Conservation department

**Study of Color Changing in Mural Paintings and Painting Layer as A
Result of Actinomycetes (Actinobacteria) Metabolism Products and
Method of Treatment and Restoration.**

Applied study on a selected tomb

Submitted by
Akmal Ali Tawfeek Sakar

A Thesis submitted for the degree of philosophy dector (Ph D)

In Conservation of Antiquities

Under Supervision

Dr. Mona Fouad Ali

Professor of Conservation

Vice Dean of the Faculty for the
Environmental Affairs, Faculty of
Archaeology, Cairo University

Dr. Mohmad Farouk Ghaly

Professor of Microbiology

Vice Dean of the Faculty for the
Environmental Affairs, Faculty of
Science, Zagazig University

Introductory Chapter

Literature Review

1.1.Taxonomy and methods of identification of actinomycetes deteriorating mural paintings	1
1.1.1. Taxonomy of actinomycetes deteriorating mural paintings	2
1.1.2. Identification methods of actinomycetes isolated from deteriorated mural Paintings	2
1.1.3. Ecology of actinomycetes deteriorating mural paintings	4
2.1. Actinomycetes and biodeterioration of mural paintings	6
2.1.1. Biochemical deterioration of mural paintings	6
2.1.2. Precipitation of minerals	6
2.1.2.1. Precipitation of calcite	6
2.1.2.2. Precipitation of barite (Barium carbonate)	8
2.1.2.3. Precipitation of hydromagnesite	8
2.1.2.4. Precipitation of iron	8
2.1.2.5. Precipitation of silicon	9
2.1.2.6. Precipitation calcium sulphate	9
2.1.3. Deterioration of binding media	10
2.1.3.1. Deterioration on arabic gum	10
2.1.3.2. Deterioration on animal glue	10
2.1.3.3. Deterioration on egg yolk	11
2.1.3.4. Deterioration on bees wax	11
2.1.3.5. Deterioration of resins	12
2.1.4. Disfiguration of paintings and stone surfaces	12
2.1.4.1. Producing melanin pigment	12
2.1.4.2. Producing carotenoid pigment	14

3.1. Biochemical deterioration	15
4.1. Enzymatic activity of actinomycetes	15
4.1. 1. Chitinase enzyme	15
4.1. 2. Collagenase enzyme	16
4.1. 3. Cellulase enzyme	16
4.1. 4. Licinase enzyme	16
4.1. 5. Estrase enzymes	17
5.1. Change of paintings by actinomycetes	17
5.1.1. Change of blue pigments by actinomycetes	17
5.1.1.1. Fading of azurite blue	18
5.1.1.2. Blackening of azurite blue	18
5.1.1.3. Transforming of azurite blue into green color	18
5.1.2. Change of red pigments by actinomycetes	18
5.1. 3. Change of black pigments by actinomycetes	19
5.1. 4. Change of yellow pigments by actinomycetes	20
5.1. 5. Change of white pigments by actinomycetes	21
5.1. 6. Change of green pigments by actinomycetes	21
6.1. Effect of actinomycetes on varnish resins	22
7.1. Acidolytic activity of actinomycetes isolated from deteriorated paintings	22
8.1. Deterioration of polymers by actinomycetes	22
9.1. Producing geosmine ordure	23
10.1. Causing healthy problems	23
11.1. Treatment of deteriorated mural paintings due to growth and colonization of actinomycetes	23
11.1.1. Methods used in eliminating actinomycetes isolated from deteriorated mural paintings	23
11.1.1.1. Effect of antibiotics on growth of actinomycetes	23
11.1.1.2. Effect of essential oils on actinomycetes	24
11.1.1.3. Effect of biocides on isolated actinomycetes	24
11.1.1.4. Using gamma irradiation in eliminating actinomycetes deteriorating mural paintings	24
11.1.1.5. Effect of DBD (dielectric barrier discharge) plasma on isolated actinomycetes	25
11.1.1.6. Beta (β) electrons	25
11.1.1.7. Biological control (Using bactericine)	25
12.1. Cleaning of microbial stains	25
12.1.1. Cleaning melanin stains	25
12.1.1.1. Mixture of organic solvents	25

12.1.1.2. Hydrogen peroxide (H ₂ O ₂)	25
12.1.1.3. Sodium thiosulphate	26
12.1.1.4. Using enzymes	26
12.1.1.5. Using atomic oxygen	26
12.1.1.6. Using EDTA	26
13.1. Cleaning of red stains	27
13.1.1. Organic solvents.....	27
13.1.2. Enzymes	27
14.1. Removal of salts	27
14.1.1. Removal of soluble salts	28
14.1.2. Removal of insoluble salts	28
14.1.2.1. Using EDTA with activator of alkaline compounds	28
14.1.2.2. Microbial methods	29
14.1.2.3. Agar Jel	30

Part I: Analysis, investigation, isolation and identification of actinomycetes

Chapter I: Analysis and investigations of mural paintings

1.1. Petrographic investigations	30
1.2. Protein and total carbohydrates assay	31
1.2.1. Protein content assay in limestone samples	31
1.2.2. Total carbohydrate content assay in limestone samples	31
1.3. Identification of pigments	34
1.3.1. Blue pigments	35
1.3.2. Black pigments	36
1.3.3. Red pigments	38
1.3.4. Yellow pigments	42
1.4. Identification of binding media	43
1.5. Conclusion	44

Chapter II: Isolation and identification of actinomycetes isolated from

mural paintings	46
2.1. Sampling method and samples locations	47
2.1.1. Samples from paintings	47
2.1.2. Stone samples	47
2.1.3. Samples from air in tombs	47

2.1. Culturing media	48
2.1.1. Actinomycetes media	48
2.1.1.1. Starch-Nitrate–agar	48
2.1.1.2. Starch-Casein medium	48
2.1.1.3. Casein-L-Asparagine agar	48
2.1.1.4. Glycerol–L-Asparagine-agar	49
2.1.1.5. Glycerol-Nitrate-Agar	49
2.2.2. Bacteria media	49
2.2.3. Fungi media	49
2.3. Identification of the isolated actinomycetes	50
2.3.1. Microscopic investigations of Spore chain morphology	50
2.3.1.1. Light Microscope	50
2.3.1.2. Transmission Electron Microscope (TEM)	50
2.3.2. Biochemical Tests	55
2.3.2.1. Hydrogen sulphide production	55
2.3.2.2. Gelatin liquefaction	55
2.3.2.3. Nitrite Reduction	55
2.3.2.4. Skim milk coagulation	55
2.3.2.5. Skim milk peptonization	55
2.3.2.6. Utilization of different carbon sources	55
2.4. Results	57
2.5. Molecular tools	62
2.5.1. DNA extraction	62
2.5.2. PCR sequencing	
2.6. Discussion	66
2.7. Conclusions	67
Part II: Deterioration Symptoms by actinomycetes	68
Chapter I: Biochemical Deterioration caused by actinomycetes	69
2.1.1. Deterioration of binding media by isolated actinomycetes	70
2.1.1.1. Introduction	70
2.1.1.2. Deterioration of animal glue by actinomycetes	70
2.1.1.3. Deterioration of bees wax	70
2.1.1.4. Biodeterioration of arabic gum	70
2.1.1.5. Biodeterioration of egg-yolk	70
2.1.1.6. Bio-Mechanical deterioration	70
2.1.1.7. Enzymatic activity of isolated actinomycetes	71

2.1.1.8. Materials and Methods	72
2.1.1.8.1 Amylase Enzyme	72
2.1.1.8.2 Collagenase Enzym	72
2.1.1.8.3 Chitinase Enzym	72
2.1.1.8.4. Celullase Enzyme	72
2.1.1.8. 5. Caseinolytic Enzyme	72
2.1.1.8.6. Licenciase enzyme	72
2.1.1.9. Deterioration of polymers by actinomycetets	73
2.1.1.9.1. Introduction	73
2.1.1.9.2. Materials and Methods	73
2.1.1.10.Results	74
2.1.1.10.1. Animal glue	74
2.1.1.10.2. Arabic gum	78
2.1.1.10.3. Egg yolk	80
2.1.1.10.4. Bees wax	80
2.1.1.10.5. Bio-Mechanical destruction	83
2.1.1.10.6. Amylase enzyme activity	86
2.1.1.10.7. Collagenase enzyme activity	87
2.1.1.10.8. Celullase enzyme activity	87
2.1.1.10.9. Chitinase enzyme activity	87
2.1.1.10.10. Casenase enzyme activity	88
2.1.1.10.11. Licesenase enzyme activity	88
2.1.1.10.12. Biodeterioration of polymers	88
2.1.1.11. Discussion	91
2.1.1.11.1 Animal glue	91
2.1.1.11.2. Arabic gum	91
2.1.1.11.3. Egg yolk	92
2.1.1.11.4. Bees wax	92
2.1.1.11.5. Bio-Mechanical deterioration	92
2.1.1.11.6. Enzymatic activity of isolated actinomycetes	93
2.1.1.11.7. Biodeterioration of polymers	94
2.1.1.12. Conclusion	95
Chapter II: Mechanical Deterioration by actinomycetes isolated from deteriorated mural paintings.....	97
2.2.1.Introduction.....	98
2.2.2. Destruction of stone surface	98
2.2.3. SEM investigation of stone support	99
2.2.4. Loss of weight	99
2.2.5. Increasing porosity of stone support	99
2.2.6. Effect of salts on growth of actinomycetes isolated from deteriorated mural paintings	100
2.2.7. Materials and Methods	100
2.2.8. Determination of amino acids	100

2.2.9. Results	101
2.2.10. Discussion	110
2.2.11. Conclusion	113
 Chapter III: Aesthical Deterioration caused by actinomycetes	114
3.2.1. Introduction	115
3.2.2. Discoloration stone support	115
3.2.3. Discoloration of paint layer by melanin pigment	115
3.2.4. Discoloration of paint layer by carotenoids pigment	115
3.2.5. Extractability of carotenoid pigment	116
3.2.6. Purification of carotenoids	116
3.2.7. Discoloration of plaster layer	116
3.2.8. Dissolving lime plaster by actinomycetes	116
3.2.9. Actinomycetes and other microorganisms	116
 3.2.10. Materials and Methods	117
2.3.10.1. Association with fungi	117
2.3.10.2. Association with yeast	117
2.3.10.3. Association with bacteria	117
2.3.10.4. Pigmentation of isolated bacteria	117
 3.2.11. Results	118
 3.2.12. Discussion	128
3.2.12.1. Melanin production	128
3.2.12.2. Carotenoid pigment production	129
3.2.12.3. Acidolytic activity of actinomycetes	131
3.2.12.4. Effect of calcium carbonate on the growth of actinomycetes	131
3.2.12.5. The relation between growth of actinomycetes and microorganisms	132
 3.2.13. Conclusion	134
 Part III: Experimental Study on the actinomycetes deteriorating mural paintings	136
 Chapter I: Experimental studies on the involvement of actinomycetes in color changes	137
 3.1. Chromatic changes of blue pigments	138
3.1.1. Introduction	138
 3.1.2. Effect of actinomycetes on blue pigments	138
3.1.2.1. Effect of actinomycetes on azurite blue ($2\text{Cu CO}_3 \cdot \text{Cu(OH)}_2$)	138
3.1.2.2. Effect of actinomycetes on Egyptian blue	138
3.1.2.3. Effect of actinomycetes on indigo day ($\text{C}_{16}\text{H}_{10} \text{N}_2\text{O}_2$)	139
3.1.2.4. Results	139

3.1.2.4.1. Azurite blue	139
3.1.2.4.2. Egyptian blue	145
3.1.2.4.3. Indigo	146
3.1.2.5. Discussion	147
3.1.2.5.1. Azurite blue	147
3.1.2.5.2. Egyptian blue	149
3.1.2.5.3. Indigo	150
3.1.3. Effect of actinomycetes on red pigments	151
3.1.3.1 Effect of actinomycetes on hematite	151
3.1.3.2. Effect of actinomycetes of vermillion	151
3.1.3.3. Effect of actinomycetes of red lead	152
3.1.3.4. Effect of actinomycetes on maddre dye	152
3.1.3.5. Results	152
3.1.3.5.1. Hematite	152
3.1.3.5.2. Vermillion	155
3.1.3.5.3. Red lead	156
3.1.3.5.4. Maddre dye	157
3.1.3.6. Discussion	157
3.1.3.6.1. Red hematite	157
3.1.3.6.2. Virmillon	159
3.1.3.6.3. Red lead	159
3.1.3.6.4. Maddre dye	159
3.1.3. Effect of actinomycetes on black pigments	160
3.1.3.1. Introduction	160
3.1.3.2. Results	161
3.1.3.3. Discussion	166
3.1.4. Effect of actinomycetes on yellow pigments	167
3.1.4.1. Effect of actinomycetes on yellow ochre	167
3.1.4.2. Effect of actinomycetes on orpiment	168
3.1.4.3 Results	169
3.1.4.3. Discussion	172
3.1.4.3.1. Yellow pigment of limonite	172
3.1.4.3.2. Yellow pigment of orpiment	172
3.1.5. Effect of actinomycetes on white pigments	173
3.1.5.1. Results	173
3.1.5.2. Discussion	175
3.1.6. Effect of actinomycetes on green pigments	176

3.1.6.1. Results	176
3.1.6.2. Discussion	178
3.1.6.3. Conclusion	179

Chapter II: Methods of decontamination actinomycetes deteriorating mural paintings and removal of microbial stains

3.2. Methods of decontamination of actinomycetes isolated from deteriorated mural paintings	180
--	-----

3.2.1. Introduction	181
----------------------------------	-----

3.2.2. Eliminating actinomycetes using organic solvents and chemical substances	181
---	-----

3.2.2.1. Eliminating actinomycetes using organic solvents	181
---	-----

3.2.2.2. Eliminating actinomycetes using thymol	181
---	-----

3.2.2.3. Eliminating actinomycetes using EDTA	181
---	-----

3.2.2.4. Eliminating of actinomycetes using different antibiotics	182
---	-----

3.2.2.5. Eliminating actinomycetes using essential oils	182
---	-----

3.2.2.5. 1. Using filter paper discs (Diffusion method)	182
---	-----

3.2.2.5.2. Fumigation method	182
------------------------------------	-----

3.2.2.6. Decontamination of actinomycetes using biocides	182
--	-----

3.2.2.7. Results	183
-------------------------------	-----

3.2.2.7.1. Using organic solvents	183
---	-----

3.2.2.7.2. Using thymol	184
-------------------------------	-----

3.2.2.7.3. Using EDTA	190
-----------------------------	-----

3.2.2.7.4. Using antibiotics	191
------------------------------------	-----

3.2.2.7.5. Using essential oils	197
---------------------------------------	-----

3.2.2.7.6. Using biocides	203
---------------------------------	-----

3.2.2.8. Discussion

3.2.2.8.1. Using organic solvents.....	204
--	-----

3.2.2.8.2. Using thymol	204
-------------------------------	-----

3.2.2.8.3. Using EDTA	204
-----------------------------	-----

3.2.2.8.4. Using antibiotics	204
------------------------------------	-----

3.2.2.8.5. Using essential oils	204
---------------------------------------	-----

3.2.2.8.6. Using biocides.....	205
--------------------------------	-----

3.2.3. Using physical methods (Gamma irradiation and DBD plasma)	207
---	-----

3.2.3.1. Decontamination of actinomycetes using gamma– irradiation	207
--	-----

3.2.3.1.1. Materials and Methods	208
---	-----

3.2.3.1.1.1. Sodium dodecylsulfate polyacrimide gel electrophoresis	
---	--

(SDS-PAGE)	209
3.2.3.1.1.2. Morphology modification and pigmentation of isolated Aactinomycetes	209
3.2.3.1.1.3. Effect of gamma irradiationon paintings	209
3.2.3.2. Decontamination of actinomycetes using DBD plasma	209
3.2.3.2. 1. Materials and Methods	209
3.2.3.2. 1.1. Determination of lethal dose	209
3.2.3.2. 1.2. Changes of the morphology	210
3.2.3.2. 3. Results	211
3.2.3.2. 4. Discussion	225
3.2.4. Biological methods	229
3.2.4.1. Materials and methods.....	229
3.2.4.2. Results	229
3.2.4.3. Discussion	229
3.2.5. Cleaning of microbial stains	
3.2.5.1. Removal of melanin pigment	230
3.2.5.2. Removal of red stains	230
3.2.5.3. Results	230
3.2.5.4. Discussion	233
3.2.5.5. Conclusions	235

Applied Study for treatment of deteriorated mural paintings within the Tomb of the King Oserkon II at Tanis

1. Historical Background	237
2. Architectural description of the tomb	238
3. Petrographic investigation	239
4. Protein content assay in limestone samples.....	240
5. Total Carbohydrate content assay in limestone samples	240
6. Plaster layers investigation	240
7. Results	
7.1. Limestone samples	241
7.2. Granite samples	241
7.3. Protein and total carbohydrates assay	241
7.4. Plaster layers	241
8. Discussion	247

9. Environmental factors	248
10. Pigments Investigations	
10.1. Materials and Methods	250
10.1.1. Polarizing microscope	250
10.1.2. SEM Investigation	250
10.1.3. FT/IR spectroscopy	250
10.2. Results	250
10.3. Discussion	256
11. Deterioration factors of mural paintings of the tomb of the King Oserkon II at Tanis	
11.1. Salts	258
11.2. Subsurface water	261
11.3. Microbial colonization	262
11.4. Manmade Deterioration	264
12. Conservation strategy	
12.1. Documentation of deterioration symptoms within the investigated tomb	266
12.2. Structural conservation	267
12.3. Removal of microbial colonization by EDTA poultice	268
12.4. Cleaning dust and mud	269
12.5. Salts removal	271
12.6. Consolidation of limestone support and paintings	273
13. Results	
13.1. SEM investigations	273
13.2. Color changes of treated stone surfaces and paintings	277
13.3. Total Porosity	277
13.4. Compressive Strength of consolidated limestone and paintings	278
13.5. Stability of polymer for light	279
13.6. Change of pH	280
13.7. Dust retention	280
14. Filling cracks and missing parts	281
15. General Conclusions	283
16. Results and Recommendations	287
