for requirements of the Master of Science
in biochemistry*

Submitted by

Declaration

I declare that this thesis has been composed by myself and that the work which is recorded here in after has been done by myself. It has not been submitted for a degree at this or any other university.

Islam Younis

Dedication

*I dedicate this work with all my love to my family
and for all my friends and those from whom I have
learned, whenever and wherever they are.*

Isalm Younis

Acknowledgment

الْحَمْدُ لِلَّهِ رَبِّ الْعَالَمِينَ

Praise is to Allah, the lord of all creatures who taught man the whole science and the names of all things.

This thesis is prepared to fulfill the requirement in the Master of Science degree in the Faculty of Science in Ain Shams University. The thesis work was carried out during the period from 2012 to 2016.

This Master would never have been completed without the efforts of several people who really I appreciate their instructive support.

*I am greatly indebted to **Prof. Dr. Eman I. Kandil**, Professor of Biochemistry, Department of Biochemistry, Faculty of Science, Ain Shams University, Egypt and my supervisor for giving me the opportunity to perform this work under excellent working atmosphere, her encouragement, patience and interest that she showed in my work during the study period.*

*Special thanks are extended to **Prof. Dr. Somaya Z. Mansour**, Professor of Biochemistry, National Center for Radiation Research and Technology (NCRRT), Atomic Energy Authority, Egypt for her participation in this study, her encouragement and her great support during my practical work. I closely worked with her throughout the all stages of this study and I found in her a decent, kind and a greatly respective person. I would like to thank her very much for her guide during the practical work.*

*My special thanks are due to **Prof. Dr. AbdelFattah M. Badawi**, Professor of Applied Surfactant Chemistry, Egyptian Petroleum Research Institute, Egypt for his kind supervision, moral support, instructive guidance and kind advice. Furthermore, I would like to thank him for introducing me to the topic, preparing and providing the compounds used in this study as well for the support all on the way.*

Great thanks to **Prof. Dr. Adel M. Baker**, Professor of Pathology, Department of Pathology, Faculty of Veterinary Medicine, Cairo university, Egypt for his effort and assistance with histopathological studies.

I am grateful to all my colleagues at Radiation Biology Department, National Center for Radiation Research and Technology (NCRRT), especially my colleagues at the units of Physiological Chemistry and Cell Biology, for providing a good working environment, working assistance whenever necessary, and for sharing their scientific knowledge.

I would like to thank my family for their support and encouragement which enabled this work to be completed, may Allah reward them all.

Islam Younis

List of abbreviations

BHK-21	baby hamster kidney
ZnSeO₃-NPs	Zinc selenite Nano particles
BUN	Blood urea nitrogen
CAT	Catalase
CEA	Carcinoembryonic antigen
CTLs	Cytotoxic T-lymphocytes
DEN	Diethylnitrosamine
DISC	Death-inducing signaling complex
DNA	Deoxyribonucleic acid
DPTA	Diethylene triamine Penta acetic acid
DTNB	5,5`dithino-bis-(2-nitrobenzoic acid)
ECM	Extracellular matrix
EDTA	Ethylene di amine tetra acetic acid
FAD	Flavin adenine dinucleotide
FADD	FAS-associated death domain
FASL	FAS Ligand
Fe-NTA	Ferric-nitrilotriacetate
GPx	Glutathione peroxidase
GSH	Reduced glutathione
HE	Hematoxylin eosin stain
HSe⁻	Selenide
IC₅₀	The half maximal inhibitory concentration
ICAD	Inhibitor of Caspase Activated DNase
Ils	Ionic liquids
LD₅₀	Median lethal dose
LDH	Lactate dehydrogenase
LPx	Lipid peroxidation
MDA	Malonadi-aldehyde
NAD⁺	Nicotinamide adenine dinucleotide
NADH	Reduced form of NAD ⁺
NADP⁺	Nicotinamide adenine dinucleotide phosphate

NBT	Nitro blue tetrazolium
NP	Nano particles
NTA	Nitrilotriacetate
p53	Tumor protein 53
RCC	Renal cell carcinoma
RNA	Ribonucleic acid
RNS	Reactive nitrogen species
ROS	Reactive oxygen species
Se	Selenium
SeCys	Seleno-cysteine
SeM	Seleno-methionine
SeMet	Seleno-methionine
SeO₂	Selenium di oxide
SeO₃⁻²	Selenite
SOD	Superoxide dismutase
TBA	Thiobarbituric acid
TCA	Trichloroacetic acid
TEM	Transmission electron microscopy
TRADD	TNFR-associated death domain
TRAF-2	TNFR-associated factor-2
VACSERA	The holding company for biological products and vaccines
VEGF-A	Vascular endothelial growth factor-A
