IMMUNOLOGICAL ASPECTS OF UVEITIS

Essay submitted for partial fulfillment of master
degree of ophthalmology

By

Shereen Samir Banoub
M.B.,B.Ch. Ain Shams University

Supervised by

Prof.Dr. Hoda M. Saber Naiem
Professor of ophthalmology
Faculty of Medicine-Ain Shams University

And

Dr.Tarek Ahmed Al-Mamoun
Lecturer of ophthalmology
Faculty of Medicine-Ain Shams University

Faculty of Medicine
Ain Shams University
Cairo
2001

B
20/5/9

ACKNOWLEDGEMENT

First and foremost, I thank God.

I would like to express my profound gratitude and sincere thanks to **Professor Dr. Hoda M. Saber Naiem**, Professor of Ophthalmology, Faculty of Medicine, Ain Shams University who offered her precious time, kind instructions and reassuring advice for supervising this work. She has been of great help in the initiation, progress and completion of this work.

I also wish to express my sincere gratitude and deep thanks to **Dr. Tarek Ahmed Al-Mamoun**, Lecturer of Ophthalmology, Faculty of Medicine, Ain Shams University for his skillful supervision, valuable instructions, generous support and patience during the preparation of this work.

LIST OF CONTENTS

ACKNOWLEDGEMENT.....	1
LIST OF CONTENTS.....	2
LIST OF TABLES.....	3
LIST OF ABBREVIATIONS.....	4
LIST OF FIGURES.....	6
INTRODUCTION.....	9
CHAPTER 1	
GENERAL ORGANIZATION OF THE IMMUNE SYSTEM.....	11
CHAPTER 2	
CHARACTERS OF THE IMMUNE SYSTEM OF THE EYE.....	41
CHAPTER 3	
UVEITIS ASSOCIATED WITH INFECTIONS.....	48
I-Bacterial infections.....	48
II-Fungal infections.....	56
III-Parasitic infections.....	64
IV-Viral infections.....	77
CHAPTER 4	
UVEITIS NOT ASSOCIATED WITH INFECTION.....	90
I-Uveitis confined to the eye.....	90
II-Autoimmune uveitis associated with systemic involvement.....	115
CHAPTER 5	
MEDICAL THERAPY OF UVEITIS.....	134
SUMMARY.....	155
REFERENCES.....	157
ARABIC SUMMARY.....	193

LIST OF TABLES

Table 1: Characteristics of human immunoglobulins.....	26
Table 2: Cytokines, Type, Source, Target and effect.....	28
Table 3: Some diseases and their HLA associations.....	35
Table 4: Antigens of <i>Toxoplasma gondii</i>	67
Table 5: The diagnostic criteria of ARN and PORN.....	89
Table 6: Preparations of corticosteroids.....	135

List of abbreviations

AA: African-American.
AAU: Acute anterior uveitis.
AC: anterior chamber.
ACAID: Anterior chamber-associated immune deviation.
ACE: Angiotensin converting enzyme.
ADCC: Antibody-dependent cell-mediated cytotoxicity.
Ag: Antigen.
AIDS: Acquired immunodeficiency syndrome.
APCs: Antigen presenting cells.
APMPPE: Acute Posterior Multifocal Placoid Pigment Epitheliopathy.
ARN: Acute retinal necrosis.
CD: Cluster of differentiation.
CMV: Cytomegalovirus.
CSF: Cerebrospinal fluid.
CTC: Cytotoxic T cell.
DTH: Delayed type hypersensitivity.
EBV: Epstein-Barr virus.
ELISA: Enzyme linked immuno-sorbent assay.
GM-CSF: Granulocyte-macrophage colony-stimulating factor.
HIV: Human immunodeficiency virus.
HLA: Histocompatibility lymphocyte antigens.
HSV: Herpes Simplex virus.
HTLV-1: Human T-cell lymphotropic virus type 1.
HZV: Herpes Zoster virus.
Ig: Immunoglobulin.
IL-1: Interleukin-1.
INF: Interferon.

M: Mixed.

MEWDS: Multiple Evanescent White-Dot Syndrome.

MHC: Major histocompatibility complex.

MPS: Mononuclear phagocyte system.

NK: Natural killer cell.

O: Oriental.

PC: Pneumocystis Carinii.

PCR: Polymerase chain reaction.

POHS: Presumed ocular histoplasmosis syndrome.

PORN: Progressive outer retinal necrosis.

PPD: Purified protein derivative.

RES: Reticulo-endothelial system.

RPE: Retinal pigment epithelium.

SO: Sympathetic ophthalmitis.

TB: Tuberculosis.

TCR: T cell receptor.

TGF- β 1: Transforming growth factor-Beta 1.

Th: T-Helper cell.

TNF: Tumour necrosis factor.

Ts: T-Suppressor cell.

W: white.

List of Figures

Number	Page
1: One lobule of a Thymus.....	13
2: Spleen.....	15
3: Lymph node.....	17
4: Structure of human IgG molecule.....	25
5: The classical and alternative pathways of complement activation.....	30
6: A-Structure of class I antigen. B- Structure of class II antigen.....	33
7: Functional responses of T cells.....	36
8: The outflow of CSF from cranial and spinal subarachnoid spaces along two pathways across arachnoid villi into sinus blood, and along cranial and spinal nerves into cervical lymphatic vessels.....	42
9: Solitary choroidal granuloma in tuberculous choroiditis.....	48
10: Molted fundus pigmentation in a patient with a history of syphilitic retinitis.....	50
11: Neuroretinitis in acquired Syphilis.....	51
12: Post-inflammatory iris atrophy in a case of Leprosy.....	55
13: Peripapillary atrophy and small, multifocal, discrete, hypopigmented chorioretinal lesions (histo spots) outside the vascular arcades in a case of POHS.....	58
14: Macular choroidal neovascularization in case of POHS.....	59
15: The early fluorescein angiogram of the membrane.....	59
16: Solitary, deep, white retinal infiltrates in Candidiasis.....	61
17: Vitritis associated with fluffy white "cotton balls" in Candidiasis.....	62
18: Solitary focal retinitis adjacent to an old scar in Toxoplasmosis.....	65
19,20: Another example of Toxoplasmosis and the fluorescein angiogram shows extensive late leakage of dye.....	66
21: Retinal scar with the presence of an active retinitis next to it (satellite lesion) typical of Toxoplasmic retinochoroiditis.....	67
22: Cartoon showing anatomic areas from which purified Toxoplasma antigens have been isolated.....	68
23: Large multifocal, slightly elevated, round or oval, plaque-like, yellowish choroidal lesions predominantly involving the posterior pole in choroidal pneumocystosis.....	73
24: Juxta papillary granuloma in Toxocariasis.....	74
25: Immune responses to viral invasion.....	78

26: Yellow-white areas of retinitis and haemorrhage which typically start at the posterior pole and then frequently spread along the vascular arcades in CMV retinitis.....	80
27: Periphlebitis in CMV retinitis.....	81
28: Rapidly progressive, full-thickness necrotizing retinitis characterized by retinal opacification and perivasculitis in Herpes simplex retinitis.....	83
29: Post-inflammatory focal iris atrophy in HZV infection.....	85
30: Confluent peripheral occlusive necrotizing vasculitis in ARN.....	87
31: PORN: Deep multifocal opacification, giving rise to a peripheral necrotizing retinitis, the progression is very rapid and there is early involvement of the optic disc and macula.....	89
32: Multifocal choroiditis involving the entire fundus in sympathetic ophthalmitis (Dalen-Fuchs' nodules).....	93
33: Small keratic precipitates evenly distributed on the corneal endothelium typical for Fuchs' heterochromic cyclitis.....	95
34: Iris heterochromia in Fuchs' heterochromic cyclitis.....	95
35: Iris atrophy in Fuchs' heterochromic cyclitis.....	96
36: Iris pupillary (koepe) nodules in Fuchs' heterochromic cyclitis.....	96
37: Large and small keratic precipitates concentrated mainly inferiorly, also note the presence of posterior synechiae in chronic anterior uveitis.....	98
38: Vitreous condensation (floaters) with intermediate uveitis.....	99
39: Vitritis (vitreous cells) with intermediate uveitis.....	100
40: Snowball opacities in the vitreous of intermediate uveitis.....	100
41: MEWDS. Numerous, very small white dots at the level of RPE most prominent at the posterior pole and mid-periphery.....	102
42: Fluorecein angiogram of MEWDS.....	102
43: Multifocal choroiditis with panuveitis syndrome. Small discrete, old and fresh choroidal lesions located at the mid-periphery and fewer at the posterior pole.....	104
44: Fluorescein angiogram of multifocal choroiditis with panuveitis syndrome.....	104
45: Punctate inner choroidopathy. Small, yellow indistinct choroidal lesions, all of the same age at the posterior pole.....	105
46: Fluorescein angiogram of punctate inner choroidopathy.....	105
47: APMPE. Large cream-colored, placoid lesions at the level of the RPE located at the posterior pole and mid-periphery.....	107
48, 49: Fluorescein angiography shows initial dense hypofluorescence followed by late diffuse staining.....	108
50: Birdshot retinochoroidopathy. Moderate size, creamy yellow deep ovoid spots with indistinct edges, which radiate from the optic disc toward the equator.....	111
