

**Effect of Laser Biostimulation on Mandibular  
Distraction Osteogenesis: An Experimental  
Study.**

**Thesis**

Submitted to the Faculty of Dentistry, Ain Shams  
University, in partial fulfillment of the requirements for  
Doctor Degree in Oral and Maxillofacial Surgery

By

**Said Abd Allah Kamel Taha**

B.D.S 1998, M.Sc. 2008. Cairo University, Assistant  
researcher,  
National Research Center

Oral and Maxillofacial Surgery Department  
Faculty of Dentistry, Ain Shams University

2015

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَنَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ

الْحَكِيمُ ﴿٣٢﴾

# **Supervisors**

## **Assist. Prof. Dr. Salah Abd El Fattah Ahmed**

Assistant Professor of Oral and Maxillofacial Surgery  
Faculty of Dentistry, Ain Shams University

## **Prof. Dr. Ehab Said Abd El Hamid.**

Vise Dean and Professor of Oral Pathology  
Faculty of Dentistry, Ain Shams University

## **Prof. Dr. Mohamed Ayad Abd El Hamid**

Professor of Surgery, Anaesthesiology and Radiology  
Faculty of Veterinary Medicine, Cairo University

## **Prof. Dr. Amany Hussein Neamat**

Professor of Oral Pathology, Oral Surgery and Medicine  
Department, National Research Center

# Acknowledgement

Thanks are all to GOD for blessing me this work until it has reached its end, as a little part of his generous help through my life.

I would like to express my great respects and gratitude to Prof.Dr. **Salah Abd El Fattah Ahmed**, Assist. Professor and head Oral and Maxillofacial Surgery Department Faculty of Dentistry, Ain Shams University For his continuous help, guidance and supervision and for his encouragement and faithful support during this study.

I wish to express my deep gratitude and profound appreciation to Prof.Dr. **Ehab Said Abd El Hamid**.Vise Dean and Professor Oral Pathology, Faculty of Dentistry, Ain Shams University for his kind supervision, continuous encouragement and unlimited support.

I'm also grateful and expressing my deep thanks and appreciation to Professor Dr. **Mohamed Ayad Abd El Hamid**, Professor of Surgery, Faculty of Veterinary Medicine, Cairo University for his infinite guidance, help, great support, encouragement, assistance, supervision and faithful advice.

I wish gratefully to acknowledge and express my respects to Prof. Dr. **Amany Hussein Neamat**, Professor Oral Pathology, Oral Surgery and Medicine Department, head of Orodental Reaserch Division, National Research Center for her valuable supervision, encouragement & guidance.

I would like to express my great respects and thanks to Prof.Dr.**Mushira Salah El Din**, Professor of Oral Medicine, Faculty of Oral and Dental medicine, Cairo University For her help, guidance and encouragement during this study.

I am indebted to Ass.Prof. Dr. **Hanaa El Shenawy**, Assistant Professor in Oral Surgery and Medicine Department, National Research Centre for her continuous valuable guidance, faithful assistance during every step of this current work.

My great thanks to Dr. **Hany El Zohairy**, assistant lecturer in oral radiology department, Ain Shams University for his help in blind investigation of results of the study.

My great and deep thanks and deep respect to the entire staff members and all the workers in both Oral and Maxillofacial Surgery Department Faculty of Dentistry, Ain Shams University and the Department of Veterinary Surgery Faculty of Veterinary Medicine, Cairo University for their lovely assistance and their great activity during the experimental work

# Dedication

*This simple work is dedicated to my  
merciful parents,  
to my lovely wife, to the spirit of my  
missed kids, to all who will read this  
one day and find it useful, thank you  
for your time and trust.....*

## *List of Tables*

<b>Table No.</b>	<b>Description</b>	<b>page</b>
Table (1)	<b>Radiographic assessment scoring system of all groups</b>	48
Table (2)	<b>Resulted radiographic assessment scoring system of all groups</b>	71
Table (3)	<b>Mean density measurements in control &amp; laser groups showing Sagittal, Axial and Coronal sections</b>	84
Table (4)	<b>Comparison between control and laser groups regards bone density at 2 weeks.</b>	85
Table (5)	<b>Comparison between control and laser groups regards bone density at 4 weeks.</b>	86
Table (6)	<b>Comparison between control and laser groups regards bone density at 8 weeks.</b>	87
Table (7)	<b>Comparison between control and laser groups regards bone density (regardless time)</b>	88
Table (8):	<b>One-way ANOVA multiple comparisons between time regards bone density among control groups</b>	89

<b>Table No.</b>	<b>Description</b>	<b>page</b>
Table (9)	<b>One-way ANOVA multiple comparisons between time regards bone density among laser groups</b>	90
Table (10)	<b>Histomorphometric analysis of new bone parameters (mean values)</b>	105
Table (11)	<b>Comparison between control and laser groups regards histology at 2 weeks</b>	106
Table (12)	<b>Comparison between control and laser groups regards histology at 4 weeks.</b>	108
Table (13)	<b>Comparison between control and laser groups regards histology at 8 weeks.</b>	110
Table (14)	<b>Comparison between control and laser groups regards histology regard less time.</b>	112
Table (15)	<b>One-way ANOVA multiple comparisons between time regards histology among control group</b>	115
Table (16)	<b>One-Way ANOVA Post Hoc multiple comparisons between the time regard histology significance.</b>	117
Table (17)	<b>One-way ANOVA multiple comparisons between time regards histology among laser group</b>	118
Table (18)	<b>One-Way ANOVA Post Hoc multiple comparisons between the time regarding histology significance</b>	119

## *List of figures*

Figure	Description	Page
Fig.(1)	The basic components of a laser.	15
Fig.(2)	Illustration showing the difference between the data capture system of regular CT and CBCT.	35
Fig.(3)	Intraoral distractor bone born with distraction length/turn=0.5mm.	52
Fig.(4)	Skin was shaved, scrubbed and the animal was wrapped with sterile drape to isolate the field.	52
Fig.(5)	Soft tissues were reflected exposing inferior border of the mandible to the level of alveolar bone..	53
Fig.(6)	Osteotomy through buccal and lingual cortical plates.	53
Fig.(7)	Distraction device fixed in place with hexagonal part exposed in the submental region through small skin incision.	54
Fig.(8)	Surgical wound was sutured in layers.	54
Fig.(9)	Sirolaser Advance, Diode laser device 970nm.	55
Fig.(10)	Laser irradiation directed perpendicular to the skin over the inferior border opposite the distraction site.	55
Fig.(11)	Laser irradiation applied perpendicular to the crestal region of distracted regenerate bone between the 3rd and 4th premolars.	56
