

# **PERI-OPERATIVE NUTRITION IN CRITICALLY ILL SURGICAL PATIENTS**

An Essay

Submitted in partial fulfillment for Master degree of General Surgery

*By*

**Dr. MOHAMMED ALI ZEIN EL ABEDEEN**

(M.B., B.ch.)

Ain shams University

Supervised by

**Prof. Dr. REDA ABDEL TAWWAB KHALIL**

Prof. of General Surgery

Faculty of medicine, Ain Shams University

**Prof. Dr. TAREK MOHAMMED EL BAHAR**

Prof. of General Surgery

Faculty of medicine, Ain Shams University

**Dr. MOHAMMED ALI NADA**

Prof. Assistant of General Surgery

Faculty of medicine, Ain Shams University

Faculty of medicine

## **التغذية قبل و بعد العمليات الجراحية لمرضى الحالات الحرجة**

(رسالة)

توطئة للحصول على درجة الماجستير فى الجراحة العامة

مقدمة من

**طبيب / محمد علي زين العابدين**

بكالوريوس الطب والجراحة  
جامعة عين شمس

تحت إشراف

**أ.د/ رضا عبد التواب خليل**

أستاذ الجراحة العامة  
كلية الطب - جامعة عين شمس

**أ.د/ طارق محمد البحار**

أستاذ الجراحة العامة  
كلية الطب - جامعة عين شمس

**أ.م.د/ محمد علي ندا**

أستاذ مساعد الجراحة العامة  
كلية الطب - جامعة عين شمس

كلية الطب

جامعة عين شمس  
٢٠١٥

**بسم الله الرحمن الرحيم**

**صدق الله العظيم**

**البقرة .. آية رقم ٣٣**

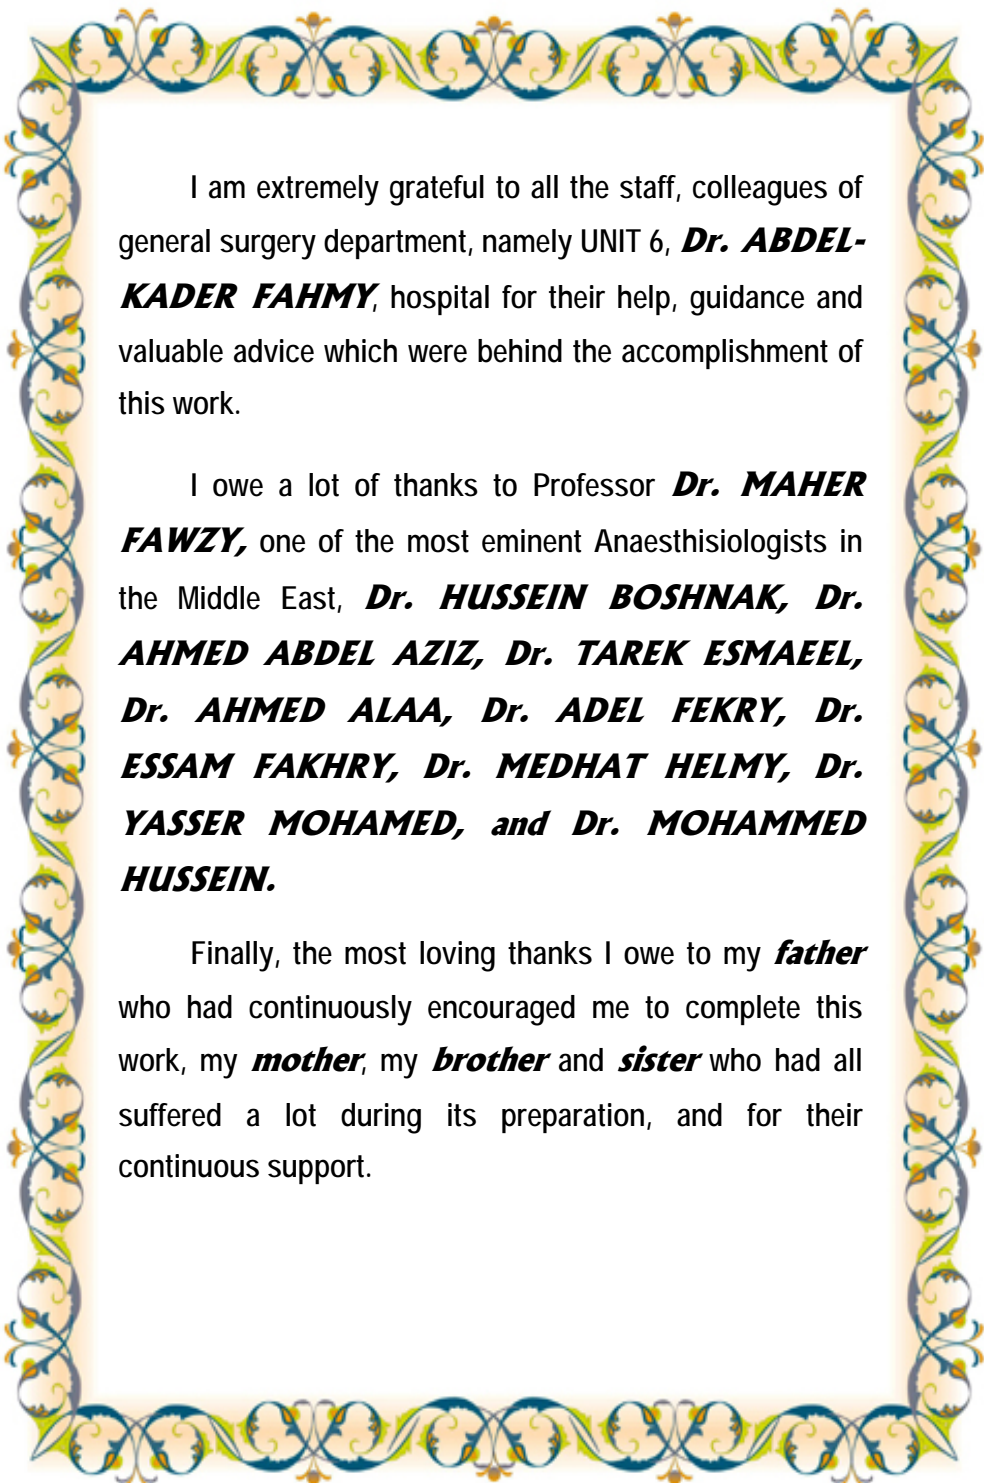

## **ACKNOWLEDGEMENT**

My words stand short of my supreme gratitude and thanks to my teacher and innovator Prof. **Dr. REDA ABDEL-TAWAB KHALIL**, Professor of general surgery, Ain Shams University, to whom I owe more than words can express, his limitless help, valuable advice and kind encouragement are beyond acknowledgment. It has been a great privilege having him as a guide in scientific work.

I owe special gratefulness and much regards to **Prof. Dr. TAREK EL BAHAR**, Professor of General Surgery, Ain Shams University for dedicating so much of his precious time and to his help and valuable advice to complete this work.

I owe my sincere thanks to **Dr. MOHAMMED ALI NADA**, Assistant Professor of General Surgery, Ain shams university; words of thanks are so little for his great help in preparation and completing this work.

I am extremely grateful to all the staff, colleagues of general surgery department, namely UNIT 6, **Dr. ABDEL-KADER FAHMY**, hospital for their help, guidance and valuable advice which were behind the accomplishment of this work.

I owe a lot of thanks to Professor **Dr. MAHER FAWZY**, one of the most eminent Anaesthesiologists in the Middle East, **Dr. HUSSEIN BOSHNAK**, **Dr. AHMED ABDEL AZIZ**, **Dr. TAREK ESMAEEL**, **Dr. AHMED ALAA**, **Dr. ADEL FEKRY**, **Dr. ESSAM FAKHRY**, **Dr. MEDHAT HELMY**, **Dr. YASSER MOHAMED**, and **Dr. MOHAMMED HUSSEIN**.

Finally, the most loving thanks I owe to my **father** who had continuously encouraged me to complete this work, my **mother**, my **brother** and **sister** who had all suffered a lot during its preparation, and for their continuous support.

<b>4</b>	Routes of nutritional support	<b>62</b>
<b>5</b>	Trauma is associated with integrated response	<b>103</b>

# INTRODUCTION

Despite the intuitive value of nutrition in the peri-operative period, it is often neglected or not appropriately used in the critically ill surgical patients who are often undernourished or even malnourished (**Bennenkade *et al.*, 2005**).

The reasons for this appear to be clinical inertia, difficulties in attaining nutritional goals especially via the enteral route, and reluctance to use the parenteral route. Furthermore, the physiologic effects of malnutrition do not become clinically apparent until a significant negative nitrogen balance has been reached. Earlier, more subtle and accurate nutritional assessments are not always reliable and require special laboratory support, equipment, and personnel that may not be available (**Krishnan *et al.*, 2003**).

Malnutrition is associated with increased morbidity, infections (particularly blood stream infections), and mortality. In contrast, adequate nutrition is associated with improved clinical outcome (**Martin *et al.*, 2004**).
