

Effect of an Experimental Hydroxyapatite Based Remineralizing Agent on the Chemistry and Surface Topography of Bleached Enamel (In Vitro Study)

THESIS

Submitted to Operative Dentistry Department

Faculty of Dentistry

Ain Shams University

for

Partial Fulfillment of the Requirements for the Doctor's Degree

In Operative Dentistry

By

Shahinaz Nabil Hassan Mohamed

B.D.S, Faculty of oral and dental medicine

M.Sc, Faculty of oral and dental medicine

Cairo University

2016

« قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا إِنَّكَ
أَنْتَ الْعَلِيمُ الْحَكِيمُ »

صدق الله العظيم

سورة البقرة الآية (٣٢)

Supervisors

PROF. MOKHTAR NAGY IBRAHIM

Former Dean, Professor of Operative Dentistry

Operative Dentistry Department

Faculty of Dentistry

Ain Shams University

PROF. MOHAMED HUSSEIN ZAAZOU

Researcher Professor of Operative Dentistry

Restorative and Dental Materials Research Department

Head of Oro-Dental Division

National Research Centre

Acknowledgement

*First of all, I would like to kneel thanking for **ALLAH**, the most beneficial that enabled me to conduct this work.*

*I would like to express my respect, sincere gratitude and acknowledge to **Prof. Mokhtar Nagy Ibrahim**, Former Dean of Faculty of Dentistry and Professor of Operative Dentistry, Operative Dentistry Department, Ain Shams University, for his valuable, unlimited precious advices and generous supervision with his sparkling enthusiasm during the whole work.*

*I am deeply grateful to **Prof. Mohamed Hussein Zaazou**, Researcher Professor of Operative Dentistry, Restorative and Dental Materials Research Department, Head of Oro-Dental Research Division. National Research Centre, for his precious guidance, continuous help and valuable support throughout the study.*

*I would like to thank **Dr. Marwa Atef Sherif**, Associate Professor researcher, Inorganic Chemistry Department, National Research Centre, for her great help and cooperation through the study.*

*Special thanks to **Dr. Lamiaa Mohmoud Moharam**, Researcher of Operative Dentistry, Restorative and Dental Materials Research Department, National Research Centre, for her devoted efforts, meticulous help and continuous advices.*

With all gratitude, I am very grateful to my lovely parents and my supporting husband for their encouragement. Without their support and precious help this work would have never been finished.

Dedications

*To my encouraging parents,
well supporting husband and
my lovely daughters*

List of Tables

Table No.	Title	Page
1	Materials description, composition, manufacture and batch number.	29
2	Levels of investigation.	35
3	Factorial design of investigation.	36
4	Composition of artificial saliva.	36
5	Effect of different bleaching agents on the mean Phosphorus ion level	43
6	Effect of two different remineralizing agents within each of the two bleaching agents on the mean Phosphorus ion level.	45
7	Effect of the three storage media within each of the two bleaching agents and the two remineralizing agents on the mean Phosphorus ion level.	47
8	Effect of different bleaching agents on the mean Calcium ion level.	49
9	Effect of two different remineralizing agents within each of the two bleaching agents on the mean Calcium ion level.	50
10	Effect of the three storage media within each of the two bleaching agents and the two remineralizing agents on the mean Calcium level.	53
11	Effect of different bleaching agents on the mean surface roughness.	54
12	Effect of two different remineralizing agents within each of the two bleaching agents on the mean surface roughness.	56
13	Effect of the three storage media within each of the two bleaching agents and the two remineralizing agents on the mean roughness surface.	58

List of Figures

Figure No.	Title	Page
1	White smile in-office photo-activated bleaching material.	37
2	White smile in-office chemically-activated bleaching material.	37
3	Amorphous calcium phosphate relief gel (ACP).	38
4	Specimens arrangement on glass slab.	38
5	White smile lightening lamp.	39
6	Application of white smile in-office chemically-activated bleaching agent.	39
7	Environmental energy dispersive x-ray analysis (EDX) connected to Scanning electron microscope (SEM).	40
8	Stereomicroscope.	40
9	energy dispersive x-ray analysis (EDX) connected to Scanning electron	41
10	X-ray pattern of the experimentally prepared Nano-hydroxyapatite (NHAP).	42
11	Transmission electron microscope (TEM) picture of the experimentally prepared (NHAP).	42
12	Bar-chart of the effect of the two different bleaching agents on the Phosphorus ion level.	44
13	Bar-chart of the effect of the two remineralizing agents within each of the two bleaching agents on the Phosphorus ion level.	45
14	Bar-chart of the effect of the three storage media within each of the bleaching agents and the two remineralizing agents on the Phosphorus ion level.	48
