ACKNOWLEDGMENT

The author is honored to conduct his research under the supervision of distinguished supervisors. He is greatly indebted to Dr. Ahmed Amr Darrag, Professor of Soil Mechanics and Foundations Engineering, Cairo University, for his encouragement, sincere support, and supervision. The author also expresses his deep gratitude to Dr. Nabil Ismael, Professor of Soil Mechanics and Foundations Engineering, Kuwait University, for their continuous guidance, valuable discussions, and cooperation throughout the course of this research.

Sincere appreciation is also expressed to Dr. Ashraf Kamal Hussein, Associate Professor of Soil Mechanics and Foundations Engineering, Cairo University, for his valuable discussions, support and cooperation during the conduction of this work.
