PHYSIOLOGICAL STUDIES ON CITRUS ROOTSTOCK SEEDLINGS

By

ALAA AHMED MOKHTAR EL-ATEEK

*A Thesis Submitted in Partial Fulfillment
of
The Requirements for the Degree of
Master of Science*

In

**Agriculture science
(Pomology)**

**Department of Horticulture
Faculty of Agriculture, Moshtohor
Zagazig University, Benha Branch**

2003

B

ACA-

PHYSIOLOGICAL STUDIES ON CITRUS ROOTSTOCK SEEDLINGS

By

ALAA AHMED MOKHTAR EL-ATEEK
B. Sc. Agric. Sci., 1982

Under the Supervision of

PROF. DR.
MOHAMED ABD – EL WAHAB KHAMIS

Prof. of Pomology

DR.
KHALED ALI BAKRY

Lecture of Pomology

Department of Horticulture
Faculty of Agriculture, Moshtohor
Zagazig University
Benha Branch

2003

APPROVAL SHEET

**PHYSIOLOGICAL STUDIES ON CITRUS
ROOTSTOCK SEEDLINGS**

By

ALAA AHMED MOKHTAR EL-ATEEK

B. Sc. Agric. Sci., 1982

This thesis for M. Sc. Degree has been Approved by :

Prof. Dr. : M. Fahmy

Prof. Dr. : M. A. Khair

Prof. Dr. : Chamud M. Sheraf

Date of Examination : / / 2003

CONTENTS

	Page
I – INTRODUCTION	1
II – REVIEW OF LITERATURE	3
III- MATERIALS AND METHODS	37
IV- RESULTS AND DISCUSSION	44
IV.1. Vegetative growth.....	44
IV.1.1. Stem length	45
IV.1.2. Root length	48
IV.1.3. Plant height.....	49
IV.1.4. Stem diameter	53
IV.1.5. Number of leaves per plant.....	55
IV.1.6. Leaf area	57
IV.1.7. Number of roots per plant.....	61
IV.1.8. Top fresh weight	63
IV.1.9. Root fresh weight.....	66
IV.1.10. Total plant fresh weight.....	68
IV.1.11. Top dry weight	72
IV.1.12. Root dry weight.....	74
IV.1.13. Total plant dry weight	78
IV.1.14. Top /root ratio	79
IV.2. Effect of citrus rootstock kind, effective microorganism (EM) levels and method of application on leaf chemical content of three citrus rootstocks seedlings.....	 83
IV.2.1. Determination on leaf pigments.....	83
IV.2.1.1. Leaf chlorophyll “A” content.....	83
IV.2.1.2. leaf chlorophyll “B” content	86
IV.2.1.3. leaf carotenoids content	88
IV.2.2. Leaf mineral content	90
IV.2.2.1. Leaf “N” content	90
IV.2.2.2. Leaf phosphorus content.....	92

IV.2.2.3. Leaf potassium content	95
IV.2.2.4. Leaf calcium content.....	99
IV.2.2.5. Leaf magnesium content.....	102
IV.2.2.6. Leaf Iron content.....	103
IV.2.2.7. Leaf manganese content.....	108
IV.2.2.8. Zinc content.....	109
V- SUMMARY AND CONCLUSION	114
VI –REFERENCES	120
VII – ARABIC SUMMARY.....	

LIST OF TABLE

Table (1)	Preparing 100 liter of different concentration EM solution.	40
Table (2)	Stem length of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	47
Table (3)	Root length of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	50
Table (4)	Plant height of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	52
Table (5)	Stem diameter of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	54
Table (6)	Number of leaves/plant of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	58

Table (7)	Leaf area of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	60
Table (8)	Number of roots/plant of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	62
Table (9)	Top fresh weight of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	65
Table (10)	Root fresh weight of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	70
Table (11)	Total plant fresh weight of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	71
Table (12)	Top dry weight of citrus rootstock seedlings as effected by specific effect of rootstock species; level, application method of effective Microorganism (EM) and interaction effect of their combinations during 1999 – 2000 and 2000 – 2001 seasons.	76
