

Minimally invasive unicompartmental knee replacement with a nonimage-based navigation system

Essay submitted for fulfillment of master degree in
Orthopedics by

Hisham Mahmoud Abdel Wahab Mohamed

Supervised by

Prof. Akram Hassan Azzam

Professor of Orthopedics

Cairo University

Dr. Ahmed Samir Barakat

Lecturer of Orthopedic surgery

Cairo University

Faculty of Medicine

Cairo University

2010

Abstract

In the future more controlled studies are necessary to validate its superiority when compared to standard non navigated surgical techniques, especially as there are no long term studies in the comprehensive lecturers.

Key word: unicompartamental , nonimage-based , Orthopedics

Acknowledgement

I would like to express my deepest gratitude and profound respect to Professor Dr **Akram Hassan Azzam**, Professor of Orthopaedic Surgery, Faculty of Medicine, Cairo University for his meticulous supervision and valuable guidance and support.

I am also greatly indebted to Dr **Ahmed Samir Barakat**, Lecturer of Orthopedic surgery Faculty of Medicine, Cairo University for his great support, encouragement and precious advice.

I sincerely acknowledge the great help and encouragement from my family, my colleagues and everyone who contributed to this work.

Contents

1) Introduction	1
2) Relevant Anatomy and Biomechanics	3
3) Computer assisted surgery	30
a) Definition	30
b) History and basic of CAOS	31
c) Types of computer assisted surgery	41
4) Unicompartmental knee replacement	59
a) Rationale	59
b) Indications	61
c) Operative techniques	64
○ Conventional	67
○ Computes assisted surgery	84
d) Advantages of computer assisted unicompartmental knee replacement	101
e) Difficulties	103
f) Complications	105
5) Summary	117
