**A PHYTOCHEMICAL INVESTIGATION OF SOME
PLANTS BELONGING TO FAMILY FABACEAE
AND FAMILY APOCYNACEAE**

A Thesis

Presented to

Faculty of Pharmacy, Alexandria University

In Partial fulfillment of the Requirements for the degree

Of

Doctor of Philosophy

In

PHARMACEUTICAL SCIENCES

PHARMACOGNOSY

By

**HALA HELMY AHMED ABDEL-HAMID
ZAATOUT**

M. Pharm. Sci. (Pharmacognosy)

Alexandria University 2002

Department of Pharmacognosy

Faculty of Pharmacy

Alexandria University

Egypt

2009

Advisors' Committee:

Prof. Dr. Sawsan E. El-Masry

Emeritus Professor of Pharmacognosy
Faculty of Pharmacy
Alexandria University

Dr. Hala M. Hammoda

Assistant Professor of Pharmacognosy
Faculty of Pharmacy
Alexandria University

**A PHYTOCHEMICAL INVESTIGATION OF SOME
PLANTS BELONGING TO FAMILY FABACEAE
AND FAMILY APOCYNACEAE.**

**Presented by
HALA HELMY AHMED ABDEL-HAMID
ZAATOUT**

**For the degree of
Doctor of Philosophy
In
PHARMACEUTICAL SCIENCES
PHARMACOGNOSY**

Examiners' Committee:

Prof. Dr. Sawsan E. El-Masry

Emeritus Professor of Pharmacognosy
Faculty of Pharmacy
Alexandria University

Prof. Dr. Nabil Ahmed Abdel-Salam

Emeritus Professor of Pharmacognosy
Faculty of Pharmacy
Alexandria University

Prof. Dr. Abdel-Monem Mohamed Ateya

Emeritus Professor of Pharmacognosy
Faculty of Pharmacy
Zagazig University

Approved

S. El-Masry

To My Family

ACKNOWLEDGEMENTS

First of all, I would like to express my greatest gratitude to my supervisor, Prof. Sawsan E. El-Masry for suggesting the point, her insightful advice, guidance, and full support during my PhD study. Her preciseness on research provides an excellent example for me. I also deeply appreciate Dr. Hala M. Hammouda for her guidance and kindness.

I would like to express my great thanks to Prof. Maged S. Abd Al-Kader for his support and expert guidance. I am grateful to Professor Masouda E. Amer for helpful discussions and support.

My thanks are due to the Late Prof. Nabil El-Hadidi, Department of Botany, Faculty of Science, Cairo University, and Prof. Rafik EL-Gharib, Department of Botany, Faculty of Science, Alexandria University, for their assistance in plant samples identification.

I am thankful to Dr. Amal H. Aly for her help in performing mass spectral analyses of some compounds. I also want to acknowledge Dr. Mohamed Radwan for helping with NMR and HRESI-MS analyses of compounds I-IV.

I should also thank College of Pharmacy-King Saud University and National Center for Natural Product Research-University of Mississippi.

Many thanks to my colleagues and friends especially Dr. Hattem Mekky and Dr. Amr El-Hawiet for their help in literature collection, Dr. Eman Shawky and Dr. Hoda Fathy Sherif for their continuous help.

I also thank other technical staff for their enthusiastic help.

This work was supported in part by Alexandria University and Supreme Council of Universities, Egypt and I wish to thank Faculty of Pharmacy and Alexandria University for offering me the lab and facilities for my study.

Finally, I express my gratefulness and thank to my parents, my sisters, my kids, and my husband, for their selfless love; without their support, I could not achieve my goal. I want to thank all my relatives and friends who share whatever happiness and sadness with me in my life.

LIST OF TABLES	iv.
LIST OF FIGURES	vi.
LIST OF SCHEMES	ix.
ABBREVIATIONS	x.
I. INTRODUCTION	1
1. Genus <i>Erythrina</i>	1
1.1 Traditional uses of some <i>Erythrina</i> species	1
1.2 Evidence based biological activities of the <i>Erythrina</i> plants and extracts	2
1.3 Flavonoids of the genus <i>Erythrina</i> . An update	3
1.3.1 Physiological activities of <i>Erythrina</i> flavonoids	3
1.3.2 Chemistry of <i>Erythrina</i> flavonoids	3
1.3.3 Biological activities and SAR of <i>Erythrina</i> flavonoids	22
1.3.3.1 Biological activities	22
1.3.3.2 SAR of <i>Erythrina</i> flavonoids	24
1.3.3.2.1 Groups essential for antioxidant and radical scavenging activity	24
1.3.3.2.2 Groups essential for protein tyrosine phosphatase 1B activity	24
1.3.3.2.3 Groups essential for antimicrobial and antiplasmodium activities	25
1.3.3.2.4. Groups essential for HIV-1 protease inhibitory activity	25
1.3.3.2.5. Groups essential for cytotoxic activity	25
1.3.3.2.6 Groups essential for estrogenic activity	25
2-Genus <i>Nerium</i>	26
2.1 Description	26
2.2 Toxicity of <i>Nerium oleander</i>	26
2.3 Traditional uses of <i>Nerium oleander</i>	26
2.4 Main constituents of <i>Nerium oleander</i>	27
2.5 Evidence based biological activities of <i>Nerium oleander</i>	27
II. AIM OF THE WORK	28
III. MATERIALS, METHODS AND EQUIPMENTS	29
IV. RESULTS	
PART I	
Phytochemical investigation of <i>Erythrina caffra</i> Thumb. and <i>Erythrina lysistemon</i> Hutch., family Fabaceae	
CHAPTER 1	
Investigation of the alcohol extract of <i>Erythrina caffra</i> Thumb. flowers	38
CHAPTER 2	
Characterization of compounds I-IV	
General characters of compounds I – IV	41
Characterization of compound I	42
Characterization of compound II	49

Characterization of compounds III and IV	55
CHAPTER 3	
Investigation of the chloroform and the alcohol extracts of <i>Erythrina caffra</i> Thumb. stem bark	66
CHAPTER 4	
Characterization of compounds EC-2-EC-7, EC-A1 and EC-A2	
Characterization of compound EC-2	70
Characterization of compounds EC-3 and EC-6	74
Characterization of compounds EC-4, EC-5 and EC-7	82
Characterization of compounds EC-A1 and EC-A2	104
CHAPTER 5	
Investigation of the methylene chloride extract of <i>Erythrina lysistemon</i> Hutch. stem bark	117
CHAPTER 6	
Characterization of compound E-8	119
PART II	
Phytochemical investigation of <i>Nerium oleander</i> L., family Apocynaceae	
CHAPTER 1	
Investigation of the alcohol extract of <i>Nerium oleander</i> L. fruits	126
CHAPTER 2	
Characterization of compounds N1-N4	
Characterization of compound N1	130
Characterization of compounds N2 and N3	138
Characterization of compound N4	147
PART III	
Biological activities of some fractions and the isolated flavonoids	
A- Preliminary cytotoxic bioassay for <i>Erythrina caffra</i> flowers extract and fractions using brine shrimp lethality test	151
B- Antimicrobial, antiprotozoal and cytotoxic activities of the isolated flavones from <i>Erythrina caffra</i> flowers	154
C- Antimicrobial activity of the isolated isoflavones from <i>Erythrina caffra</i> and <i>Erythrina lysistemon</i> stem barks	155
V. GENERAL SUMMARY AND CONCLUSION	157
VI. REFERENCES	164
VII. ARABIC SUMMARY	

LIST OF TABLES

Table		Page
1.	Flavones from the genus <i>Erythrina</i>	4
2.	Flavonols from the genus <i>Erythrina</i>	5
3.	Flavanones from the genus <i>Erythrina</i>	5
4.	Chalcones and chalconols from the genus <i>Erythrina</i>	9
5.	Isoflavones from the genus <i>Erythrina</i>	10
6.	Isoflavanones from the genus <i>Erythrina</i>	13
7.	Isoflavanols from the genus <i>Erythrina</i>	15
8.	Isoflavans from the genus <i>Erythrina</i>	15
9.	Isoflav-3-enes from the genus <i>Erythrina</i>	15
10.	Pterocarpanes from the genus <i>Erythrina</i>	16
11.	6a-Hydroxypterocarpanes and pterocarpone from the genus <i>Erythrina</i>	18
12.	Pterocarpenes (Dehydro pterocarpanes) from the genus <i>Erythrina</i>	19
13.	Aryl benzofurans from the genus <i>Erythrina</i>	19
14.	Coumestans from the genus <i>Erythrina</i>	20
15.	Miscellaneous from the genus <i>Erythrina</i>	21
16.	Antibacterial activities of some potent <i>Erythrina</i> flavonoids (MIC, $\mu\text{g/ml}$)	23
17.	Systems for TLC	30
18.	Fractionation of the ethyl acetate fraction of <i>Erythrina caffra</i> flowers	38
19.	Fractionation of the butanol fraction of <i>Erythrina caffra</i> flowers	39
20.	Physical characters and TLC behavior of compounds I- IV	41
21.	UV spectral data [λ_{max} , nm] of compound I	42
22.	$^1\text{H-NMR}$, $^{13}\text{C-NMR}$ data (δ ppm) and some significant long range H-C correlations of compound I	43
23.	UV spectral data [λ_{max} , nm] of compound II	49
24.	$^1\text{H-NMR}$ and $^{13}\text{C-NMR}$ data (δ ppm) compound II	50
25.	UV spectral data [λ_{max} , nm] of compound III	55
26.	UV spectral data [λ_{max} , nm] of compound IV	56
27.	$^1\text{H-NMR}$ and $^{13}\text{C-NMR}$ spectral data (δ ppm) compounds III and IV	57
28.	Fractionation of the chloroform extract of <i>Erythrina caffra</i> bark	66
29.	Physical characters and TLC behavior of compound EC-2	70
30.	$^1\text{H-NMR}$ and $^{13}\text{C-NMR}$ spectral data (δ ppm) of compound EC-2	70
31.	Physical characters and TLC behavior of compounds EC-3 and EC-6	74
32.	$^1\text{H-NMR}$ and $^{13}\text{C-NMR}$ spectral data (δ ppm) of compounds EC-3 and EC-6	74
33.	Physical characters and TLC behavior of compounds EC-4, EC-5 and EC-7	82
34.	UV spectral data [λ_{max} , nm] of compounds EC-4, EC-5 and EC-7	82
35.	$^1\text{H-NMR}$, $^{13}\text{C-NMR}$ data (δ ppm) and some significant long range H-C correlations of compound EC-4	85
36.	$^1\text{H-NMR}$, $^{13}\text{C-NMR}$ data (δ ppm) and some significant long range H-C correlations of compound EC-7	90
37.	$^1\text{H-NMR}$, $^{13}\text{C-NMR}$ data (δ ppm) and some significant long range H-C correlations of compound EC-5	96
