Ain Shams University

2002

Acknowledgement

First, I thank "God" for granting me the power to proceed and to accomplish this thesis.

I would like to express my endless gratitude and appreciation to Prof. Dr. Samir Saleh Ahmed Wafa, Professor of Cardiology, Faculty of Medicine, Ain Shams University, for giving me the honor of working under his supervision and for providing me with a lot of encouragement and support throughout this essay and always.

Thanks are due to Dr. Salah El-Din Hamdy Demerdash, Lecture of Cardiology, Faculty of Medicine, Ain Shams University for his encouragement, and honest assistance in every step of this essay.

Truly they gave me a lot of guidance, and support to finish this essay in the appropriate way.

CONTENTS

Introduction and Aim of the work.....	1
Review of Literature :	
Coronary Anatomy.....	3
Pathophysiology of Myocardial Ischemia.....	11
Detection of Myocardial Ischemia.....	17
Exercise ECG.....	21
Pharmacological Stress Testing.....	31
Myocardial Perfusion Imaging.....	37
SPECT or Planar Imaging.....	39
Myocardial Perfusion Agents.....	49
Subjects and Methods.....	75
Results.....	84
Discussion.....	107
Summary.....	115
Conclusion and Recommendations.....	118
References.....	119
Arabic Summary	

The first part of the paper discusses the importance of understanding the cultural context of the research. It highlights the need for researchers to be sensitive to the values and beliefs of the communities they are studying. This is particularly important in the field of education, where cultural differences can significantly impact learning outcomes. The paper then moves on to discuss the challenges of conducting research in culturally diverse settings. It notes that researchers often face difficulties in establishing rapport with participants and in interpreting their responses. To address these challenges, the paper suggests several strategies, including the use of local informants and the development of culturally appropriate research instruments. The final part of the paper discusses the implications of the research for educational practice. It argues that a deep understanding of the cultural context is essential for developing effective teaching strategies and for creating a supportive learning environment for all students.
