بسم الله الرحمن الرحيم

**قالوا سبحانك لا علم لنا إلا ما علمتنا،
إنك أنت العليم الحكيم**

صدق الله العظيم

سورة البقرة- الآية: ٣٢

Acknowledgment

First of all, thanks to Allah, whose help is the main factor in accomplishing this work.

I would like to express my deepest thanks and appreciation to Prof. Dr. Mohammed Nasser Kotby, Professor of Phoniatic Unit, Ain Shams University. His valuable remarks, vast knowledge and continuous meticulous supervision have been of great value to complete this work. I owe him a lot for his kindness, guidance and fruitful advice. Really he gave me the honor by being my supervisor.

Words stand short when coming to express my sincere thanks and great appreciation to Prof. Dr. Mohammed Hamed Ghanem, Professor of Psychiatry, Ain Shams University who gave me the privilege of being under his supervision in this work. His great help, unforgettable support, constant encouragement, constructive guidance and remarkable effort were of paramount importance for the initiation and progress of this work.

My sincere thanks, appreciations and indebt to Prof. Dr. Safaa Refaat El-Sady, Professor of Phoniatics, Ain Shams University, for her unforgettable guidance, continuous support, meticulous supervision and kind sincere encouragement, she saved no time nor effort in helping me in every fine detail of this work.

I would like to thank all my colleagues in the Unit of Phoniatics, Ain Shams University for their help and support.

Last but not least, I would like to thank all patients participated in this study for their sincere kind cooperation.

Rasha Shoeib
