EFFECT OF HANDLING AND STORAGE TECHNIQUES ON THE QUALITY OF SOME AGRICULTURAL PRODUCTS

BY

Adel Hamed Bahnasawy

B. Sc. (Agricultural Mechanization), 1987

Faculty of Agriculture, Moshtohor

Zagazig Univ.,

M. Sc. (Agricultural Mechanization), 1993

Faculty of Agriculture, Moshtohor

Zagazig Univ.,

A THESIS

Submitted in Partial Fulfillment of The
Requirements for the Degree
of

DOCTOR OF PHILOSOPHY

IN

AGRICULTURAL SCIENCE
(AGRICULTURAL MECHANIZATION)

AGRONOMY AND AGRICULTURAL
MECHANIZATION DEPARTMENT

FACULTY OF AGRICULTURE, MOSHTOHOR
ZAGAZIG UNIVERSITY
BENHA BRANCH

1999

50 0 1 2

APPROVAL SHEET

Thesis Title

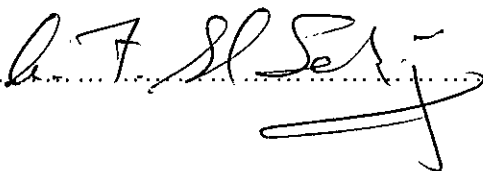

**EFFECT OF HANDLING AND STORAGE TECHNIQUES ON THE
QUALITY OF SOME AGRICULTURAL PRODUCTS**

By

ADEL HAMED BAHNASAWY

Approval Committee

Prof. Dr.

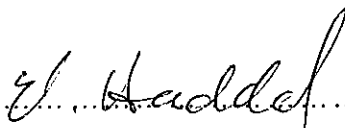

Prof. Dr.

Prof. Dr.

Prof. Dr.

Date of Discussion 19/10/1999

DEDICATION

This work is dedicated to my professors, my parents, my wife and my sons (Ahmed and Abdel Rahman) for their encouragement, support and love.

LIST OF ABBREVIATIONS AND SYMBOLS	
ACKNOWLEDGEMENTS	
CONTRIBUTIONS TO KNOWLEDGE	
1. INTRODUCTION	1
2. OBJECTIVES	3
3. SCOPE OF WORK	4
4. LITERATURE REVIEW	5
4.1 Onion Cultivars.....	5
4.2 Onions Production.....	5
4.3.Physical Properties of Onions.....	6
4.3.1 Bulb Diameter.....	6
4.3.2 Volume.....	8
4.3.3 Shape and Shape Factor.....	9
4.3.4 Surface Area.....	10
4.3.5 Weight.....	10
4.3.6 Density.....	11
4.3.7 Specific Gravity.....	11
4.3.8 Moisture Content	12
4.4 Mechanical Properties of Onions.....	14
4.4.1 Crushing Load.....	14
4.4.2 Puncture Resistance.....	15
4.5 Physiological Properties	16
4.5.1 Respiration	16
4.5.1.1 Measurement of Respiration Rate	18
4.5.1.2 Factors Affecting Respiration Rate	20
4.5.1.2.1 Type of commodity and genotype	20
4.5.1.2.2 Stage of development at harvest	21
4.5.1.2.3 Chemical composition	23
4.5.1.2.4 Temperature	24
4.5.1.2.5 Oxygen concentration.....	25
4.5.1.2.6 Carbon dioxide concentration.....	26
4.5.1.2.7 Carbon monoxide concentration	27
4.5.1.2.8 Ethylene concentration	28
4.5.1.2.9 Physical stress	28
4.5.2 Transpiration	29
4.5.2.1 Measurement of Transpiration Rate	30
4.5.2.2 Factors Affecting Transpiration Rate	31
4.5.2.2.1 Water vapor pressure deficit	31
4.5.2.2.2 Air movement	32

	Page
4.5.2.2.3 Heat of respiration	33
4.5.2.2.4 Size, shape and surface area	33
4.5.2.2.5 Surface structure	35
4.5.2.2.6 Maturity	36
4.5.2.2.7 Skin and tissue permeability	36
4.6 Onion Storage	37
4.6.1 Traditional Storage.....	37
4.6.2 Ventilated Storage	38
4.6.3 Cold Storage	41
4.6.4 Controlled Atmosphere Storage	43
4.7 Onion Storage Diseases	45
4.7.1 Microbial Diseases.....	45
4.7.1.1 Fungal diseases.....	45
4.7.1.2 Bacterial diseases	47
4.7.2 Physiogenic and Other Disorders.....	49
4.7.2.1 Sun scald	49
4.7.2.2 Translucent scales	49
4.8 Factors Affecting Onion Quality During Storage	50
4.8.1 Cultural Practices	50
4.8.1.1 Planting methods	50
4.8.1.2 Chemical fertilizers application.....	51
4.8.1.3 Water application.....	52
4.8.1.4 Soil conditions.....	53
4.8.2 Treatments Before Harvesting.....	54
4.8.3 Harvesting	56
4.8.3.1 Maturity at harvesting	56
4.8.3.2 Harvesting methods	57
4.8.4 Handling and Processing After Harvesting	59
4.8.4.1 Onion curing and topping.....	59
4.8.4.3 Irradiation.....	60
4.8.4.4 Onion packaging	61
4.8.5 Storage Environmental Conditions	62
4.8.5.1 Temperature.....	62
4.8.5.2 Relative humidity	64
4.8.5.3 Air circulation	65
4.9 Storage Models.....	66
4.9.1 Respiration Models.....	66
4.9.2 Respiration Models.....	79
5. FIELD EXPERIMENT	84

6.8.5 Onion Deterioration	175
6.9 Discussion	179
6.9.1 The Traditional Onion Storage System.....	179
6.9.1.1 Temperature	179
6.9.1.1.1 The onion pile.....	179
6.9.1.1.2 The straw cover.....	185
6.9.1.2 Relative Humidity.....	189
6.9.1.2.1 The onion pile.....	189
6.9.1.2.2 The straw cover.....	193
6.9.1.3 Moisture Content	197
6.9.1.4 Onion Deterioration	198
6.9.2 The Modified Onion Storage System.....	202
7.9.2.1 Temperature	202
6.9.2.1.1 The onion pile.....	202
6.9.2.1.2 The straw cover.....	205
6.9.2.2 Relative Humidity.....	212
6.9.2.2.1 The onion pile.....	212
6.9.2.2.2 The straw cover.....	217
6.9.2.3 Carbon Dioxide Concentration.....	222
6.9.2.4 Moisture Content	223
6.9.2.5 Onion Deterioration	226
6.10 Conclusions	232
 7. MODELLING OF ONION STORAGE SYSTEM.....	 236
7.1 Background.....	236
7.2 Model Development.....	236
7.2.1 Heat and Mass Balances	238
7.2.1.1 Heat Balance	238
7.2.1.1.1 Heat of Respiration.....	238
7.2.1.1.2 Heat from Solar Radiation.....	238
7.2.1.1.3 Heat incoming or outgoing with the ventilation air.....	240
7.2.1.1.4 Heat transferred through the straw cover.....	241
7.2.1.1.5 Heat required for moisture evaporation	241
7.2.1.2 Moisture Balance	243
7.2.2 Weather Data	243
7.2.3 Thermophysical Properties	244
7.2.3.1 Thermophysical Properties of Onions.....	244
7.2.3.2 Water Vapor Pressure Deficit.....	246
7.3 Computer Program	247
 8. MODEL ESULTS, VALIDATION AND EXPERIMENTATION.....	 250
8.1 Model Validation	250
8.1.1 Weather Data	250

	Page
8.1.1.1 Ambient Temperature	250
8.1.1.2 Ambient Relative Humidity.....	251
8.1.2 Temperature Inside the Onion Pile.....	254
8.1.3 Temperature on the Straw Cover.....	254
8.2 Model Experimentation	257
8.2.1 Some Thermal and Physical	257
8.2.1.1 Equilibrium Moisture Content.....	257
8.2.1.2 Vapor Pressure Deficit.....	3257
8.2.2 Temperature Inside the Onion Pile.....	259
8.2.3 Moisture Loss	259
8.3 Conclusions	264
9. CONCLUSIONS.....	265
10. RECOMMENDATIONS.....	271
11. REFERENCES.....	272
APPENDIX.....	296
Flow chart of the theoretical computations.....	297
ARABIC SUMMARY	

LIST OF TABLES

Table	Page
4.1 The cultivated area and production of onion in Egypt during the period of from 1980-1994 (CAPMS of A.R.E., 1980-1994).....	6
4.2 Onions exports by various countries during the period of 1976-1993 (FAO, 1976-1993).....	7
4.3 Physical properties of various sizes of Granex onions. (Maw et al., 1996).....	8
4.4 The heat of respiration of different types of vegetable (FAO, 1989).....	17
4.5 Classification of horticultural commodities according to their respiration rates at 5 °C (Kader, 1986)	19
4.6 Rates of CO ₂ production of vegetables at various constant temperatures, approximate equilibrium rates are in parentheses (Ryall and Lipton, 1979).....	22
4.7 The temperature respiration coefficient (Q ₁₀) for various temperature ranges (Kader, 1987).....	25
4.8 Recommended storage temperatures for vegetables (Robinson et al., 1975).....	63
5.1 Some characteristics of the onion (Giza 20) used in this study.....	85
5.2 The sunrise and sunset times during the storage period.....	92
5.3 The average temperatures recorded in the onion pile and straw cover at various locations and times of the day.....	94
5.4 The average relative humidity recorded in the onion pile and straw cover at various locations and times of the day.....	104
5.5 The average onion moisture content measured during the storage period (June-August, 1996).....	110
5.6 The deterioration loss of onions measured during the storage period (June-August, 1996).....	110
5.7 The average temperature recorded at different locations and times of the day for the onion pile.....	117
5.8 The average temperature recorded at various locations and times of the day in the straw cover.....	121

Table	Page
5.9 The average relative humidity recorded at various locations and times of the day in the onion pile.....	125
5.10 The average relative humidity recorded at various locations and times of the day in the straw cover.....	127
6.1 Some characteristics of the onion used (Yellow Globe) in this study.....	138
6.2 The sunrise and sunset times during the period of August-September in Halifax, Nova Scotia, Canada.....	151
6.3 The average weekly diurnal temperature recorded in the onion pile and straw cover at different locations of the traditional onion storage system.....	153
6.4 The average weekly diurnal temperature recorded in the onion pile and straw cover at different locations of the modified onion storage system.....	154
6.5 The average weekly diurnal relative humidity recorded in the onion pile and straw cover at different locations of the traditional onion storage system...	165
6.6 The average weekly diurnal relative humidity recorded in the onion pile and straw cover at different locations of the modified onion storage system.....	167
6.7 The carbon dioxide concentration inside the onion pile at different depths during the storage period (August-September) for the traditional and the modified storage systems.....	175
6.8 The average onion moisture content measured during the storage period (August-September) for the traditional and the modified storage systems.....	177
6.9 The deterioration loss of onions measured during the storage period (August-September) for the traditional and the modified storage systems.....	177
6.10 The average temperature recorded at different locations and times of the day in the onion pile for the traditional system in Egypt and Canada.....	182
6.11 The average temperature recorded at different locations and times of the day in the straw cover for the traditional system in Egypt and Canada.....	187
6.12 The average relative humidity recorded at different locations and times of the day in the onion pile for the traditional system in Egypt and Canada.....	191
6.13 The average relative humidity recorded at different locations and times
