**PHYSICOCHEMICAL AND ANALYTICAL STUDIES OF THE MICRO
DETERMINATION OF MUSCLE RELAXANT DRUGS IN PURE FORM
AND ITS PHARMACEUTICAL PREPARATIONS.**

A thesis submitted

By

MOHAMED SOLTAN MOHAMED EL ESOY

(B.Sc. Chemistry)

To

Zagazig University

Benha Branch

Faculty of Science

Department of Chemistry

As a Partial Fulfillment for
the Degree of Master of Science in Chemistry

Supervisors

Prof. Dr. / Hassan Ali Dossuki

Prof. of Inorganic Chemistry,

Vice Dear for Higher Studies and Researches

Dr./ Naglaa Mahmoud El Kousy

Assistant Professor of Pharmaceutical Chemistry

National Organization for Drug Control and
Research

Dr./ Alaa El-Sayed Ahmad Amin

Assistant Professor of Analytical Chemistry

Faculty of Science (Benha branch)
Zagazig University

1999

لَا عِوَمَ لَنَّا إِلَّا مَا عَلَّمْنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

سورة البقرة آية ٢٥٥

قوله

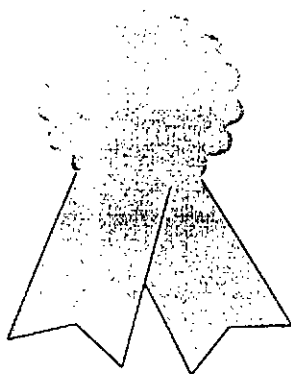

DEDICATION

TO:

My Family

My Daughters Esraa and Amira

ACKNOWLEDGEMENT

First of all. I always like to thank **ALLAH** who help me to know and learn and help me to make this work.

I wish to express my deepest gratitude to **Prof. Dr. H. A. Dossuki** Professor of Inorganic Chemistry for his supervision encouragement and helpful suggestion during this work. Also my thanks to **Dr. N. M. El Kousy** Assistant Professor of Pharmaceutical Chemistry in National Organization for Drug Control and Research for his supervision and help during this work.

I am also indebted with sincere gratitude to **Dr. A. S. Amin** Assistant Professor of Analytical Chemistry, Faculty of Science Benha branch, Zagazig University for his supervision and suggesting the problem of spectrophotometric determination, discussion and help during the scope of this work and in preparing the thesis.

My thanks to all staff members in Department of Chemistry, Faculty of Science, Benha Branch, Zagazig University for helping.

My thanks to all staff members in National Organization for Drug Control and Research.

Lastly my thanks to all persons who helped me in this work.

Contents

Chapter I

Introduction

	Page
I.1. Analysis of drugs.....	1
I.2. Skeletal muscle relaxant drugs.....	5
I.3. Trade name, chemical name, structure and characteristics of the skeletal muscle relaxant drugs under consideration.....	7
I.4. Literature survey on the previous methods reported for the studied drugs.....	9
I.4.1. Volumetric methods.....	9
I.4.2. Electrochemical method.....	9
I.4.3. Potentiometric methods.....	9
I.4.4. Ultraviolet methods.....	10
I.4.5. Colorimetric methods.....	10
I.4.6. High performance liquid chromatography HPLC.....	11
I.4.7. Thin layer chromatographic methods TLC.....	11
I.4.8. Fluorometric method.....	12
I.4.9. Polarographic method.....	12
I.5. Spectrophotometric determination of some drugs by using acid dyes technique.....	13
I.5.1. Structure of the studied acid dyes.	13
I.5.2. General aspects of ternary complexes.....	16

I.5.3. Advantage of using ternary complexes over binary complexes in analytical procedures.....	20
I.6. Use TLC/UV densitometric determination of drugs in bulk powder and in pharmaceutical preparations.....	21

Chapter II

Experimental

II.1. Apparatus.....	22
II.2. Drugs.....	22
II.3. Reagents.....	25
II.4. Market samples	26
II.5. General procedures.	27
II.5.1. Determination of the molecular structure.....	27
II.5.1.A. The molar ratio method.....	27
II.5.1.B. The continuous variation method.....	27
II.5.1.C. Bent and French's method	28
II.5.2. Spectrophotometric determination of the drug under investigations using binary complex with acid dyes	29
II.5.3. Spectrophotometric determination of the drug under investigations through ternary complex with ammonium molybdate-thiocyanate complex.....	32
II.5.4.1. TLC/UV Densitometric determination of orphenadrine citrate and tizanidine hydrochloride in pure form.....	34
II.5.4.2. Densitometric determination of orphenadrine citrate in Norgesic and Norflex tablets.....	35

II.5.4.3. Densitometric determination of tizanidine hydrochloride in sirdaloud tablets.....	35
II.6. Pharmacopoeial and official methods for analysis of studied drugs.....	36
II.6.1. Assay of orphenadrine citrate in pure form.....	36
II.6.1. Assay of orphenadrine citrate in pharmaceutical preparations.	
II.6.1.1. Assay of orphenadrine citrate in Norgesic tablets....	36
II.6.1.2. Assay of orphenadrine citrate in Norflex tablets.....	37
II.6.1.3. Assay of orphenadrine citrate in Norflex ampoules...	38
II.6.2. Assay of tizanidine hydrochloride in pure form and in dosag form.....	39
II.6.3.1 Assay of pancuronium bromide in pure form and in dosage form.....	42

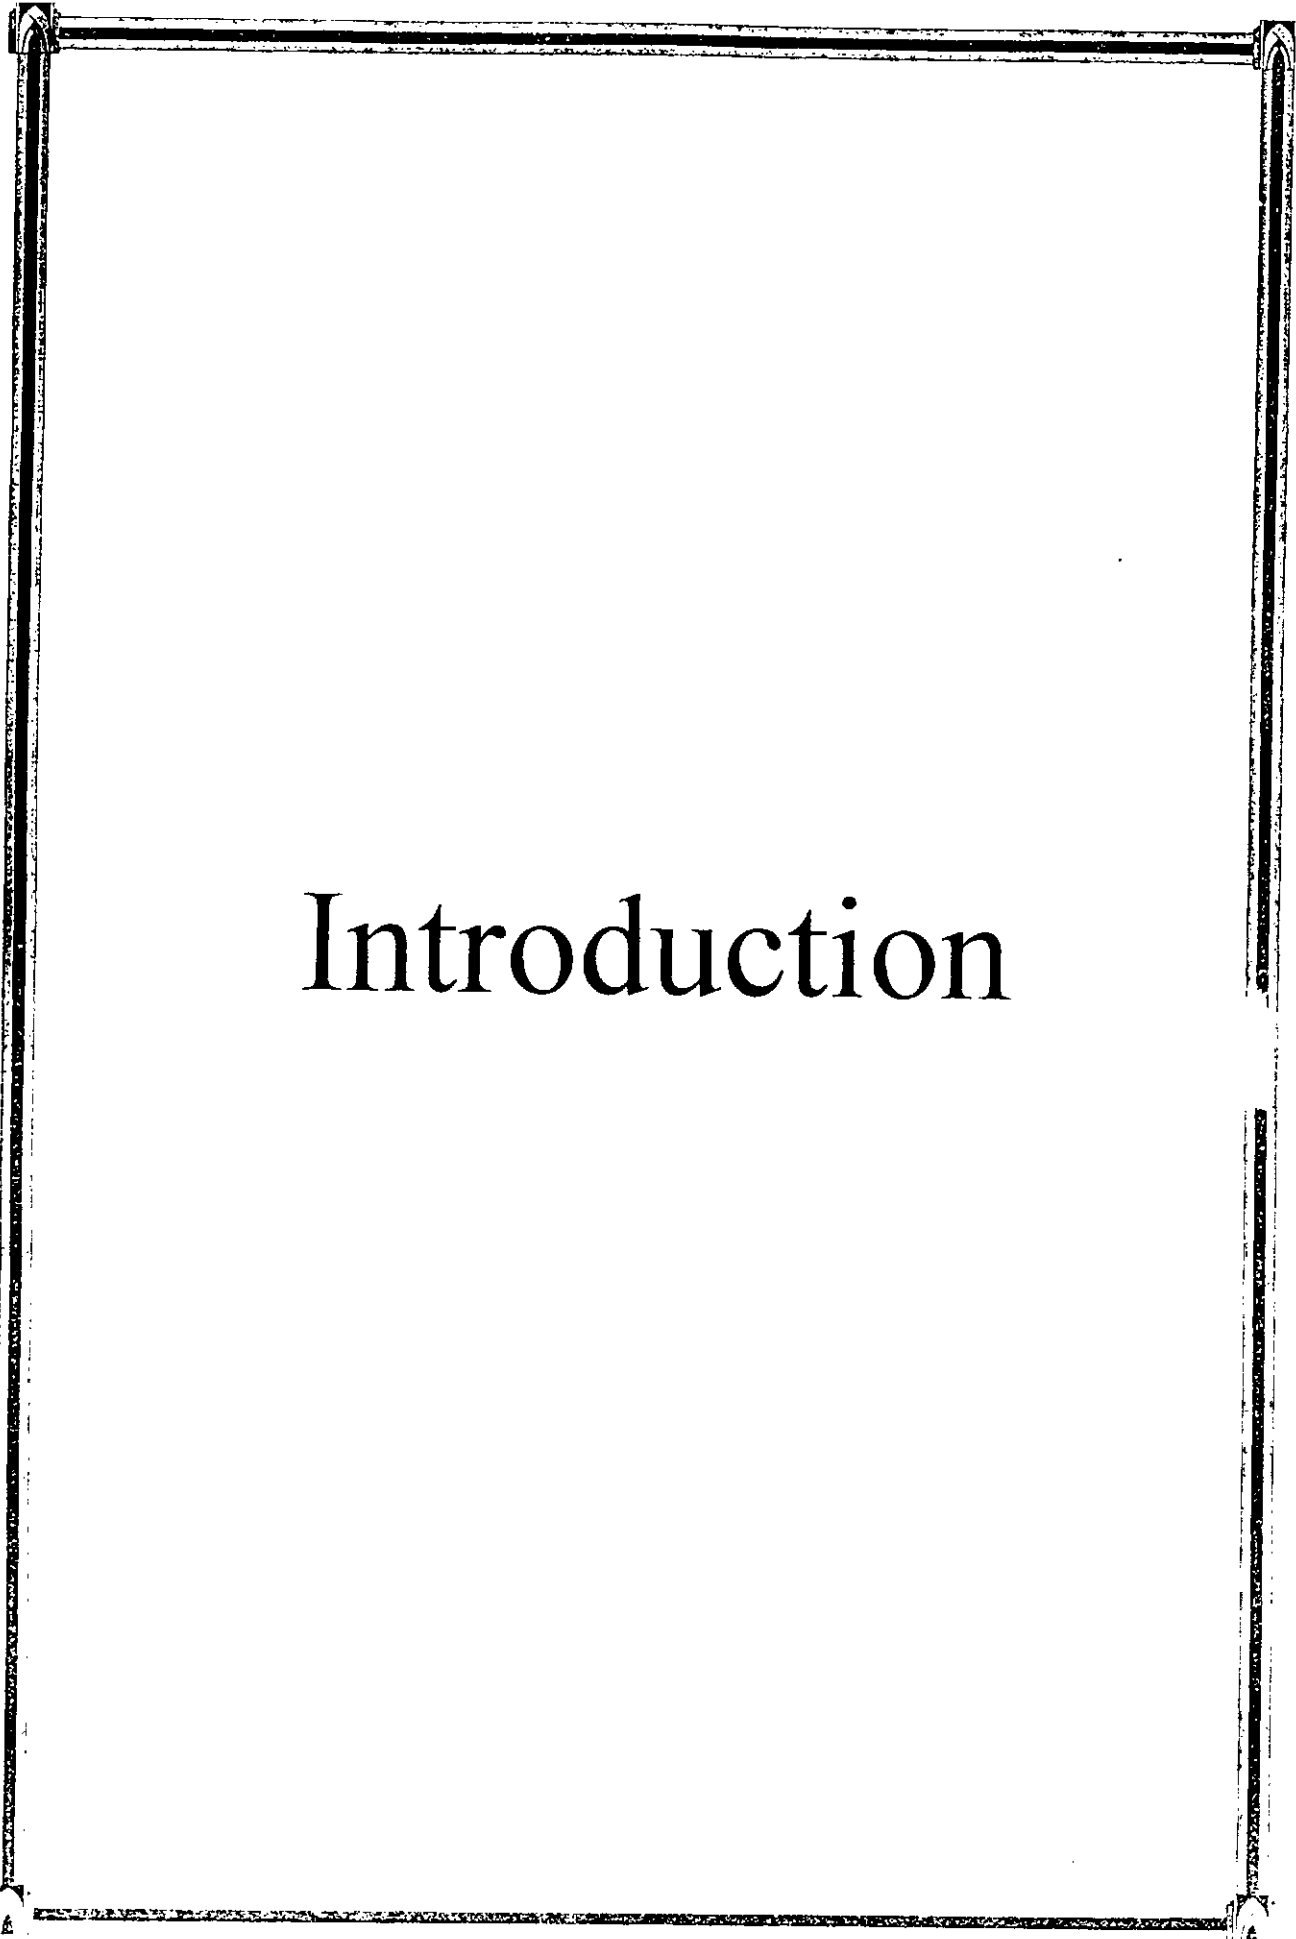

Chapter III

Results and Discussion

III.1. Determination of the drugs by binary complex formation.....	43
III.1.1. Determination of orphenadrine citrate with BTB, BPB, BCP, BCG.....	43
III.1.1.1. Effect of pH.....	43
III.1.1.2. Effect of time.....	44
III.1.1.3. Effect of the extracting solvent.....	44
III.1.1.4. Effect of reagent concentration.....	44
III.1.1.5. Molecular ratio of complexes.....	45
III.1.1.6. Suggested mechanism.....	45
III.1.1.7. Interferences.....	45

III.1.1.8. Evaluation of the stability constants of the ion-pair complexes.....	46
III.1.1.9. Statistical analysis.....	47
III.1.1.10. Validity of Beer's law.....	48
III.1.1.11. Accuracy and precision.....	49
III.1.1.12. Analytical applications.....	49
III.1.2. Determination of tizanidine hydrochloride with BTB, BPB, BCP, BCG.....	66
III.1.2.1. Effect of pH.....	66
III.1.2.2. Effect of time.....	66
III.1.2.3. Effect of the extracting solvent.....	67
III.1.2.4. Effect of reagent concentration.....	67
III.1.2.5. Nature of the complexes.....	67
III.1.2.6. Suggested mechanism.....	68
III.1.2.7. Validity of Beer's law.....	68
III.1.2.8. Accuracy and precision.....	69
III.1.2.9. Analytical applications.....	69
III.1.2. Determination of pancuronium bromide with BTB, BPB, BCP, BCG.....	83
III.1.3.1. Effect of pH.....	83
III.1.3.2. Effect of time.....	83
III.1.3.3. Effect of the extracting solvent.....	84
III.1.3.4. Effect of reagent concentration.....	84
III.1.3.5. Nature of the complexes.....	84
III.1.3.6. Suggested mechanism.....	85
III.1.3.7. Validity of Beer's law.....	85
III.1.3.8. Accuracy and precision.....	86
III.1.3.9. Analytical applications.....	86

III.2. Determination of the investigated drugs by ternary complex formation.....	100
III.2.1. Effect of acidity.....	100
III.2.2 Effect of reagent concentration.....	101
III.2.3 Effect of shaking time.....	101
III.2.4 Effect of extracting solvent.....	101
III.2.5. Effect of time and temperature.....	102
III.2.6. Interferences.....	102
III.2.7. Stoichiometry of the formed ternary complex.....	102
III.2.8. Validity of Beer's law.....	102
III.2.9. Accuracy and precision.....	103
III.2.10. Analytical applications.....	104
III.3. Determination of orphenadrine citrate and tizanidine hydrochloride by densitometric method.....	119
III.3.1. Effect of mobile phase.....	119
III.3.2. Reproducibility.....	119
Summary.....	127
