Perioperative Management Of Patients With Coagulation Disorders

*An Assey
Submitted For Partial Fulfillment Of Master Degree In
Anesthesiology*

Presented By

Alaa Ali El Sayed Shaheen
M.B.,B.Ch.

Supervised by:

Prof.Dr.
Magda Mohamed Farid Rasmy
*Professor of Anesthesiology-Faculty of Medicine
Cairo University*

Assist.Prof. Dr.
Ahmed M. Ali
*Assistant Professor of Anesthesiology-Faculty of Medicine
Cairo University*

Assist.Prof. Dr.
Randa Ismail Badawy
*Assistant Professor of anesthesiology-Faculty of Medicine
Cairo University*

*Faculty of Medicine
Cairo University
2002*

Acknowledgment

First I should thank god the most merciful for helping me through and for whom I dedicate my success. I would also like to thank my supervisors for helping me accomplish this work and special thanks for my fiancée for giving me her precious time and effort. I would also like to thank all my family being with me at my presentation and for their prayers and blessings.

Abstract

Coagulation disorders may be broadly classified into disorders of hemostasis and disorders of thrombosis and each of them may be classified into hereditary or acquired disorders. An understanding of the normal coagulation process may help in identifying and management of coagulation disorders. Evaluating a patient with coagulation disorders include history taking, physical examination and performance of appropriate tests. The most common bleeding disorders are the sex-linked diseases now known as hemophilias next to von Willibrand disease. There are some intermediate group of coagulation disorders that include both hemostasis and thrombosis disorders which are known intermediate disorders of hemostasis.

Key words: Hemostasis - Thrombosis - Hemophilias
