

STUDIES ON SOME MITES ASSOCIATED WITH COLEOPTEROUS INSECTS

By

MOHAMED ABD EL-HADY HASSAN ABD EL-HADY

B. Sc. Agric., Science, (Agric. Zoology and Nematology), Faculty of Agric., Cairo
Al-Azhar University, 2006.

THESIS

**Submitted in Partial Fulfillment of the
Requirements for the Degree**

Of

MASTER OF SCIENCE

In

AGRICULTURAL SCIENCES

(Agricultural Zoology and Nematology - Acarology)

**Department of Agricultural Zoology and Nematology
Faculty of Agriculture, Cairo
Al-Azhar University**

**1435 A.H.
2014 A.D.**

**TITLE: STUDIES ON SOME MITES ASSOCIATED
WITH COLEOPTEROUS INSECTS**
NAME: MOHAMED ABD EL-HADY HASSAN ABD EL-HADY

THESIS
Submitted in Partial Fulfillment of the
Requirements for the Degree

Of
MASTER OF SCIENCE

In
AGRICULTURAL SCIENCES
(Agricultural Zoology and Nematology - Acarology)

Department of Agricultural Zoology and Nematology
Faculty of Agriculture, Cairo
Al-Azhar University

1435 A.H.
2014 A.D.

Supervision Committee:

Prof. Dr. ABDEL-SATTAR MOHAMED METWALLY

Prof. of Acarology, Agric. Zoology and Nematology Dept., Faculty of Agriculture, Cairo Al-Azhar University.

Prof. Dr. MOHAMED RAGAEY ABD EL-KADER

Late Prof. of Agric., Zoology, Agric. Zoology and Nematology Dept., Faculty of Agriculture, Cairo Al-Azhar University

Dr. MAHMOUD MOSTAFA EL-AZAZY

Assistant Prof. of Acarology, Agric. Zoology and Nematology Dept., Faculty of Agriculture, Cairo Al-Azhar University.

Dr. ESAM MOHAMED ABD EL-SALAM

Assistant prof. of Acarology, Plant Protection Research Institute, A.R.C.

APPROVAL SHEET

ACKNOWLEDGE MENT

ACKNOWLEDGEMENT

First of all, I thank **ALLAH**, the most gracious, the most merciful for supporting me, and guiding me to the straight path.

I would like to express my sincer appreciation and gratitude to my major advisor **Prof. Dr. Abdel-Sattar M. Metwally**, Emeritus Professor of Acarology, Agric. Zoology and Nematology Department, Faculty of Agricultural, Al-Azhar University for his supervision, valuable scientific criticism, guidance, fruitful discussion and valuable advices.

Also, I would like to express my deepest thanks to my co-advisor (may Allah have mercy on him) **Prof. Dr. Mohamad. R. Abd El-Kader** Professor of Acarology, Agric. Zoology and Nematology Department, Faculty of Agriculture, Al-Azhar University, Cairo, Egypt, for his supervision, encouragement and valuable criticism.

Special thanks for **Dr. Mahmoud. M. El-Azazy** assistant professor of Acarology, Agric. Zoology and Nematology Department, Faculty of Agriculture, Al-Azhar University, Cairo, Egypt, for his supervision, and for many helpful comments and fruitful discussions.

My sincere thanks and appreciation are also due to **Dr. Esaam. M. Abd El-Salam**, assistant professor of Acarology. Plant Protection Research Institute, A.R.C., for his supervision, and continuous encouragement during the work.

Dr. Mohamed Abou-Setta, Emeritus Chief Researcher, Scale Insects & Mealy Bugs Research Dep., in the same Institute for the great help he offered in the achievement of all the statistical analysis of the obtained data of this study.

Thanks are also extended to the head and all staff members of Agricultural Zoology and Nematology Department, Faculty of Agriculture, Al-Azhar University, for the facilities offered during the course of this work.

DEDICATION

This dissertation is dedicated to my father, my mother, my brother (**Ahmed**) and my sister (**Hoda**) in the utmost appreciation and gratitude for their unconditional love, support and continuous encouragement throughout every step in my life. No words or deeds can ever thank them enough for what they blessed me with.

Special thanks to all of my family specially my uncle (**Tarek**) and my childhood friends (**A. Basuny**) and (**M. Abd El-Aziz**)

Finally, I would like to thank my colleague **Eng. Mostafa Fayed** and **Eng. Ahmed Abd El-Ghany**, for them valuable friendship, cooperation and understanding.

Whenever I needed help **Mohamed Mostafa**, he was sacrificing his time instantly.

ARABIC SUMMARY

List of Tables

Table No.	Title	Page No.
1	Summary of mite taxa and numbers of species recorded from Coleoptera.	35
2	Occurrence of mites in associated with Coleoptera (mite family, species and its insect hosts).	47
3	Summary of host families, species and numbers of mite species recorded from each.	53
4	Insect families, species and mite species recorded from each.	59
5-A	Developmental time of different stages of <i>Caloglyphus boharti</i> Cross when fed on different food types (30±1°C and 60±5% R.H).	87
5-B	Average duration (in days) of adult female of <i>Caloglyphus boharti</i> Cross when fed on different food types (30±1°C and 60±5% R.H).	88
6	Effect of food types on female immature stages (active and quiescent) of <i>Caloglyphus boharti</i> Cross at (30±1°C and 60±5% R.H).	89
7	Effect of food types on male immature stages (active and quiescent) of <i>Caloglyphus boharti</i> Cross at (30±1°C and 60±5% R.H).	91

Table No.	Title	Page No.
8	Effect of food types on female and male immature stages of <i>Caloglyphus boharti</i> Cross at (30±1°C and 60±5% R.H).	93
9	Effect of food types on female adult stages of <i>Caloglyphus boharti</i> Cross at (30±1°C and 60±5% R.H).	94
10	Effect of food types on fecundity of <i>Caloglyphus boharti</i> Cross (female) at (30±1°C and 60±5% R.H).	96
11	Average duration (in days) of <i>Caloglyphus boharti</i> Cross (male and female) when fed on three food types at (30±1°C and 60±5% R.H).	97
12-A	Developmental time of different stages of <i>Trichouropoda patavina</i> (Canestrini) when fed on different prey types at (30±1°C and 70±5% R.H).	118
12-B	Duration (in days) of adult female of <i>Trichouropoda patavina</i> (Canestrini) when fed on different prey types at (30±1°C and 70±5% R.H).	119
13	Effect of prey types on female immature stages (active and quiescent) of <i>Trichouropoda patavina</i> (Canestrini) at (30±1°C and 70±5% R.H).	120

Table No.	Title	Page No.
14	Effect of prey types on male immature stages (active and quiescent) of <i>Trichouropoda patavina</i> (Canestrini) at (30±1°C and 70±5% R.H).	122
15	Effect of prey types on female and male immature stages of <i>Trichouropoda patavina</i> (Canestrini) at (30±1°C and 70±5% R.H).	124
16	Effect of prey types on female adult stages of <i>Trichouropod patavina</i> (Canestrini) at (30±1°C and 70±5% R.H).	125
17	Effect of prey types on fecundity of <i>Trichouropoda patavina</i> (Canestrini) at (30±1°C and 70±5% R.H).	127
18	Average duration (in days) of <i>Trichouropoda patavina</i> (Canestrini) (male and female) when fed on two prey types at (30±1°C and 70±5% R.H).	128
