Science and Education,
Cairo- Egypt.

Effect of Temperature on The Removal of Some Heavy Elements by Friedel's Salt

A Thesis

Submitted to the Chemistry Department,
Women's College, Ain Shams University
In Partial Fulfillment of the Requirements for
the Degree of M. Sc. in Chemistry.

Presented by

Heba Amine El-said Ahmed Sharaf
(B.Sc., 2008)

Supervisors

Prof. Dr. Essam A. Kishar

Prof. of Inorganic Chemistry
Women's College,
Ain Shams University, Cairo, Egypt.

Prof. Dr. Tarek M. El-sokary

Prof. of Physical Chemistry,
Housing and Building National
Research Center, Cairo, Egypt.

Dr. Maha R. Mohamed

Ass. Prof. of Inorganic Chemistry
Women's College,
Ain Shams University, Cairo, Egypt.

(2016)

Effect of Temperature on The Removal of Some Heavy Elements by Friedel's Salt

THESIS ADVISORS

APPROVED

Prof. Dr. Essam A. Kishar

Prof. of Inorganic Chemistry

Prof. Dr. Tarek M. El-sokary

Prof. of Chemistry in Housing and
Building National Research Center

Ass. Prof. Dr. Maha R. Mohamed

Ass. Prof. of Inorganic Chemistry

APPROVED

Head of Chemistry Department

Prof. Dr. Mansoura Ismail

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

الحمد لله الذي له ما في
السموات وما في الأرض
وله الحمد في الآخرة
وهو الحكيم الخبير

صدق الله العظيم

سوره سبأ الآيه (١)

Ain Shams University,

Science and Education,
Cairo- Egypt.

Student Name : Heba Amine El-said Ahmed Sharaf

Scientific Degree: B. Sc.

Department: Chemistry

Name of Faculty: Faculty of Girls

University: Ain Shams University

B. Sc. Graduation Date: 2008

ACKNOWLEDGMENT

Praise and Thanks be to **ALLAH**, the most merciful for assisting and directing me the right way.

I would like to submit my gratitude, sincere thanks and appreciation to ***Prof. Dr. Essam A. Kishar***, Professor of Inorganic Chemistry, Women's College, Ain Shams University, for suggesting the subject of this work, useful guidance, kind help, continuous interest, and fruitful discussion, which have facilitated the interpretation of the data throughout the chapters of this study as well as preparation the thesis in its final form.

I would like to express my deepest thanks to ***Prof. Dr. Tarek M. El-sokary***, Prof. of Physical Chemistry in Housing and Building National Research Center, for his kind help, talented supervision and criticism, useful directions, valuable and fruitful discussion during all the steps of the study.

My deepest gratitude and appreciation to ***Ass. Prof. Dr. Maha R. Mohamed***, Ass. Prof. of Inorganic Chemistry, Women's College, Ain Shams University, for her deep concern in this work, brilliance and effort in guiding and continuous help throughout the whole work.

Thanks are also to all members of the Chemistry Department, Women's College, Ain Shams University, for their help.

Heba Amine

NOTE

Beside the work done in this thesis, the candidate has attended post -graduate courses for one year in inorganic and analytical chemistry including the following topics:

- Instrumental Analysis.
- Thermodynamic Chemistry.
- Kinetics and Catalysis.
- Nuclear Chemistry.
- Structural Inorganic Chemistry.
- Electrochemical Analysis.
- Special Topics.
- Spectroscopy.
- Coordination Chemistry.
- Photo Chemistry.
- Advanced Chemical Reactions.
- English Language.

She has successfully passed written examinations in the above mentioned topics.

List of Figures	I
Abstract	a
<u>CHAPTER (I)</u> <u>Introduction and Aim of the Work</u>	
I. A. Literature Survey	1
I. A. 1. Friedel's salt composition	1
I. A. 2. Structure of Friedel's salt	2
I. A. 3. Preparation of Friedel's salt	9
I. A. 4. Stability and solubility of Friedel's salt	14
I.A.5. Friedel's salt as an adsorbent	16
I. A. 5.i. Adsorption of anions by Friedel's salt	17
I. A. 5.ii. Adsorption of cations by Friedel's salt	25
I. B. Aim of the work	29
<u>CHAPTER (II)</u> <u>Materials, Techniques and Instruments</u>	
II. A. 1. Materials	31
II.B. Techniques	31
II.B.1. Preparation of samples	31
II.B.1.i. Preparation of tricalcium aluminate, C_3A ,	31

(3CaO.Al ₂ O ₃)	
II.B.1.ii. Preparation of Friedel's salt	32
II.B.2. Procedures	34
II.B.2.i. Determination of the solubility and stability of Friedel's salt at different pH values:	34
II.B.2.ii. Preparation of Friedel's salt metal complexes.	34
II.B.2.iii. Determination of the effect of temperature on the adsorption kinetics of iron and cobalt on FS:	35
II.C. Instrumentation.	35
II.C.1. X-Ray Diffraction Analysis (XRD)	35
II.C.2. Atomic Absorption (AA)	35
II.C.3. Infrared spectroscopic measurements (IR)	36
<u>CHAPTER (III)</u> <u>Results and Discussion</u>	
III. A. The solubility and stability of Friedel's salt at different pH values.	37
III. B. Kinetics of adsorption of iron on Friedel's salt.	43
III.B.1. Iron adsorption on Friedel's salt at room temperature.	43
III.B.1.i. Adsorption of different concentrations of iron at pH=4.	43
III.B.1.ii. Adsorption of different concentrations of iron at pH=6.	55

III.B.2. Effect of temperature on the adsorption of 0.5mM FeCl ₃ .6H ₂ O on Friedel's salt at pH 4.	66
III.C. Kinetics of adsorption of cobalt on Friedel's salt.	71
III.C.1. Cobalt adsorption at room temperature.	71
III.C.1.i. Adsorption of different concentrations of cobalt at pH=4.	71
III.C.2. Effect of temperature on adsorption of 0.5 mM of CoCl ₂ .2H ₂ O at pH=4 on Friedel's salt.	79
Summary and Conclusion	83
