SYSTEMIC LUPUS ERYTHEMATOSUS IN EGYPTIAN HOSPITALS BASED STUDY

CAV707

Thesis

Submitted for the partial fulfillment
Of master degree in internal medicine

By

El-Sayed Tolba El-Sayed Shehata

M. B. B. Ch

Supervised By

Prof. Dr. Medhat El-Shafee

M. B. B. Ch, DM, DCV, MD

Professor of internal medicine

and head of clinical immunology & allergy Dept.

Faculty of medicine – Ain Shams university

Dr. Maged Mohamed Refaat

Assistant professor of internal medicine,

clinical immunology & allergy

Faculty of medicine – Ain Shams university

Dr. Mohamed Abd-Elrhman El-Shayeb

Lecturer of internal medicine,

clinical immunology & allergy

Faculty of medicine – Ain Shams university

Acknowledgements

First of all, thanks to God for helping me to achieve this work.

I wish to express my deep gratitude to Prof. Dr. Medhat El-Shafee Professor of internal medicine and head of clinical immunology Department Faculty of medicine - Ain Shams university for his continuous and great help with kind cooperation throughout this work.

I would like to express my special endless thanks to Prof. Dr. Maged Refaat Assistant professor of internal medicine and Allergy and clinical immunology Faculty of medicine – Ain shams university for his suggesting and planning this work. He patiently guided me on the right way. I am definitely indebted to him more than I express.

I am very grateful to Dr, Mohammed Abd-Elrhman El-Shayeb lecturer of internal medicine and allergy and clinical Immunology Faculty of medicine of medicine – Ain Shams university for his encouragement and great help to me all over the time.

List of Abbreviations

ACR	: american college of rheumatology.
ANA	: antinuclear antibodies.
APLA	: antiphospholipid antibodies.
CNS	: central nerveous system.
DHA	: docosa hexaenoic acid.
ds DNA	: double stranded deoxynucleic acid.
ECG	: electrocardiogram.
ELISA	: enzym linked immunosorbent assay.
EMG	: electromyography
ESR	: erythrocytic sedimentation rate.
EPA	: eicosa pentanoic acid.
GIT	: gastro intentional tract.
HLA	: human leucocytic antigen.
Ig	: Immunoglobulin.
LBT	: lupus band test.
LDH	: lactic dehydrogenase.
MHC	: major histocompatibility complex.
MPS	: mononuclear phagocytic system.
MZ	: monozygotic
NSAIDS	: non steroidal anti-inflammatory drugs.
PTT	: partial thromboplastin time.
RBC	: Red blood cell.
SCLE	: subacute cutaneous lupus erythematosus.
SLE	: Systemic lupus erythematosus.
TIA	: transient ischemic attack
UVL	: Ultra violet light.
WHO	: World health organization.

LIST OF TABLES

	page
Table (1): Mechanisms of immunologic injury is SLE.	11
Table (2): Lupus erythematosus – specific skin lesions.	18
Table (3): Non specific but disease related skin lesions in patients with LE.	19
Table (4): The 1982 revised criteria of the American college of Rheumatology (ACR) for diagnosis SLE.	36
Table (5): Sensitivity and specificity of various immunological tests for SLE.	39
Table (6): Sex distribution compared with other series.	69
Table (7): Major clinical manifestations in the present study compared with previous series.	70
Table (8): Mucocutaneous manifestations in 150 patients with SLE.	71
Table (9): Musculoskeletal manifestations in 150 patients with SLE	72
Table (10): Renal manifestations in 150 patients with SLE	72
Table (11): Neuro psychiatric manifestations in 150 patients with SLE.	73
Table (12): Pulmonary and cardiovascular manifestations in 150 patients with SLE.	73

Table (13): Haematological abnormalities manifestation in 150 patients with SLE.	74
Table (14): Serological characteristics of 150 patients with SLE in Egypt.	75
Table (15): Comparison of SLE serology in patients from different geographic parts of the world.	76
Table (16): Statistical relationship between serological markers and clinical features of SLE.	78
