**Numerical Treatment of Convective Flow through
Porous Media with Variable Permeability via
Nonsimilarity Analysis**

A Thesis

Submitted to the Faculty of Science,
Assiut University
In Partial Fulfillment for the Degree of Master of Science
(Mathematics)

By

**Ghreeb Mohamed Ahmed Omer
B. Sc. In Mathematics (1994)**

Supervised by

Prof. Dr. I. A. Hassanien
Faculty of Science
Assiut University

Dr. F. S. Ibrahim
Faculty of Science
Assiut University

(2001-1421)

APPROVAL SHEET

Name : Ghreeb Mohamed Ahmed Omer

Thesis Title: Numerical Treatment of Convective Flow through Porous Media with Variable Permeability via Non-similarity Analysis.

Degree: Master of Science (Mathematics)

Courses: Fluid Dynamics - Numerical Analysis – Special Course – Differential Equations – Mathematical Analysis – Hydrodynamics – Workshop.

Supervisors

1- Prof. Dr. I. A. Hassanien

Prof. of Math. Faculty of Science, Assiut Univ.

2- Dr. F. S. Ibrahim

Faculty of Science, Assiut Univ.

Examination Committee

External:

1- Prof. Dr. M. A. Khider

Prof. of Math. Faculty of Science, Ain Shams Univ.

2- Prof. Dr. Abd Alla El-Marhomy

Prof. of Math. Faculty of Engineering, Ain Shams Univ.

Internal:

3- Prof. Dr. I. A. Hassanien (Faculty of Science, Assiut Univ.)

4- Dr. F. S. Ibrahim (Faculty of Science, Assiut Univ.)

Prof. Dr. M. B. Mazen

Vice-Dean for Graduate studies and Research

Acknowledgement

All gratitude is due to ALLAH Elmageed who guided and aided me to bring forth to light this thesis.

My deep gratitude and sincere thanks are dedicated to my supervisors Prof. Dr. I.A. Hassanien and Dr. F.S. Ibrahim, for suggesting the topics in this thesis, warm encouragement, their constructive guidance, and active discussions through the development of this thesis.

I am very grateful to Prof. M.I. Mahmoud, head of Mathematics Department, Faculty of Science, Assiut University.

It is a pleasure to express my great thanks to Dr. Osama A. Rashwan for his great help.

Also, I am very grateful to all members of the staff and colleagues of the mathematics Department at Assiut University for their invaluable help and advice.

Abstract	i
Nomenclature	ii
Caption of figures	v
1 General Introduction	
1.1 Background	1
1.2 Darcy and non-Darcy models	4
1.2.1 The Darcy flow model	4
1.2.2 Non-Darcian models	6
1.3 Convective flow through porous media.....	10
1.4 Local nonsimilarity method.....	15
1.5 Boundary layer theory.....	24
1.6 Basic equations.....	29
1.6.1 The continuity equation... ..	29
1.6.2 The momentum equations.....	29
1.6.3 The energy equations.....	31
1.7 Scope of the thesis	31
2 Nonsimilarity solutions for mixed convection flow along non-isothermal vertical surfaces embedded in porous media with variable permeability	
2.1 Introduction... ..	35

2.2 Formulation of the problem...	38
2.3 Power –law variation of wall temperature, (VWT).....	41
2.4 Power-law variation of surface heat flux,(VHF).....	46
2.5 Numerical scheme.....	50
2.6 Results and discussion.....	52
2.6.1 Power–law variation of wall temperature, (VWT).....	53
2.6.2 Power-law variation of surface heat flux,(VHF).....	56
3 Nonsimilarity solutions for combined free and forced convection flow from horizontal surfaces in a porous medium with variable permeability	
3.1 Introduction.....	76
3.2 Mathematical Formulation	78
3.3 Power –law variation of wall temperature, (VWT)....	80
3.3.1 Forced convection dominated regime....	80
3.3.2 Free convection dominated regime....	82
3.4 Power-law variation of surface heat flux,(VHF)	
3.4.1 Forced convection dominated case....	86
3.4.2 Free convection dominated case ...	88

3.5 Results and discussion...	93
3.5.1 Power –law variation of wall temperature, (VWT)	94
3.5.2-Power-law variation of surface heat flux,(VHF).....	97
4 Effect of variable permeability and viscous dissipation on a non-Darcy natural convection with thermal dispersion	
4.1 Introduction	122
4.2 Analysis	124
4.3 Results and discussion.....	129
5 Summary and conclusions	144
References.....	148
Arabic summary.....	161
