

MANAGEMENT OF ACQUIRED MEGACOLON

Thesis

Submitted for partial fulfillment of Master Degree in
General Surgery

By:

Ahmed Abd El Mohsen Said Abd El Mohsen

Resident of Pediatric Surgery, Al-Azhar University.
(M.B.B.Ch)

Supervised by:

Prof. MAGED MOHAMMED MOHAMMED ISMAIL

Professor of Pediatric Surgery
Faculty of Medicine – Al Azhar University.

Prof. MOHAMMED MOHAMMED MOHAMMED ELLITHY

Professor of Pediatric Surgery
Faculty of Medicine – Al Azhar University.

Prof. AL SAYED HASSAN MOHAMMED ABD ALLH

Professor of Pediatric Surgery
Faculty of Medicine – Al Azhar University.

Dr. AHMED ABD EL GHAFAR HAMED HELAL

Lecturer of Pediatric Surgery
Faculty of Medicine – Al Azhar University.

Al-Azhar University, Faculty of medicine, Cairo.

2013

مناجزة تضخم القولون المكتسب

رسالة

توطئة لنيل درجة الماجستير في الجراحة العامة

مقدمة من

الطبيب/ أحمد عبد المحسن سعيد عبد المحسن

طبيب مقيم جراحة الأطفال – جامعة الأزهر
بكالوريوس الطب والجراحة

تحت إشراف

الأستاذ الدكتور/ ماجد محمد محمد إسماعيل

أستاذ جراحة الأطفال
كلية الطب – جامعة الأزهر.

الأستاذ الدكتور/ محمد محمد محمد الليثي

أستاذ جراحة الأطفال
كلية الطب – جامعة الأزهر.

الأستاذ الدكتور/ السيد حسن محمد عبد الله

أستاذ جراحة الأطفال
كلية الطب – جامعة الأزهر.

الدكتور/ أحمد عبد الغفار حامد هلال

مدرس جراحة الأطفال
كلية الطب – جامعة الأزهر.

جامعة الأزهر بالقاهرة.

٢٠١٣

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا بِإِلَهِ مَا

عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

صدق الله العظيم

سورة البقرة - الآية ٣٢

Acknowledgement

First, I thank Allah, the most beneficent and the most merciful.

Words cannot express my sincere gratitude to my senior supervisor Prof. Maged Ismail for the continuous support of my study and research, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my study.

I would like to express my deep gratitude and respect to Prof. Mohammed Ellithy whose advices and insight was invaluable to me. For his generous help and sincere advices through this work and for all I learned from him.

I want to express the depth of my gratitude to Prof. Al-Sayed Hassan, for his valuable suggestions, generous assistance, kind support and continuous encouragement throughout this work.

Moreover, my deepest gratitude and profound thanks to Dr. Ahmed Abdel Ghaffar, for his precious time, active participation, great help and honest assistance to complete this work.

I also wish to express my gratitude to all staff of Pediatric surgery unit, Al-Azhar University, for their interest in my work and for placing the working facilities of the Department at my disposal.

Of course, I can't forget to thank Prof. Sameh Shehata and Prof. Ashraf Hamed, for their precious time, attendance and Accepting participation in the judgment committee of my thesis.

Last but not the least, I would like to thank my parents and family, for always being by my side, for their unconditional love, care, support and persistent encouragement over the course of my life. I dedicate this dissertation to them.

Ahmed Abdel Mohsen

TABLE OF CONTENTS

TABLE OF CONTENTS	I
LIST OF FIGURES.....	VII
LIST OF TABLES	X
LIST OF CHARTS.....	X
INTRODUCTION.....	2
AIM OF THE WORK	6

Part (A) Review of literature:

Chapter 1: ANATOMY AND PHYSIOLOGY OF THE COLON IN CHILDREN

ANATOMY OF THE COLON IN CHILDREN.....	9
1) Gross Anatomy	9
2) Microscopic Anatomy:.....	14
MOTILITY OF THE COLON.....	18
Cellular Basis for Motility.....	19
Neural Control of Motility.....	20
Neurotransmitter and hormonal control	20
PHYSIOLOGY OF DEFECATION.....	22

Chapter 2: NORMAL BOWEL HABITS IN CHILDREN & CONSTIPATION

NORMAL BOWEL HABITS IN CHILDHOOD.....	25
INTESTINAL TRANSIT TIME IN CHILDREN	27

CONSTIPATION	28
PATHOPHYSIOLOGY OF CONSTIPATION IN CHILDREN.....	31
ETIOLOGY OF CONSTIPATION.....	33
A) Idiopathic (Primary) constipation	33
B) Secondary constipation.....	35
SLOW TRANSIT CONSTIPATION (STC)	36
Pathophysiology of STC.....	36
Colonic inertia	39
OUTLET DELAY CONSTIPATION.....	40
Pelvic Floor Dysfunction (Anismus).....	41
Interanal Anal Sphincter (IAS) Achalasia.....	42
Rectal Prolapse	43
Internal rectal intussusception	43
Rectocele in children	43
Constipation after Posterior Sagittal Anorectoplasty (PSARP)	44

Chapter 3: ACQUIRED MEGACOLON

MEGACOLON AND MEGARECTUM.....	46
PATHOLOGY OF ACQUIRED MEGACOLON AND MEGARECTUM.....	48
SLOW TRANSIT CONSTIPATION AND MEGACOLON	50
CLASSIFICATION OF MEGACOLON.....	51
CLINICAL PRESENTATION OF ACQUIRED MEGACOLON	53
DIAGNOSIS OF MEGACOLON IN CHILDREN	55
A) Plain X-Ray.....	55

B) Barium Enema:	56
C) Pelvic Ultrasound (U/S)	58
DELICHOSIGMOID.....	60
ACQUIRED MEGACOLON AND URINARY DISORDERS	61
Urinary tract infection.....	61
Dysfunctional voiding (daytime wetting)	61
Dysfunctional elimination syndrome.....	62

Chapter 4: INVESTIGATIONS

GENERAL SCHEME FOR IMPORTANT INVESTIGATIONS.....	64
ABDOMINAL X-RAY	65
ULTRASONOGRAPHY (US).....	65
BARIUM ENEMA	66
COLONIC TRANSIT STUDY	68
Clinical importance of measuring colon transit time	68
for measuring colonic transit.....	69
RADIO-OPAQUE MARKER STUDIES (SITZ MARKERS).....	70
Effect of age and sex on CTT	71
NUCLEAR TRANSIT STUDY (NTS, SCINTIGRAPHY).....	72
USE OF THE SCINTIGRAPHY RESULTS FOR CLINICAL DECISION MAKING	73
IMPORTANT CONSIDERATIONS ABOUT NUCLEAR TRANSIT STUDY	76
WIRELESS MOTILITY CAPSULES	77
RECTAL BALLOON EXPULSION TEST.....	77
DEFECOGRAPHY	78

MR Defecography	78
Normal findings in defecography	79
Defecoperitoneography.....	80
RECTAL BIOPSY	81
Therapeutic role of rectal biopsy	83
LAPAROSCOPIC COLONIC BIOPSIES.....	84
COLONIC MANOMETRY	84
MAGNETIC RESONANCE IMAGING (MRI).....	86

Chapter 5: MEDICAL TREATMENT

MEDICAL TREATMENT	88
A) Neonates and Infants Younger Than 1 Year:	89
B) Older Children/Adolescents:.....	90
PLAN FOR MEDICAL TREATMENT IN CHILDREN	91
1. Education.....	91
2. Disimpaction.....	91
3. Maintenance treatment.....	93
<i>Psychological treatment</i>	97
<i>Biofeedback treatment</i>	97
4. Withdrawal of medication.....	98
BOTULINUM TOXIN INJECTION.....	100
Technique	101
TRANSCUTANEOUS ELECTRICAL STIMULATION THERAPY (TES)	101
PROGNOSIS AND OUTCOME	103

Chapter 6: SURGICAL TREATMENT

INDICATIONS OF SURGICAL TREATMENT IN ACQUIRED MEGACOLON	105
TYPE OF SURGERY FOR CONSTIPATION	106
ANTEGRADE CONTINENCE ENEMA	108
Technique	108
Complications	109
Technical considerations in the prevention of stomal stenosis	110
Cecoplication, leakage, and the emergence of laparoscopy	111
ACE procedures in patients with a missing appendix	112
RECTOSIGMOID RESECTION.....	114
TRANSANAL RESECTION.....	116
Technique	116
VERTICAL REDUCTION RECTOPLASTY	120
Technique	120
STOMA FORMATION.....	123
TRANSANAL REPAIR OF RECTOCELE.....	123
Technique	124
STAPLED TRANSANAL RECTAL RESECTION (STARR).....	126
Technique	126
Complications	127
ANORECTAL MYOMECTOMY	128
Technique	129
RESTORATIVE PROCTECTOMY.....	131
TIMING OF SURGERY	133

OUTCOME FOR MEGARECTUM SURGERY	137
--------------------------------------	-----

Part (B) Patients and methods:

PATIENTS AND METHODS.....	139
RESULTS	145
DISCUSSION.....	160
Statistical significance.....	167
Protocol of selection for surgical management	168
Strengths and Limitations of the current study	168
SUMMARY.....	170
CONCLUSION	171
Research agenda	172
REFERENCES.....	174
الملفص العربي.....	209

LIST OF FIGURES

Figure 1: Macroscopic characteristics of the colon.....	12
Figure 2: Anatomical and surgical anal canal.	14
Figure 3: Diagram of the histological features of the colon.....	15
Figure 4: Old and new models of neuromuscular transmission in the gastrointestinal tract.	37
Figure 5: Gamma camera pictures show different patterns of transit in children.	38
Figure 6: Treatment algorithm for intractable constipation in children.....	42
Figure 7: Abdominal radiograph shows loaded rectum and colon by stools.	55
Figure 8: Determination of the Rectopelvic ratio (RPR).	57
Figure 9: Contrast enema in a patient with severe idiopathic constipation showing the typical finding of a megarectosigmoid.	57
Figure 10: Measuring rectal crescent by Pelvic U/S.	59
Figure 11: Contrast enema – Lateral radiograph showing findings of Hirschsprung’s disease.	67
Figure 12: Picture of huge acquired megacolon.....	67
Figure 13: Movement of Sitz™ markers in the colon.....	70
Figure 14: Radiographic picture obtained on day 4 in a study case showing the markers remained in different colonic segments.....	71
Figure 15: Nuclear transit studies demonstrating slow transit constipation (STC) and functional faecal retention (FFR).....	73
Figure 16: New algorithm for the management of children with treatment-resistant constipation.....	75
Figure 17: Defecography in a healthy child in sagittal position.	80
Figure 18: Abdominal radiograph showing an antegradely inserted 8 channel manometry catheter passing from the appendix to the rectum.	85
Figure 19: Suggested strategy for sustaining complete evacuation of the colon.	93
Figure 20: Algorithm for management of chronic constipation.....	99

Figure 21: Injection of botulinum toxin into the anal sphincter for the treatment of internal sphincter achalasia.	100
Figure 22: Diagram of electrode placement on patient for home Transcutaneous electric stimulation (TES) treatment.	102
Figure 23: prograde enema administered through an appendicostomy.....	109
Figure 24: Chait trapdoor caecostomy button is inserted through the appendix into the caecum and gives a flexible conduit for washouts in appendix stoma.	113
Figure 25: Resection of a dilated sigmoid colon, which can be very effective in selected patients with severe constipation.	115
Figure 26: Transanal exposure with preservation of the anal canal and beginning of the mobilization.	117
Figure 27: Primary 2-layer colo-anal anastomosis.....	117
Figure 28: An extensive resection of the rectosigmoid colon can be performed transanally in patients with idiopathic constipation.	118
Figure 29: One of the most dramatic cases. Ninety-eight centimeters of rectosigmoid was removed transanally.....	119
