CHARGE TRANSFER COMPLEXES OF SOME
AZOLES AND AZINES WITH ELECTRON ACCEPTORS

A Thesis

Presented to the Faculty of Science,
Assiut University as Partial Fulfillment
for the Master Degree of
Science
(Chemistry)

By

Shawkat Mohammed Bayoumi
B. Sc. (Chemistry)

Supervised By

Prof. Dr. M. R. Mahmoud
Prof. of Physical and Inorganic
Chemistry & President of
Assiut University

Prof. Dr. M. M. A. Hamed
Prof. of Physical Chemistry

Chemistry Department
Faculty of Science
Assiut University

2002

25719

APPROVAL SHEET

Name: *Shawkat Mohammed Bayoumi*

Thesis Title: *Charge Transfer Complexes of some Azoles
and Azines with Electron Acceptors*

Degree: Master Degree of Science

Courses Attended:

- 1) Advanced Electrochemistry.
- 2) Advanced Inorganic Chemistry.
- 3) Molecular Spectroscopy.
- 4) Advanced Analytical Chemistry.
- 5) Special Course.
- 6) Computer Science.
- 7) Experimental Course.

Supervisors:

Prof. Dr. M. R. Mahmoud
Prof. of Physical and
Inorganic Chemistry
& President of Assiut
University

Prof. Dr. M. M. A. Hamed
Prof. of Physical Chemistry

Examination Committee:

External:.....

.....

Internal:.....

Prof. Maher Hamed

Maher Hamed

Prof. Dr. M. T. Ismail

M. T. Ismail

Vice-Dean for Graduate studies
and Research

21/5 / 2002

CONTENTS

CHAPTER I INTRODUCTION

General consideration	1
Literature Survey on Charge-Transfer Complexes of Azoles	
i- Pyrazoles	9
ii- Oxazoles	18
Literature Survey on Charge-Transfer Complexes of Triazines (Azines)	25
Literature Survey on the Solvent Effect on Charge-Transfer Complexes	29
Literature Survey on Infrared Spectra of Charge-Transfer Complexes and other Techniques	36
Literature Survey on the Evolution of Charge-Transfer Spectra with Time.....	43

Aim of the work	58
-----------------------	----

CHAPTER II

EXPERIMENTAL AND METHODS OF CALCULATION

A) Materials	
i) Electron Donor Compounds	60
ii) Electron Acceptor Compounds	62
iii) Solvents	63
B) Solutions	63
C) Preparation of the Solid Molecular Complexes	63
D) Physical Measurements	
i) Spectroscopic Measurements	
Ultraviolet and Visible Spectra	64
ii) Computations	65
E) Experimental Procedure for Determination of the Formation Constants and Molar Extinction Coefficients of the Charge-Transfer Molecular Complexes	65
F) Determination of the Stoichiometry of the Charge- Transfer Complexes	66

G) Algebra for the Various Spectrophotometric Methods Applied for the Determination of the Formation Constants and Molar Extinction Coefficients of Charge- Transfer Complexes	67
1- Benesi – Hildebrand Method	67
2- Scott Method	69
H) Calculation of Thermodynamic Parameters for Charge- Transfer Complex Formation	71

CHAPTER III

CHARGE-TRANSFER MOLECULAR COMPLEXES OF PYRAZOLES WITH σ - AND π -ELECTRON ACCEPTORS

Charge-transfer Molecular Complexes of Pyrazoles with σ -and π -Electron Acceptors	73
– Spectral Characteristics and Formation Constants (K_{CT}) of the Formed Charge-Transfer Molecular Complexes...	74
– Effect of Pyrazole Molecular Structure on the Formation Constant of its Charge-transfer Complex.....	81
– Effect of Electron Acceptor.	82
– Calculation of the Donor Ionization Potentials	84

– Thermodynamic Properties of Charge-Transfer Complexes	86
– The Effect of the Solvent Polarity on the Stability of the Formed Charge-Transfer Complexes	88

CHAPTER IV

CHARGE TRANSFER MOLECULAR COMPLEXES OF OXAZOLES AND BENZOXAZOLES WITH σ - AND π -ELECTRON ACCEPTORS

Charge-Transfer Molecular Complexes of Oxazoles and Benzoxazoles with σ - and π -Electron Acceptors	104
– Spectral Characteristics of the Formed Charge-Transfer Complexes	105
– Effect of Oxazoles and Benzoxazoles Molecular Structure on the Formation Constants of their Charge-Transfer Complexes.....	112
– Effect of Electron Acceptors	115
– Ionization Potential of the Donors	117
– Thermodynamic Properties of the CT complexes Formed	118
– Solvent Effect on the Stability of the Formed Charge- Transfer Complexes	120

CAPTER V

CHARGE-TRANSFER INTERACTION OF TRIAZINES WITH σ - AND π -ELECTRON ACCEPTORS

Charge-Transfer Interaction of Triazines with σ - and π -Electron Acceptors	138
– Electronic Spectral Characteristics of the Formed CT Complexes	139
– Formation Constants and Thermodynamic Properties of the Formed CT Complexes	146
– Effect of the Solvent Polarity on the Stability of the Formed Charge-Transfer Molecular complexes	149
 SUMMARY	165
REFERENCES	173
APPENDIXES.....	192
Appendix (A)	192
Appendix (B)	196
ARABIC SUMMARY
