Praise be to Allah, the cherisher and the sustainer of the world.

I wish to express my deep gratitude to **Prof. Dr. Mostafa Mohamed Hassan Khalil**, Prof. of Inorganic chemistry, Department of Chemistry, Faculty of Science, Ain Shams University, for his scientific supervision, valuable advice, planning of study, fruitful discussion, valuable assistance and continuous encouragement, critical comments and objective criticism during all stage of the work, his help will always be remembered and not forgotten.

I wish deeply grateful to **Asso. Prof. Osama Amin Desouky**, Assoc. Prof. of Inorganic Chemistry, Higher Institute of Engineering, Bilbis, Sharqia, for his supervision, active support, guidance, valuable advice and encouragement during entire course of this study.

Also I would like to record gratitude to **Dr. Abd-Elnabi Mohamed Salem**, Lecturer of inorganic chemistry, Department of Chemistry, Faculty of Science, Ain Shams University, for his supervision.

Thanks and gratitude to all the members of Department of chemistry, Faculty of Science, Ain Shams University, for the help, encouragement and facilities offered to the author through the entire course of this work.

AIM OF THE WORK

Ain Shams University
Faculty of Science
Department of Chemistry

Preparation and Characterization of Some Semiconductors from Transition Metal Oxides

A Thesis Submitted in Partial Fulfillment of the Requirements for the degree of Ph.D of Science in Inorganic Chemistry

Presented by

Hamdi Abd El-Karim Khatab Ali

Supervised by

Prof. Dr. Mostafa Mohamed Hassan Khalil

Prof. of Inorganic chemistry, Department of Chemistry, Faculty of Science, Ain Shams University

Asso. Prof. Osama Amin Desouky

Asso. Prof. of Inorganic Chemistry, Higher Institute of Engineering, Bilbis, Sharqia

Dr. Abd-Elnabi Mohamed Salem

Lecturer of inorganic chemistry, Department of Chemistry, Faculty of Science, Ain Shams University

2016

Title of the (Ph.D) Thesis: Preparation and Characterization of
Some Semiconductors from Transition Metal Oxides

Name of the candidate: Hamdi Abd El–Karim Khatab Ali

Thesis advisors

Prof. Dr. Mostafa Mohamed Hassan Khalil

Prof. of Inorganic chemistry, Department of Chemistry, Faculty of
Science, Ain Shams University

Asso. Prof. Osama Amin Desouky

Asso. Prof. of Inorganic Chemistry, Higher Institute of Engineering,
Bilbis, Sharqia

Dr. Abd-Elnabi Mohamed Salem

Lecturer of inorganic chemistry, Department of Chemistry, Faculty of
Science, Ain Shams University

Head of chemistry department

Prof. Dr. Ibrahim H.A. Badr

Contents

	Page
Introduction.....	1
1.1 Semiconductor Materials.....	1
1.2 Properties and types of semiconductors.....	3
1.2.1 Pure or intrinsic semiconductors.....	3
1.2.2 Extrinsic semiconductors.....	4
1.2.3 Doping.....	4
1.3 Difference between semiconductors and Insulator.....	6
1.4 Effect of dopants on properties of the semiconductors.....	8
1.5 Difference between organic and inorganic semiconductors.....	10
1.6 Properties of electronic materials.....	11
1.7 Electrical conductivity and resistivity.....	13
1.8 Application of the semiconductors.....	16
1.9 Transition metal oxides.....	17
1.9.1 Zinc Oxide.....	18
1.9.2 Nickel Oxide.....	20
1.9.3 Silicon dioxide.....	22
1.9.4 Zirconium Oxide.....	23
1.9.5 Tin dioxide.....	24
1.9.6 Chromium Oxide.....	25
1.9.7 Niobium pentaoxide.....	25
1.9.8 Cobalt oxide.....	27
1.10 Literature review of transition metal oxide semiconductors.....	28
1.11.1 Nanotechnology.....	39
1.11.2 Methods of preparation of nanomaterials from oxide.....	40
Aim of the work.....	44

Materials and Methods.....	45
2.1 Raw materials.....	45
2.2 Mix composition.....	46
2.3 Processing.....	48
2.4 Method of testing.....	49
2.4.1 Physical Properties.....	49
2.4.1.1 Determination of firing Shrinkage.....	49
2.4.1.2 Determination of Bulk density, water absorption and Apparent Porosity	49
2.4.2 XRD analysis (X-ray diffraction analysis).....	50
2.4.3 Electric Properties (RCL Circuit).....	51
2.4.4 Differential thermal analysis (DTA) and thermogravimetric (TG).....	52
2.4.5 Microstructure.....	53
Results and Discussion.....	54
3.1 Results of physical properties of different groups.....	54
3.2 Results of x-ray diffraction (XRD).....	65
3.3 Results of Differential Thermal Analysis (DTA).....	111
3.4 Results of Thermogravimetric Analysis (TG).....	116
3.5 Results of Microstructure.....	120
3.6 Dielectric properties.....	208
3.6.1 Results of Dielectric properties with frequency.....	209

3.6.2 Results of dielectric loss as a function of frequency.....	219
3.6.3 Results of resistivity as a function of frequency.....	227
3.6.4 Results of conductivity as a function of frequency.....	234
Conclusion.....	241
Reference.....	252
Arabic summary.....
