Microbiology Department

## **Studies on Marine Fungi in Egypt: Isolation, Identification and Production of Antimicrobial Agents**

### **A Thesis**

Submitted to the Department of Microbiology, Faculty of Science, Ain  
Shams University  
In Partial Fulfillment for the award of M.Sc. Degree

### **Submitted by**

**Noura Abd El- Salam Mohamed Rashad El-Far**

Demonstrator, Microbiology Department, Faculty of Science, Ain Shams  
University  
B.Sc. Microbiology (2010)

### **Supervisors**

**Dr. Al-Zahraa Ahmed Karam El-din**

Professor of Mycology and Medical Mycology, Microbiology Department,  
Faculty of Science, Ain Shams University

**Dr. Yousseria Mohamed Hassan Shetaia**

Professor of Microbiology (Mycology), Microbiology Department, Faculty  
of Science, Ain Shams University

**Dr. Dalia Ali Mahmoud Abdou**

Lecturer, Microbiology Department, Faculty of Science, Ain Shams  
University

**(2016)**

**A Thesis**

Submitted to the Department of Microbiology, Faculty of Science, Ain  
Shams University

In Partial Fulfillment for the award of M.Sc. Degree

**Studies on Marine Fungi in Egypt: Isolation, Identification  
and Production of Antimicrobial Agents**

**Submitted by**

Noura Abd El- Salam Mohamed Rashad El-Far

**Approved**

**By: Examination Committee**

**Prof. Salama Abo Al-Yazeid Ouf**

Professor of Microbiology, Botany and Microbiology  
Department, Faculty of Science, Cairo University

.....

**Prof. Mohamed Abd El- Razik Mohamed Soliman**

Professor of Medical Microbiology. Department of Botany (Microbiology  
branch), Faculty of Science, Suez Canal University

.....

**Prof. Al-Zahraa Ahmed Karam El-din**

Professor of Mycology and Medical Mycology  
Microbiology Department, Faculty of Science,  
Ain Shams University

.....

**Prof. Yousseria Mohamed Hassan Shetaia**

Professor of Microbiology (Mycology), Microbiology Department,  
Faculty of Science, Ain Shams University

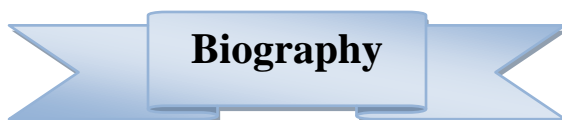

.....

Approved Faculty of Council

Approved University

## Biography

**Name:** Noura Abd El-Salam Mohamed Rashad

**Degree Award:** B.Sc. (Microbiology).

**Department:** Microbiology.

**Faculty:** Science.

**University:** Ain Shams University.

**Date of Graduation:** June 2010.

**Occupation:** Demonstrator, Department of  
Microbiology, Faculty of Science,  
Ain Shams University.

**Date of Appointment:** April, 2011.

**Date of Registration:** January, 2012.

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

سورة النحل

١٨

وَأِنْ تَعُدُّوا نِعْمَةَ اللَّهِ لَا تُحْصُوهَا إِنَّ اللَّهَ لَغَفُورٌ رَحِيمٌ

"And if you would count the graces of Allah, you would never be able to count them. Truly, Allah is Forgiving, Most Merciful".

صَدَقَ اللَّهُ الْعَظِيمُ

## *Dedication*

*I would like to dedicate this thesis work to  
my beloved parents, sister and brother, to  
my father and mother in law and to my  
helpful husband and lovely daughter  
Mariam whom without their  
encouragement and help I wouldn't  
have achieved anything.*

## Acknowledgments

*First of all*, thanks to “**ALLAH**” to whom I relate any success in achieving any work in my life.

To my **Dear Dr. Al-Zahraa Karam Al- Din**; Professor of Mycology and Medical Mycology, Microbiology Department, Faculty of Science, Ain Shams University; thank you for everything I have learned from you, for your kindness, for your invaluable advices and continuous encouragment which made this work possible and for your precious guidance during the progression of this work.

My deep thanks and everlasting gratitude goes to **Dr. Yousseria Mohamed Hassan Shetaia**; Professor of Microbiology (Mycology), Microbiology Department, Faculty of Science, Ain Shams University for her help, her patience and her encouragement and all facilities offered during the investigation, the preparation of this manuscript and completion of this study.

Special thanks to **Dr. Dalia Ali Mahmoud Abdou**, Lecturer of Microbiology, Microbiology Department, Faculty of Science, Ain Shams University for her encouragement, her moral support and for the offered facilities to accomplish this work.

I would like to express my deep thanks to **Dr. Wael Abou El-Magd**; Professor of Organic Cbhemistry, Chemistry Department, Faculty of Science, Ain Shams University for his vast knowledge and experience, his valuable directions and advices and for his facilities offered to accomplish the chemistry part in this thesis work.

Deep thanks and appreciations to **Dr. Abdel Haleem Saad** (Professor at Zoology Department) for helping us with the “LaMotte Water Sampler” and **Dr. Iman El- Kholy** for her kind supply with some of the pathogenic test strains.

I would like to thank the head of Microbiology Department; all the staff members and my colleagues in the department. Special thanks to my close friends in Microbiology Department; **Noha** and **Nadia** for their continuous support and advices.

**Finally**, I would like to thank **Eslam Mohamed Hosney**; Assistant Lecturer, Entomology Department, Faculty of Science, Ain Shams University for his help in Statistical part of this thesis work.

- Identification of the most potent marine- derived fungal isolate by molecular techniques.....	52
<b>• Optimization of some factors affecting the antimicrobial activity of the selected marine- derived fungal isolate.....</b>	<b>53</b>
1. Effect of culture media.....	54
2. Effect of incubation period .....	54
3. Effect of incubation temperature.....	54
4. Effect of pH .....	55
5. Effect of agitation speed .....	55
6. Antimicrobial activity of the selected marine-derived fungal isolate under the optimized conditions.....	55
7. Statistical analysis.....	56
<b>• Extraction and chemical identification of the antimicrobial metabolites from the selected marine- derived fungal isolate.....</b>	<b>56</b>
<b>1. Extraction of Antimicrobial metabolites.....</b>	<b>56</b>
- Preparation of fungal broth culture.....	56
- Extraction process.....	57
- Assessment of antimicrobial activity.....	57
<b>2. Chemical identification of the extracted antimicrobial metabolites.....</b>	<b>58</b>
- Culture preparation of the selected marine- derived fungal isolate.....	58

- Purification of the extracted organic mixture .....	59
○ Analytical thin layer chromatography (TLC).....	59
- Spectroscopic techniques for identification of the extracted antimicrobial metabolites.....	59
1. Fourier transform infrared resonance spectroscopy (FTIR).....	60
2. Nuclear magnetic resonance (NMR).....	60
3. Mass spectrometry (MS).....	60
- Assessment of antimicrobial activity of the separated compounds.....	61
● <b>Evaluation of cytotoxicity of the extracted antimicrobial metabolites against WI-38 cell line.....</b>	61
1- Cell line Propagation.....	61
2- Evaluation of cytotoxicity using viability assay.....	62
<b>V- RESULTS.....</b>	64
● <b>Isolation of marine- derived fungi.....</b>	64
● <b>Screening of the antimicrobial activity of marine- derived fungal isolates.....</b>	65
● <b>Identification of marine- derived fungal isolates.....</b>	68
- Identification of the active marine- derived fungal isolates.....	68
- Identification of the most potent marine- derived fungal isolate by molecular techniques.....	68

● Optimization of some factors affecting the antibacterial activity of <i>Aspergillus welwitschiae</i> .....	72
1. Effect of culture media.....	72
2. Effect of incubation period.....	76
3. Effect of incubation temperature.....	80
4. Effect of pH.....	84
5. Effect of agitation speed .....	88
6. Antibacterial activity of <i>Aspergillus welwitschiae</i> under the optimized conditions.....	92
● Extraction and chemical identification of the antibacterial metabolites from <i>Aspergillus welwitschiae</i> .....	94
1. Extraction and antibacterial activity assay of the extracted metabolites.....	94
2. Chemical identification of the extracted antibacterial metabolites.....	96
- Purification of the extracted organic mixture.....	96
Analytical thin layer chromatography (TLC).....	96
- Elucidation of the structure of antibacterial metabolites via spectroscopic analysis.....	97
● Evaluation of cytotoxicity against WI-38 cell line.....	105
