(٣٢ / البقرة)

To ..

My beloved family

ACKNOWLEDGEMENT

First and foremost thanks to **GOD** for his help and powerful support to complete this work.

I wish to express my sincere appreciation and deep gratitude to my professor and supervisor **Prof. Dr. Shoukri Mahmoud Nassef**, Professor of Urology, Faculty of Medicine, Menoufiya University for his generous help, kind moral support, enthusiastic encouragement, precious comments and suggestions.

My sincere gratitude to **Prof. Dr. Abd El-Aleem El-Doray**, Professor of Urology, Faculty of Medicine, Menoufiya University for his patience, kindness for his help, encouragement, and enthusiastic support in this work.

My sincere thanks, deep appreciations to **Dr. Osama Abd El-Wahab Abd El-Gawad**, Lecturer of Urology, Faculty of Medicine, Menoufiya University for his continuous support, fruitful supervision, great cooperation and continuous guidance.

Special thanks to **Prof. Dr. El-Sayed Hussein Soliman**, Professor and Head of Urology Dept., Faculty of Medicine, Menoufiya University and to all staff members of the department for their kind moral support throughout this work.

Farahat

Arabic Summary	

LIST OF TABLES

	Page
Table (1): Age and sex distribution in the studied patients.	97
Table (2): Presentation of patients with ureteric stone and stricture in 41 cases	98
Table (3): Indications for ureteroscopic interventions.	98
Table (4): The side affected by the stone in 37 cases.	100
Table (5): The site affected by the stone in 37 cases.	100
Table (6): Number of the stones in 37 patients.	102
Table (7): Nature of the stones in 37 cases.	102
Table (8): The size of treated stones in 30 cases.	105
Table (9): Blood urea level in the 41 patients in the present study	105
Table (10): Serum creatinine in 41 patients in the present study.	107
Table (11): The state of the upper urinary tract by the excretory urography.	107
Table (12): Methods of stone extraction by ureteroscope	109
Table (13): Associated procedure.	109
Table (14): The rate of successful stone extraction in 37 cases.	111
Table (15): The relation of success rate to characters of stones.	113
Table (16): Causes of failure of stones removal.	114
Table (17): The level of ureteral strictures in the present series.	116
Table (18): Complications of ureteroscopy.	117
