**BIOPHYSIOLOGICAL STUDIES OF CERTAIN
INSECTICIDES ON COTTON LEAFWORM**

***Spodoptera littoralis* (Boisd.)**

BY

Samir Mohammed Hashem

B. Sc. Agric., (Pesticides), Alex. University (1969)

M. Sc. Agric., (Pesticides), Cairo University (1977)

THESIS

Submitted in Partial Fulfillment of the Requirements

For the Degree of

DOCTOR OF PHILOSOPHY

IN

AGRICULTURAL SCIENCE

(Pesticides)

Plant Protection Department

Faculty of Agriculture, Moshtohor

Zagazig University (Benha Branch)

2002

B 719c

**BIOPHYSIOLOGICAL STUDIES OF CERTAIN
INSECTICIDES ON COTTON LEAFWORM
Spodoptera littoralis (Boisd.)**

BY

Samir Mohammed Hashem

B. Sc. Agric., (Pesticides), Alex. University
M. Sc. Agric., (Plant Protection), Cairo University

Under the supervision of:

Prof. Dr. Faris Amin. Mohamed El-Lakwah

Professor of Economic Entomology,
Plant Protection Department,
Faculty of Agriculture, Moshtohor,
Zagazig University, Benha branch.

Faris El. Lakwah

Prof. Dr. El-Sayed Helmy Abd El-Karim *Karim*

Professor of Economic Entomology,
Plant Protection Department,
Faculty of Agriculture, Moshtohor,
Zagazig University, Benha branch.

Prof. Dr. Mahmoud S. Abd-El-Fattah *M. Abd. El-Fattah*

Professor of Pesticides,
Population toxicology Department,
Central Agricultural Pesticides Laboratory
Agricultural Research Center, Ministry of Agriculture

APPROVAL SHEET

BIOPHYSIOLOGICAL STUDIES OF CERTAIN INSECTICIDES ON COTTON LEAFWORM *Spodoptera littoralis* (Boisd.)

BY

Samir Mohammed Hashem

B. Sc. Agric., (Pesticides), Alex. University

M. Sc. Agric., (Plant Protection), Cairo University

This thesis for Ph.D. degree has been

Approved by :

Prof. Dr. Mostafa M. Abdel-Sattar

Professor of Pesticides, Central Agricultural Pesticides Laboratory.,
Agricultural Research Center. Ministry of Agric.

Prof. Dr. Ezzat F. El-Khayat

Professor of Economic Entomology, Plant Protection Dept.,
Fac. of Agric., Moshtohor, Benha branch, Zagazig Univ.

Prof. Dr. Faris A. El-Lakwah

Professor of Economic Entomology, Plant Protection Dept.,
Fac. of Agric., Moshtohor, Benha branch, Zagazig Univ.

Prof. Dr. El-Sayed H. Abdel_Karim

Professor of Economic Entomology, Plant Protection Dept.,
Fac. of Agric., Moshtohor, Benha branch, Zagazig Univ.

Date of Examination : 19 / 10 / 2002

ACKNOWLEDGEMENT

I wish to express my deep thanks, gratitude and appreciation to **Prof. Dr. F. A. El-Lakwah**, Professor of Economic Entomology, Plant Protection Department, Faculty of Agriculture, Zagazig University for suggesting the subjects, supervision of this work, kind guidance, continuous support and reviewing the manuscript.

I would like also to express my deep gratitude and appreciation to **Prof. Dr. E. H. Abd El-Karim**, Professor of Economic Entomology, Plant Protection Department, Faculty of Agriculture, Zagazig University, for the supervision of this work, valuable suggestion during conducting of this work and reviewing the manuscript.

Deep gratitude and appreciation are also directed to **Prof. Dr. M. S. Abd-El-Fattah**, Professor of Pesticides, Population Toxicology Department, Central Agricultural Pesticide Laboratory, Agricultural Research Center, for the supervision of this work, valuable suggestion and reviewing the manuscript.

At the same time, I want to express my deep thanks and gratitude to **Prof. Dr. H. S. Radwan**, Professor of Pesticides, Faculty of Agriculture, Shebin-El-Koum for his valuable suggestion during writing the manuscript.

Last but not least, I would like to thank all members of the Departments of Population Toxicology and Pest Physiology, Agricultural Research Center and Plant Protection Department, Faculty of Agriculture, Moshtohor, Zagazig University.

Finally many thanks for everyone helped me in this work.

Samir Mohammed Hashem

CONTENTS

	PAGE
AKNOWLEDGMENT	
INTRODUCTION	1
REVIEW OF LITERATURES	6
1. Toxicological studies	6
1.1. Susceptibility and resistance phenomenon to insecticides in field populations of the cotton leafworm . <i>Spodoptera littoralis</i>	6
1.2. Selection for IGR resistance and cross-resistance in the cotton leafworm <i>Spodoptera littoralis</i>	13
1.3. Mode of action of ecdysone agonist Tebufenozide and mechanism of resistance	17
2. Physiological studies	23
2.1. Effect of insecticides on nutritional indices of the cotton leafworm larvae	23
3. Biochemical studies	44
3.1. Esterases enzyme activities	44
3.1.1. Non-specific esterase:	45
3.1.2. Acetylcholinesterase (AChE)	53
3.1.3. Aliphatic esterases (AliE)	59
3.2. Phosphatases enzyme activities	62
3.3. Carbohydrate hydrolyzing enzymes	65
3.4. Total protein	69
MATERIALS AND METHODS	73
1. Toxicological studies	73
1.1. Test insect	73
1.1.1. Laboratory reference strain	73
1.1.2. Field strains.	73
1.1.2. Insecticide-resistant strain	74
1.2. Insecticides tested.	75
1.3. Toxicological test methods	76
2. Physiological studies.	77
2.1. Assessment of the effect of sublethal concentrations of the tested insecticides on nutritional coefficients of <i>S. littoralis</i> larvae	77
2.1.1. The weight of food consumed (C.W.)	78
2.1.2. Consumption index (C.I.)	79
2.1.3. Growth rate (G.R.).	79
2.1.4. Efficiency of conversion of ingested food to body tissue (E.C.I.)	79

	PAGE
2.1.5. Efficiency of conversion of digested food to body tissue (E.C.D.)	79
2.1.6. Approximate digestibility (A.D.)	80
3. Biochemical studies	80
3.1. Preparation of samples for biochemical studies	80
3.2. Enzyme assays	81
3.2.1. Determination of non-specific esterases activities	81
3.2.2. Acetylcholineesterase (AChE) and Aliphatic esterases (AliE)	81
3.2.3. Phosphatases enzymes (AcP & AlkP)	82
3.2.4. Determination of carbohydrate hydrolyzing enzymes activities	83
3.3. Determination of Total proteins	84
3.3.1. Preparation of protein reagent	84
3.3.2. Protein assay	84
RESULTS AND DISCUSSION	86
1. Toxicological and resistance phenomenon studies	86
1.1. Susceptibility of the cotton leafworm field populations in 6 Governorates to different insecticides	86
1.2. Development of resistance and cross-resistance in the cotton leaf worm to ecdysteroid agonist Tebufenozide	96
2. Physiological studies	100
2.1. Antifeeding activity of different pesticides against larvae of field and laboratory populations of the cotton leafworm	101
2.2. Weight of food consumed (C.W.)	105
2.3. Consumption index (C.I.)	107
2.4. Growth Rate (G.R.)	111
2.5. Efficacy conversion of ingested food (E.C.I.)	114
2.6. Approximate digestibility (A.D.)	118
2.7. Efficacy conversion of digested food (E.C.D.)	121
3. Biochemical studies	125
3.1. Non-specific esterases (α -E) and (β -E)	125
3.2. Acetylcholineesterase (AChE)	134
3.3. Aliphatic esterase (AliE)	140
3.4. Changes in phosphatases activity	144
