THESIS

Submitted to the Faculty of Medicine

Alexandria University

In Partial Fulfilment of the Requirements

of the Degree of

DOCTOR OF INTERNAL MEDICINE

By

Hisham Mahamoud Fouad

(M.B.B.CH. Alex, M.M. Alex)

Faculty of Medicine

Alexandria University

1990

SUPERVISORS

PROF. Dr. ALY ABD EL-LATIF ABBASSY

Professor of Internal Medicine
Faculty of Medicine
Alexandria University

PROF. Dr. HASSAN SABRY GHANNAM

Professor of Internal Medicine

Alexandria University

PROF. Dr. NABIL SABRY

Professor of Ophthalmology
Faculty of Medicine
Alexandria University

COWORKERS

Dr. AIDA SALEH OMAR SAIED

Assistant Professor of Clinical Pathology
Faculty of Medicine
Alexandria University

Dr. IBRAHIM ABD EL-RAHMAN MOHAMED

Assistant Professor of Internal Medicine
Faculty of Medicine
Alexandria University

ACKNOWLEDGEMENT

First, I would like to express my deepest thanks to GOD who is always with me, without his help this work could not be ended.

My deepest gratitude to Prof. Dr. Aly Abd El Latif Abbassy, Professor of Internal Medicine, for planning, wisdom, expert supervision, kind willing and continuous encouragement. His vast knowledge in the field and advice during the work were so valuable. Indeed I got much benefit from him.

A special cordial thanks and gratitude to Prof. Dr. Hassan Sabry Khannam, Professor of Internal Medicine, whose close supervision, continuous assistance, kind guidance and unlimited support were always behind me.

I am greatly indebted to Prof. Dr. Nabil Sabry, Professor of Ophthalmology, for his continuous valuable guidance, experience, intelligence and cleverness during accomplishment of this work.

Whatever I say, I cannot fulfill Dr. Aida Saleh Omar Saied, Ass. Prof. Dr. of Clinical Pathology, for her meticulous and generous provision of facilities for performance of laboratory investigations and unlimited support. I am really indebted to her.

I am indebted and grateful to Dr. Ibrahim Abd El Rahman, Assistant Prof. Dr. of Internal Medicine, for his constant guidance, keen interest, constructive criticism, valuable assistance and cooperation. He is really my brother.

My deepest appreciation and sincere thanks to Dr. Alaa El Din Mohamed Osman El Zawawi, Lecturer of Ophthalmology, for his continuous encouragement, practical cleverness, in performing fluorescein angiography and mapping of the ophthalmological results. His generous help is beyond this simple acknowledgement.

I cannot forget to express my deepest gratitude and thanks to Dr. Ahmed Hossam Mohamed Abd ALAH, Lecturer of Ophthalmology, for his continuous support, encouragement and unlimited help in interpretation of the ophthalmological results and valuable comments.

My thanks due to Dr. Ahmed Gamal Assist. Prof. Dr. of Internal Medicine for his meticulous reading.

Many thanks also due to Dr. Samir Naim Assaad Lecturer of Internal Medicine, Dr. Hossam Biomy and Dr. Mohamed Kammal Ghitany Assistant Lecturers of Internal Medicine for meticulous performance of the hormonal assay in R.I.A. Lab. in Endocrine and Metabolic research unit of the Department of Medicine.

CHAPTER 1: INTRODUCTION	1
1.1 HISTORICAL REVIEW	1
1.2 DEFINITION	2
1.3 CURRENT CLASSIFICATION OF DIABETES MELLITUS	3
1.4 HORMONAL CHANGES IN DIABETES	5
1.4.1 Insulin	5
1.4.2 Glucagon	9
1.4.3 Growth Hormone	13
1.4.4 Somatostatin	15
1.4.5 Adrenocorticotrophic hormone (A C T H)	16
1.4.6 Prolactin Hormone	18
1.5 MICROANGIOPATHY	19
1.5.1 Diabetic Retinopathy	21
1.5.1.1 Factors affecting the incidence of diabetic retinopathy	22
1.5.1.2 Pathogenesis Of Tissue Damage	26
1.5.1.3 Clinical Findings	30
1.5.1.3.1 Background Diabetic Retinopathy (BDR)	30
1.5.1.3.2 Proliferative Diabetic Retinopathy (PPDR)	37
1.5.1.3.3 Proliferative Diabetic Retinopathy (PDR)	41
1.5.2 Factor affecting the pathogenesis of diabetic Retinopathy	46
1.5.2.1 Chemical and biochemical factor	48
1.5.2.1.1 Therapeutic regimen	48
1.5.2.1.2 Protienuria	53
1.5.2.1.3 Blood lipids	55
1.5.2.1.4 Magnesium	56
1.5.2.2 Immunological factor	57

1.5.2.3 Hormonal factors	58
1.5.2.3.1 Insulin resistance	58
1.5.2.3.2 Basal insulin secretion	59
1.5.2.3.3 Growth hormone	60
1.5.2.3.4 Insulin—like growth factor	61
1.5.2.4 Genetic factors	62
1.5.2.4.1 Histocompatibility antigens	62
1.5.2.4.2 Family history	64
1.5.2.5 Hypercoagulation	64
1.5.2.6 Red blood cell abnormalities	66
1.5.2.7 Other factors	69
1.5.2.7.1 Systemic Hypertension	69
1.5.2.7.2 Obesity	70
1.5.2.7.3 Pregnancy	70
1.5.2.7.4 Cigarette smoking	71
1.5.2.7.5 Alcohol consumption	71
1.5.2.7.6 Iatrogenic factor	71
1.5.3 Reversibility of Diabetic Retinopathy	72
 CHAPTER II: AIM OF THE WORK	 76
 CHAPTER III: MATERIAL	 77
 CHAPTER IV: METHODS	 78
 CHAPTER V: RESULTS	 111
5.1 OPHTHALMIC DATA	112
5.1.1 Complaint	112
5.1.2 Visual acuity	113
5.1.3 Intra—ocular pressure (I.O.P)	114
5.1.4 Fluorescein angiographic data	118
5.2 DURATION	120
5.3 AGE	120
5.4 INSULIN THERAPY	121
5.5 HYPOGL YCEMIC SYMPTOMS	123
5.6 TESTS OF CLYCEMIC CONTROL	124
5.7 PROTEINURIA	128

5.8	SERUM LIPIDS	130
5.9	HORMONAL FACTORS	132
5.9.1	C—peptide	132
5.9.2	Growth Hormone	136
5.9.3	Prolactin	138
5.9.4	Glucagon	139
5.9.5	A.C.T.H	141
CHAPTER VI: DISCUSSION		216
6.1	DURATION	000
6.2	AGE	216
6.3	INSULIN THERAPY	218
6.4	HYPOGLYCEMIA	223
6.5	GLYCEMIC CONROL	227
6.6	PROTEINURIA	231
6.7	TOTAL SERUM LIPIDS	234
6.8	HORMONAL FACTORS	237
6.8.1	C—peptide	237
6.8.2	Growth Hormone	241
6.8.3	Prolactin	245
6.8.4	Plasma Glucagon	248
6.8.5	A.C.T.H	251
6.9	OPHTHALMIC DATA	255
6.9.1	Complaint	255
6.9.2	Visual Acuity	257
6.9.3	Intra—Oclar Presssure (I.O.P)	260
6.9.4	Fundus Examination and Flourescien Angiographic Data	268
