**MEDITERRANEAN SEAFLOOR - OUTER OFFSHORE NILE
DELTA: MORPHO-SEDIMENTOLOGICAL AND
ENVIRONMENTAL ASSESSMENT**

A THESIS

SUBMITTED IN FULFILLMENT OF THE REQUIREMENT FOR THE
DEGREE OF PHILOSOPHY DOCTOR IN GEOLOGY

CAIRO UNIVERSITY
FACULTY OF SCIENCE
GEOLOGY DEPARTMENT

By

Ahmed Farouk Mohamed Abu El Enein
(M.Sc Structural Geology)

Supervised by

Prof. Dr. Mohamed Darwish Salem
Geology Department
Faculty of Science
Cairo University

Dr. Ahmed Nyazi El-Barkooky
Geology Department
Faculty of Science
Cairo University

APPROVAL SHEET FOR SUBMISSION

MEDITERRANEAN SEAFLOOR - OUTER OFFSHORE NILE DELTA: MORPHO-SEDIMENTOLOGICAL AND ENVIRONMENTAL ASSESSMENT

Ahmed Farouk Mohamed
(M.Sc Structural Geology)

FACULTY OF SCIENCE
CAIRO UNIVERSITY
GEOLOGY DEPARTMENT

Supervisors

Prof. Dr. Mohamed Darwish Salem

Dr. Ahmed Nyazi El-Barkooky

Head of Geology Department

Faculty of Science, Cairo University

Prof. Dr. Adel Abdel Aziz Sehim

MEDITERRANEAN SEAFLOOR - OUTER OFFSHORE NILE DELTA: MORPHO-SEDIMENTOLOGICAL AND ENVIRONMENTAL ASSESSMENT

Supervisors

Prof. Dr. Mohamed Darwish Salem

Dr. Ahmed Nyazi El-Barkooky

ACKNOWLEDGMENTS

I would like to acknowledge Prof. Mohamed Darwish, Dr. Ahmed El-Barkooky, and Dr. Craig Shipp for their supervision and support. I thank Shell Egypt and Shell International for their technical, data, and financial support. I also thank, Prof. Nabil Abu El Ella and Dr. Essam Abdel Rahman from Cairo University, and Erik Scott Larry Gibson, Larry Nolte, Dr. van Heck, and Simon Newton from Shell International. From Shell Egypt, I thank Mark Newall, Paul Houweling and Ivar Nijenhuis. Special thanks, to STRATOCHEM and EREX companies for supporting and facilitating core analyses used in this work.

TABLE OF CONTENTS

CHAPTER ONE

INTRODUCTION..... 1

1.1 STUDY AREA	3
1.2 SCOPE AND OBJECTIVES	4
1.3 SIGNIFICANCE AND IMPLICATIONS	5
1.4 MATERIAL	7
1.4.1 Core Data	8
1.4.2 Seismic Data	11
1.5 METHODOLOGY	12
1.6 THESIS STRUCTURE.....	13
1.7 BACKGROUND	13

CHAPTER TWO

TECTONO –STRATIGRAPHIC FRAMEWORK..... 23

2.1 STRATIGRAPHIC AND SEDIMENTOLOGIC SETTING	23
2.2 TECTONIC SETTING	29

PART I

CHAPTER THREE

SEAFLOOR And NEAR- SEA FLOOR SEISMIC STRATIGRAPHY 34

3.1 SEAFLOOR SETTING	35
3.1.1 NEMed 2001 Survey Area.....	35
3.1.2 Kj 53 Survey Area	39
3.2 NEAR-SEAFLOOR SEISMIC STRATIGRAPHY	42
3.2.1 Methodology	45
3.2.2 Display Types	48
3.2.3 NEMed 2001 Near-seafloor Stratigraphy	49
3.2.3.1 Rosetta MTD.....	50
3.2.3.2 Sapphire MTD	55
3.2.4 Kj 53 Near-seafloor Stratigraphy.....	60
3.3 SEISMIC FACIES ANALYSIS	63
3.3.1 NEMed 2001 Area	64
3.3.1.1 Rosetta MTD Seismic Character	64
3.3.1.2 Sapphire MTD Seismic Character	64
3.3.2 Kj 53 Area (SMTD Seismic Character).....	68
3.4 GEO-SEISMIC MODELING	69

PART II

CHAPTER FOUR

CORES DESCRIPTION..... 73

4.1 SEAFLOOR SETTING	74
----------------------------	----

4.2 LITHOLOGICAL DESCRIPTION	77
4.2.1 Leil-1	77
4.2.2 Leil-2	83
4.2.3 Morouge-1	88
4.2.4 Morouge-2	93
4.2.5 Shorouk-1	98
4.2.6 Shorouk -2	103
4.2.7 Shorouk -3	108
 CHAPTER FIVE	
SAPROPEL IDENTIFICATION AND CHARACTERIZATION	114
5.1 ORGANIC CARBON ANALYSES	117
5.1.1 Leil-1 TOC Results	118
5.1.2 Morouge-2 TOC Results	122
5.1.3 Shorouk-1 TOC Results	126
5.2 KEROGEN TYPE	130
5.2.1 Leil-1	134
5.2.2 Leil-2	135
5.2.3 Morouge-1	135
5.2.4 Morouge-2	135
5.2.5 Shorouk-1	135
5.2.6 Shorouk-2	136
5.2.7 Shorouk-3	136
5.3 CORE LOGS	140
5.4 PALEONTOLOGIC ASSEMBLAGES	147
5.4.1 BENTHIC AND PLANKTONIC FORAMINIFERA	147
5.4.1.1 Leil-1	147
5.4.1.2 Morouge-2	148
5.4.2 CALCAREOUS NANNOFOSSILS	153
5.4.2.1 Leil-1	153
5.4.2.2 Morouge-2	154
5.4 PETROGRAPHY OF SAPROPELS	157
5.4.1 Leil-1	157
5.4.2 Morouge-2	157
5.4.3 Shorouk-1	157
 CHAPTER SIX	
SUMMARY AND CONCLUSIONS	162
 REFERENCES.....	167

LIST OF FIGURES

CHAPTER ONE

Fig. 1.1:	The Mediterranean Sea map. -----	1
Fig. 1.2:	Schematic diagram showing the submarine topography of the Mediterranean seabed. -----	2
Fig. 1.3:	Schematic diagram of the Levant basin -Nile cone area. -----	3
Fig. 1.4:	NEMed concession map showing to the west the 2001 and the KJ 53 3D seismic surveys and the 1999 3D seismic survey. -----	4
Fig. 1.5:	Mediterranean basin showing locations of the Deep Sea Drilling Project (DSDP) sites (open circles), and the Ocean Drilling Project Program (ODP) sites. -----	7
Fig. 1.6:	Bathymetric map of the Eastern Mediterranean. -----	14
Fig. 1.7:	Eastern Mediterranean physiographic provinces. -----	15
Fig. 1.8:	Shaded bathymetry map (illuminated from the east) of the Nile fan, showing the three morphologic provinces. -----	16
Fig. 1.9:	Shaded bathymetry of the NDSF and Egyptian continental platform. ---	17
Fig. 1.10:	Distribution map of mud cones, gas chimneys and pockmarks. -----	18
Fig. 1.11:	Nile Deep Sea Fan shaded morphology map. -----	18
Fig. 1.12:	Extent of key horizons identified within the Quaternary section of the Nile fan. -----	19
Fig. 1.13:	Schematic time scale diagram illustrating the location of the Ocean Drilling Project (ODP) Leg 160 and Leg 161 drill sites across the Mediterranean. -----	21
Fig. 1.14:	Sapropel sediment sequence based on Nile Cone and Herodotus Abyssal Plain core analysis. -----	22

CHAPTER TWO

Fig. 2.1:	Generalized bathymetric map of the Nile sedimentary domain. -----	24
Fig. 2.2:	Stratigraphy of Egypt in relation to Nile Delta/Mediterranean showing major tectono-stratigraphic events. -----	25
Fig. 2.3:	Subsurface stratigraphic column of the Nile Delta area. -----	29

Fig. 2.4:	Outline tectonic map of the eastern most Mediterranean area extending from southwestern Cyprus to southern Turkey. -----	30
Fig. 2.5:	Geological domains of the Nile Cone and the NEMed concession. ----	32
Fig. 2.6:	Geological cross-sections through the Nile Cone and the NEMed concession illustrating the Upper Miocene (Messinian) canyon and the Pliocene-Pleistocene turbidite depositional sequences. -----	32
Fig. 2.7:	NEMed structural domains of (Abdel Aal et al. 2001) showing outlines of the 1999 and the 2001 3D survey areas. -----	33

CHAPTER THREE

Fig. 3.1:	NEMed concession map showing the 2001 and the Kj 53 3D seismic surveys used for studying the Rosetta and the Sapphire MTDs. -----	34
Fig. 3.2:	Bathymetric map of the NEMed 2001 3D survey area. -----	35
Fig. 3.3:	Rendered seafloor map of the NEMed 2001 survey area. -----	36
Fig. 3.4:	Prospective view of the eastern part of the NEMed 2001 survey area. --	37
Fig. 3.5:	Prospective view of the central part of the NEMed 2001 survey area. --	37
Fig. 3.6:	Prospective view of the western part of the NEMed 2001 survey area. -	38
Fig. 3.7:	The three seafloor morphological domains of the NEMed 2001 survey area. -----	40
Fig. 3.8:	Bathymetric map of the Kj 53 area. -----	41
Fig. 3.9:	Dissemblance horizon slice of the seafloor at the Kj 53 area. -----	41
Fig. 3.10:	Seismic traverse showing faults dislocating the seabed horizon in the Kj 53 area. -----	42
Fig. 3.11:	Map showing the seven major Quaternary MTDs of the offshore Nile Delta. -----	44
Fig. 3.12:	Regional east-west seismic section through the central and western Nile Fan showing key horizons. -----	46
Fig. 3.13:	Swath bathymetry of the Nile deep-sea turbidite system (NDSTS). ----	47
Fig. 3.14:	Interpreted bathymetric map of the upper part of Rosetta area. Location of the two scar segments affecting the shelf edge is indicated. -----	47

Fig. 3.15:	Schematic cross sections through (a) the scar segment A, and (b) the scar segment B showing stratigraphic setting of all the MTDs. -----	48
Fig. 3.16:	Map showing areal distribution of the MTDs on the Rosetta slope. ----	48
Fig. 3.17:	Strike-oriented seismic traverse showing Rosetta MTD (RMTD) and the Sapphire MTD (SMTD). -----	51
Fig. 3.18:	Time structure contour map of the RMTD top surface. -----	52
Fig. 3.19:	Strike-oriented seismic traverse showing RMTD top and base surfaces (green lines). -----	52
Fig. 3.20:	Dissemblance time slice at 3400 ms two way travel time showing meandering Rosetta canyon cut into the RMTD. -----	53
Fig. 3.21:	Dip-oriented seismic traverse showing the RMTD top and base surfaces. Faults with small displacements intersect the seafloor event. -----	53
Fig. 3.22:	Time structure contour map of the RMTD base surface. -----	54
Fig. 3.23:	Dissemblance horizon slice along the RMTD base surface. -----	55
Fig. 3.24:	Time structure contour map of the top surface of the Sapphire MTD. --	56
Fig. 3.25:	Time structure contour map of the base surface of the Sapphire MTD. -	56
Fig. 3.26:	Strike-oriented seismic traverse showing the SMTD and the underlying orange MTD. -----	57
Fig. 3.27:	Dissemblance time slice along 3300 ms showing the channelized graben (light color) cutting through the SMTD (dark gray color). -----	58
Fig. 3.28:	Interval amplitude extraction map between the seafloor and 30 ms TWTT below it. -----	58
Fig. 3.29:	Scouring at the SMTD base surface. N-S scours occur at the northeastern part of the map (A), while NW scours occur at the western part of the map. -----	60
Fig. 3.30:	Uninterpreted (A) and interpreted (B) NW-SE seismic traverse showing the SMTD within the Kj 53 survey area. -----	62
Fig. 3.31:	Structure contour map of the SMTD top surface. Blue is low and red is high. Contours are in TWTT (ms). -----	62
Fig. 3.32:	Structure contour map of the SMTD base surface. Blue is low and red is high. Contours are in TWTT (ms). -----	63

Fig. 3.33:	Strike-oriented (A) and dip-oriented (B) seismic traverses showing the chaotic seismic character of the RMTD within the NEMed 2001 area. -65
Fig. 3.34:	Maximum interval amplitude extraction map of the RMTD. Red circles indicate areas of small high amplitude anomalies inside the RMTD. ---66
Fig. 3.35:	Dip-oriented seismic traverse showing RMTD down-dip high amplitudes (A), and zoomed in view for these amplitudes (B) as well as internal geometries. -----66
Fig. 3.36:	Maximum interval amplitude extraction map showing the dominance of low amplitude anomaly along the entire SMTD thickness. -----67
Fig. 3.37:	SMTD seismic character within the NEMed 2001 survey area. -----67
Fig. 3.38:	Seismic traverse showing the SMTD seismic character within the Kj 53 area. Note amplitude difference below and above the BSR. -----68
Fig. 3.39:	SMTD seismic characters within the Kj 53 area. -----69
Fig. 3.40:	Strike-oriented seismic traverse illustrating the SMTD and the RMTD base and top surface in relation to structural deformation and underlying sedimentary packages. -----70
Fig. 3.41:	Proposed Evolution model of the Sapphire and Rosetta MTDs within the NEMed 2001 area. -----72

CHAPTER FOUR

Fig. 4.1:	Rendered seafloor map showing the three cored areas. -----73
Fig. 4.2:	Contoured seafloor dip map of Leil area. -----75
Fig. 4.3:	Contoured seafloor map of Morouge area. -----76
Fig. 4.4:	Contoured seafloor map of Shorouk area. -----76
Fig. 4.5:	Leil-1 core photos and sedimentary structures. -----79
Fig. 4.6:	Lithological description chart for Leil-1 core. -----81
Fig. 4.7:	Leil-2 core photos and sedimentary structures. -----84
Fig. 4.8:	Lithological description chart for Leil-2 core. -----86
Fig. 4.9:	Morouge-1 core photos and sedimentary structures. -----89
Fig. 4.10:	Lithological description chart for Morouge-1 core. -----91
