ACKNOWLEDGMENT

I thank Allah, the most gracious, most beneficent most merciful for the help and guidance to achieve goals and make them possible.

I wish to express my sincere appreciation and deepest gratitude to Professor Dr. Abd El-Ghafour Awad El-Sayed, Professor of Medicinal and Aromatic plants, Faculty of Agriculture, Cairo University for his indispensable advice, continuous supervision support, valuable comments, guidance, and constructive criticism during performance of this investigation.

My heart full thanks and gratefulness are extended to Dr. Mona Youssef Khalil Ahmed, Associate Professor of Medicinal and Aromatic plants, National Research Centre, for inspiration guidance, supervision, generous help, moral support, cooperation in offering all the facilities for achieving this work, encouragement and thesis writing.

Deep and great thanks are due to Dr. Gamal El-den Fahmy Ahmed, Professor of Medicinal and Aromatic plants late, Faculty of Agriculture, Cairo University for suggesting the subject of this work, Kind supervision and constant throughout the course of
