**Approval Sheet**  
**Ph.D. Thesis**

**Entitled**

**Improvements in the Quality and Economy of  
Sintered Zircon-Alumina Refractories Made by the  
Semi-dry Pressing and Casting Techniques**

**Thesis Advisors:**

**Approved**

**Prof. Dr. Ebtissam A. Saad**

**Professor of Inorganic Chemistry,  
Department of Chemistry, Faculty of  
Science, Ain-Shams University.**

**Prof. Dr. I.A. Nasr**

**Prof. of Refractories Technology,  
Department of Refractories, Ceramics  
and Building Materials, NRC**

**Prof. Dr. S.B. Hanna**

**Head of the Department of  
Refractories, Ceramics and Building  
Materials, NRC**

*S.B. Hanna*

**Credit**

**Prof. Dr. M.A. El-Kasaby**

*M.A. El-Kasaby*  
**Head of Chemistry Department  
Faculty of Science  
Ain Shams University**

***Ain Shams University***

***Faculty of Science***

***Name of Candidate*** : Mohammad Awaad Ahmad

***Degree Awarded*** : M.Sc. in Chemistry

***Faculty*** : Science

***University*** : Ain Shams

***Date of Graduation*** : May 1989

***Grade of Graduation*** : Very good with honor degree

## ACKNOWLEDGMENT

The author wishes to express his deep gratitude to **Prof. Dr. E.A. Saad**, Professor of Inorganic Chemistry, Chemistry Department, Ain Shams University, for her kind supervision, continuous encouragement, advice, critical reading of the manuscript and guidance especially during the latest phase of the present work.

My Sincere appreciation is extended to **Prof. Dr. I.A. Nasr**, Professor of Refractories Technology, National Research Centre, for his continuous supervision, constructive criticism and cooperation during the course of this investigation till his death in 2001.

The author express his deep appreciation to **Prof. Dr. S.B. Hanna**, Head of Refractories, Ceramics and Building Materials, National Research Centre, for his invaluable discussion, criticism and continued help during the course of this work.

List of Figures	i
List of Tables	ix
ABSTRACT	xi
INTRODUCTION	1
<i>Aim of the Work</i>	6
 CHAPTER I:   Densification, Phase Constitution and Microstructure of Zircon-Alumina-Silica (ZAS) Compositions	 8
Materials and Methods of Investigation	9
Results and Discussion	12
<i>Chemical Composition of the Starting Materials</i>	12
<i>Preparation of Fired Specimens</i>	12
Expected Fusion Temperatures of the ZAS Compositions	14
Effect of Alumina:Silica weight Ratio on Densification and Phase Constitution of ZAS Compositions	13
Densification of Fired Specimens	13
Phase Constitution of Fired Specimens	22

Effect of Partial Replacement of Alumina and Silica Contents with 20-weight % Clay on Densification and Phase Constitution of ZAS Compositions	25
Densification of Fired Specimens	26
Phase Constitution of Fired Specimens	29
Effect of Additives ( $\text{Na}_2\text{O}$ & $\text{CaO}$ ) on Densification and Phase Constitution of ZAS Compositions	33
Densification of Fired $\text{Na}_2\text{O}$ -Containing Specimens	33
Phase Constitution of Fired $\text{Na}_2\text{O}$ -Containing Specimens	36
Densification of Fired $\text{CaO}$ -Containing Specimens	38
Phase Constitution of Fired $\text{CaO}$ -Containing Specimens	41
Effect of Zircon Content on Densification and Phase Constitution of ZAS Compositions	44
Effect of Additives ( $\text{Na}_2\text{O}$ & $\text{CaO}$ ) on Phase Constitution of ZAS Compositions	53
Effect of $\text{Na}_2\text{O}$ and $\text{CaO}$ Addition on the Densification, Phase Constitution and Microstructure of ZAS Compositions	56
Densification of Fired $\text{Na}_2\text{O}$ -Containing Specimens	57
Densification of Fired $\text{CaO}$ -Containing Specimens	60
