Biological studies on some aquatic parasitic mites

A THESIS

Submitted for The Award of The Ph. D. Degree

By

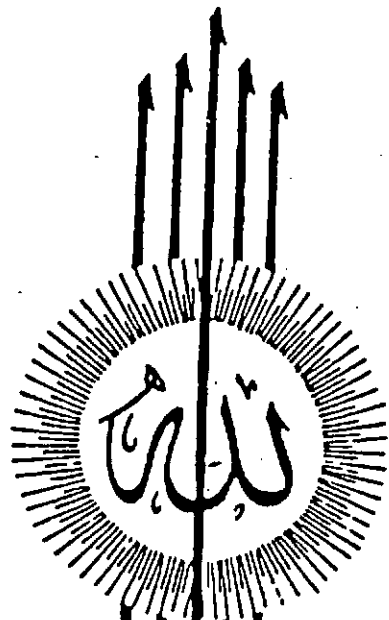

Somaia Ahmed Ramadan
(M. Sc.)

Supervised by

Prof. Dr. Mohamed A. Hussein
Professor of Zoology
Faculty of Science
Assiut University

Dr. Hosny M. Aboul-Dahab
Lecturer of Zoology
Faculty of Science (Sohag)
South Valley University

1995

عَلَّمَ الْإِنْسَانَ مَا لَمْ يَعْلَمْ

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

ACKNOWLEDGEMENTS

ACKNOWLEDGEMENTS

Praise be to ALLAH (GOD), The Lord, has blessed me with countless blessings: the support of my parents and family, a pleasant environment in which to work, a generous sponsorship with which one feels secure, a considerate supervisors who one deeply wishes to work with, friendly colleagues with whom one feels at ease, and on top of that more than sufficient life and energy to carry out this study. So, He is first to be acknowledged for all His blessings and my countless thanks will never be sufficient.

I would like to express my deepest appreciation to my supervisor Prof. Dr. M. A. Hussein, Professor of Zoology, Faculty of Science, Assiut University for his valuable advices, reading and criticizing the manuscript, helpful comments and enlightening discussion throughout.

I am most grateful to my supervisor Dr. Hosny M. Aboul-Dahab Lecturer of Zoology, Sohag Faculty of Science, South Valley University for his continuous encouragement, patience, guidance and help during all stages of this study.

My thanks go to Prof. Dr. F. A. Boraey, Head of Zoology Department, Sohag Faculty of Science, South Valley University for the facilities he provided.

Sincere thanks are also due to Prof. Dr. H. M. El-Khashab, Dean of the Sohag Faculty of Science, for his facilities he offered.

Finally, I am most grateful to all members of Zoology Department, specially those gave help at the various stages of the work.

INTRODUCTION	1
CHAPTER 1	
TAXONOMICAL STUDIES ON THE COLLECTED MITES	
MATERIALS AND METHODS	4
Collection sites	4
Sampling methods	5
A- Collection of marine sponges	5
B- Collection of mussels	5
Separation	6
Scanning Electron Microscope studies	7
Identification	7
RESULTS	8
I- Marine parasitic mites	9
<i>Agauopsis</i> sp. 1	9
General description of the adults	9
Description of female	9
Description of male	12
Diagnostic characters of the nymph	14
Description of nymph	15
<i>Copidognathus</i> sp. 2	18
General description of the adults	18
Description of female	18
Description of male	21

	page
Nymphs.....	23
<i>Copidognathus</i> sp. 3	24
General description of the adult forms	24
Description of female	24
Description of male	27
Nymphs.....	29
<i>Copidognathus</i> sp. 4	30
General description of the adult forms	30
Description of female	30
Description of male	33
Description of nymph	35
<i>Copidognathus</i> sp. 5	38
General description of the adults	38
Description of female	38
Description of male	41
Description of nymph	43
<i>Copidognathus</i> sp. 6	47
General description of the adults	47
Description of female	47
Description of male	50
Description of nymph	51
II- Freshwater parasitic mite	55
<i>Unionicola anodontaise</i>	55
General description of the adults	55
Description of female	56
Description of male	58

	page
Measurements of the Holotype of female	59
Measurements of the Holotype of male	60
DISCUSSION	61
I- The marine parasitic mites	61
II- Freshwater parasitic mite	72

CHAPTER 2

POPULATION ECOLOGY

MATERIALS AND METHODS	120
Measurements of environmental factors	120
Sampling	120
Analysis of population structure	121
RESULTS	125
A- population analysis and growth of <i>U. anodontaise</i>	125
B- physico-chemical factors	128
1- Air and water temperature	128
2- pH values	128
3- Electric conductivity	128
4- Dissolved oxygen values	129
C- Monthly changes in the density of <i>U. anodontaise</i>	129
1- prehatching (early) and posthatching (larval) stages....	129
2- nymphal stages	130
3- adult forms (female and males)	130
DISCUSSION	131

CHAPTER 3

REPRODUCTIVE SYSTEM AND EMBRYOGENESIS OF *U. anodontaise*

MATERIALS AND METHODS	167
RESULTS	168
The female reproductive system	168
The first part	168
The second part	170
The male reproductive system	171
Embryogenesis	172
I- cleavage and formation of blastoderm	173
II- early development of embryo	174
formation of the germ band and gastrula	174
III- organization	175
A- post-gastrula stage	175
B- prehatching stage I	176
C- prehatching stage II	176
D- hatching stages	177
1- prelarval stage	177
2- larval stage	177
3- post-larval stage	178
4- protonymphal stage	178
5- deutonymphal stage	179
6- tritonymphal stage	180
DISCUSSION	180

CHAPTER 4

PARENTAL CARE AND BROOD PROTECTION IN *U. anodonta*

MATERIALS AND METHODS	225
Brood size	225
Statistical analysis	226
RESULTS	227
I- brooding of embryos inside females	227
Relationship between brood size and body length of females	228
II- Incubation of embryos inside the gills of the host	231
Relationship between brood size and length of the host gills	232
DISCUSSION	234

CHAPTER 5

THE INCIDENCE OF THE PARASITIC MITE *U. anodonta*

INSIDE THE MOLLUSCAN HOST

MATERIALS AND METHODS	245
RESULTS	246
I- Incidence of parasite inside the host	246
A- Relationship between host shell length and the number of different stages of parasite.	247
B- Monthly distribution of different stages of the parasite.	248
