ACKNOWLEDGMENT

I wish to express my everlasting gratitude to Prof Dr. **Taref Hamza Salam** Professor of clinical pathology Faculty of Medicine Ain Shams University. For giving me the privilege of working under his supervision as well as his kind attitudes and moral supports. No words of appreciation are sufficient for his generous cooperation, his revision of all details of laboratory work.

I am deeply grateful and appreciative to **Dr. Khaled Hussein Taman** Ass. Prof. of Pediatrics, Institute of postgraduate childhood studies Ain Shams University. His valuable advice, supervision, constant support and encouragement, revision of all details and discussion of all results that made this work possible.

CONTENTS

INTRODUCTION.....	1
HYPOTHESIS AND AIM OF THE WORK.....	1
REVIEW OF LITERATURE.....	2
Obesity.....	2
Lipid profile.....	19
Atherosclerosis.....	24
SUBJECTS AND METHODS.....	33
Subjects	33
Methods.....	35
Assessment of total cholesterol.....	35
Assessment of HDL.....	37
Assessment of LDL.....	38
Assessment of VLDL.....	39
Assessment of triglycerides.....	40
Calculation of atherosclerosis index.....	41
Statistical analysis.....	41
RESULTS.....	42
DISCUSSION AND CONCLUSION.....	83
RECOMMENDATIONS.....	91

ARABIC SUMMARY.....	

List of Tables

Table No.	Page
1 Statistical relation between sex and anthropometric measures in obese children.....	42
2 Statistical relation between sex and lipid profile in obese children.....	42
3 Statistical correlation between weight and lipid profile in obese children.....	43
4 Statistical correlation between Height and lipid profile in obese children.....	44
5 Statistical correlation between BMI and lipid profile in obese children.....	44
6 Statistical relation between sex and blood pressure in obese children.....	45
7 Statistical correlation between systolic blood pressure and lipid profile in obese children.....	45
8 Statistical correlation between diastolic blood pressure and lipid profile in obese children.....	46
9 Statistical relation between family history of obesity and blood pressure in obese children.....	47
10 Statistical relation between family history of obesity and anthropometric measurements in obese children.	49
11 Statistical relation between family history of obesity and lipid profile in obese children.....	50
12 Statistical relation between family history of D.M. and lipid profile in obese children.....	51
13 Statistical relation between family history of coronary artery disease and lipid profile in obese children.....	52

14	Statistical relation between family history of blood pressure and lipid profile in obese children.....	53
15	Statistical relation between qualitative fat intake and blood pressure in obese children.....	54
16	Statistical relation between qualitative fat intake and anthropometric measures in obese children.....	55
17	Statistical relation between qualitative fat intake and lipid profile in obese children.....	56
18	Statistical relation between qualitative carbohydrate intake and blood pressure in obese children.....	57
19	Statistical relation between qualitative carbohydrate intake and anthropometric measures in obese children.....	59
20	Statistical relation between qualitative carbohydrate intake and lipid profile in obese children.....	60
21	Statistical relation between qualitative protein intake and blood pressure in obese children.....	61
22	Relation between protein intake and anthropometric measures in obese children.....	62
23	Statistical relation between qualitative protein intake and lipid profile in obese children.....	63
24	Statistical relation between qualitative snacks intake and blood pressure in obese children.....	64
25	Statistical relation between qualitative snacks intake and anthropometric measures in obese children.....	65
26	Statistical relation between qualitative snacks intake and lipid profile in obese children.....	66
27	Statistical relation between physical activity and blood pressure in obese children.....	67
28	Statistical relation between physical activity and	

	anthropometric measures in obese children.....	67
29	Statistical relation between physical activity and lipid profile in obese children.....	68
30	Statistical relation between T.V watching hours and blood pressure in obese children.....	69
31	Statistical relation between T.V watching hours and anthropometric measures in obese children.....	70
32	Statistical relation between T.V watching hours and lipid profile in obese children.....	71
33	Statistical relation between age and blood pressure in obese children.....	72
34	Statistical relation between age and anthropometric measures in obese children.....	72
35	Statistical relation between age and lipid profile in obese children.....	74
36	Statistical relation between age and blood pressure in obese males.....	74
37	Statistical relation between age and blood pressure in obese females.....	75
38	Statistical relation between age and anthropometric measures in obese males.....	75
39	Statistical relation between age and anthropometric measures in obese females.....	76
40	Statistical relation between age and lipid profile in obese males.....	76
41	Statistical relation between age and lipid profile in obese females.....	77
42	Percentage of atherosclerosis risk according to the age.....	77
43	Effect of risk factors on atherosclerosis index	78

44	Effect of the risk factors on BMI.....	79
45	Comparison of anthropometric measures between study and control groups.....	80
