Esophageal Mucosal Changes In Type II Diabetic Patients

Thesis

Submitted to Faculty of Medicine, Tanta University
in Partial Fulfillment of the Requirements of
M.Sc Degree in Internal Medicine

By

Abdallah Ahmad El-Sayed El-Sawy

MBBch. (Tanta)

Resident in Internal Medicine

Faculty of Medicine, Tanta University

Supervisors

Prof.Dr.

Abd El-Motteleb Taha Eisa

Professor Of Internal Medicine

Faculty Of Medicine

Tanta University

Prof.Dr.

Azima Gamal El-Dein Nosseir

Prof. of Pathology

Faculty Of Medicine

Tanta University

Dr.

Sherif El-Sayed Ezzat

Lecturer of Internal Medicine

Faculty of Medicine

Tanta University

Faculty of Medicine

Tanta University

2005

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا هَا
عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ
الْحَكِيمُ

"البقرة ٣٢"

صدق الله العظيم

I'm thankful to

ALLAH

*whose care has been the only essential guidance
in my life and work.*

Acknowledgment

I would like to register my sincere gratitude and deep appreciation to my supervisors who have had a great role and offered a great support and generous advice during this work; Prof. Dr. Abd El-Motteleb Taha Eissa, Professor of Internal Medicine, Faculty of Medicine, Tanta University, Prof. Dr. Azima Gamal El-Dein Nosseir Prof. of Pathology, Faculty of Medicine, Tanta University and Dr. Sherif El-Sayed Ezzat, Lecturer of Internal Medicine, Faculty of Medicine, Tanta University.

I also would like to express my gratitude to all the staff members of Internal Medicine, Faculty of Medicine, Tanta University for their kind care and interest from my first day in this department till this moment.

CONTENTS

Introduction	1
Aim of the work	3
Review.....	4
❖ Diabetes mellitus:	4
* Definition and epidemiology.....	4
* Classification.....	5
* Diagnosis.....	11
* Glycemic control.....	12
* Complications of diabetes mellitus.....	13
❖ Diabetic neuropathy	14
❖ The esophagus:	22
* Anatomy of the esophagus	22
* Histopathology of the esophagus.....	26
* Physiology of the esophagus.....	28
❖ Effect of diabetes mellitus on gastrointestinal functions....	31
Patients and methods	43
Results	48
Discussion	82
Summary and conclusions	91
Recommendations	95
References.....	96
Arabic Summary.....	

LIST OF TABLES

Table (1):	Comparison between all studied groups as regard age.....	48
Table (2):	Comparison between all studied groups as regard sex.....	49
Table (3):	Comparison between all studied groups as regard BMI.....	50
Table (4):	Comparison between both groups I and II as regard the duration of DM	51
Table (5):	Oral hypoglycemic agents (OHA) and insulin therapy in both groups I and II.....	52
Table (6):	Comparison between all studied groups as regard fasting plasma glucose (FPG).....	53
Table (7):	Comparison between all studied groups as regard post prandial plasma glucose (PPG).....	54
Table (8):	Comparison between both groups I and II as regard glycated hemoglobin (HbA1c).....	55
Table (9):	Comparison between both groups I and II as regard the diabetic autonomic neuropathy (DAN).....	56
Table (10):	Comparison between all studied groups as regard upper gastrointestinal (GI) symptoms.....	57
Table (11):	Comparison between all studied groups as regard endoscopic findings of esophagitis.....	58
Table (12):	Comparison between all studied groups as regard histopathologic findings of esophagitis.....	59
Table (13):	Relations of diabetic autonomic neuropathy (DAN) with upper gastrointestinal (GI) symptoms in both groups I and II.....	60
Table (14):	Relations of diabetic autonomic neuropathy (DAN) with endoscopic findings of esophagitis in both groups I and II.....	62

Table (15)	Relations of diabetic autonomic neuropathy (DAN) with histopathologic findings of esophagitis in both groups I and II.....	64
Table (16):	The correlation between the duration of diabetes mellitus and upper GI symptoms, endoscopic and histopathologic findings of esophagitis in group I.....	66
Table (17):	The correlation between the duration of diabetes mellitus and upper GI symptoms, endoscopic and histopathologic findings of esophagitis in group II.....	68
Table (18):	Comparison of endoscopic and histopathologic findings of esophagitis between OHA (Oral hypoglycemic agents) and insulin treatment in both groups I and II.....	70
Table (19):	Comparison between all studied groups as regard esophageal moniliasis	72
Table (20):	The different studied parameters of group I.....	79
Table (21):	The different studied parameters of group II.....	80
Table (22):	The different studied parameters of group III.....	81

List of Figures

Figure 1:	Comparison between all studied groups as regard age.....	48
Figure 2:	Comparison between all studied groups as regard sex.....	49
Figure 3:	Comparison between all studied groups as regard BMI.....	50
Figure 4:	Comparison between both groups I and II as regard duration of DM...	51
Figure 5:	Oral hypoglycemic agents (OHA) and insulin therapy in both groups I and II.....	52
Figure 6:	Comparison between all studied groups as regard FPG.....	53
Figure 7:	Comparison between all studied groups as regard PPG.....	54
Figure 8:	Comparison between all studied groups as regard glycated hemoglobin (HbA1c).....	55
Figure 9:	Comparison between both groups I and II as regard DAN.....	56
Figure 10:	Comparison between all studied groups as regard upper gastrointestinal symptoms.....	57
Figure 11:	Comparison between all studied groups as regard endoscopic findings of esophagitis.....	58
Figure 12:	Comparison between all studied groups as regard histopathological findings of esophagitis.....	59
Figure 13:	Relation of diabetic autonomic neuropathy (DAN) with upper gastrointestinal (GI) symptoms in both groups I and II.....	61
Figure 14:	Relation of diabetic autonomic neuropathy (DAN) with endoscopic findings of esophagitis in both groups I and II.....	63
Figure 15:	Relation of diabetic autonomic neuropathy (DAN) with histopathologic findings of esophagitis in both groups I and II.....	65

Figure 16:	The correlation between the duration of diabetes mellitus and (a) upper GI symptoms, (b) endoscopic and (c) histopathologic findings of esophagitis in group I.....	66
Figure 17:	The correlation between the duration of diabetes mellitus and (a) upper GI symptoms, (b) endoscopic and (c) histopathologic findings of esophagitis in group II.....	68
Figure 18A:	Comparison of endoscopic findings of esophagitis between OHA (Oral hypoglycemic agents) and insulin treatment in both groups I and II.....	71
Figure 18B:	Comparison of histopathologic findings of esophagitis between OHA (Oral hypoglycemic agents) and insulin treatment in both groups I and II.....	71
Figure 19:	Comparison between all studied groups as regards esophageal Moniliasis.....	72
Figure 20:	Endoscopic pictures showing grade A Los Angeles classification.....	73

Figure 22:	Endoscopic pictures showing grade C Los Angeles classification.....	75
Figure 23:	Endoscopic pictures showing grade D Los Angeles classification.....	76
Figure 24:	Endoscopic picture showing monilial esophagitis.....	77
Figure 25:	Endoscopic pictures showing long segment Barrett's esophagus.....	77
Figure 26:	Histopathologic pictures showing histopathologic findings of reflux esophagitis.....	78

LIST OF ABBREVIATIONS

DM	Diabetes Mellitus
IDDM	Insulin Dependent Diabetes Mellitus
NIDDM	Non Insulin Dependent Diabetes Mellitus
NDDG	National Diabetes Data Group
WHO	World Health Organization
T1DM	Type1 Diabetes Mellitus
T2DM	Type2 Diabetes Mellitus
HNF	Hepatocyte Nuclear transcription Factor
MODY	Maturity Onset Diabetes of the Young.
IPF	Insulin Promoter Factor
ICAs	Islet Cell Autoantibodies
IAAs	Insulin Auto-Antibodies
GAD	Glutamic Acid Decarboxylase
HLA	Human Leukocyte Antigen
BMI	Body Mass Index
IFG	Impaired Fasting Glucose
IGT	Impaired Glucose Tolerance
GDM	Gestational Diabetes Mellitus
HDL	High Density Lipoprotein
OGTT	Oral Glucose Tolerance Test
HbA1c	Hemoglobin A1c
DCCT	Diabetes Control and Complications Trial
UKPDS	U.K. Prospective Diabetes Study
DKA	Diabetic Ketoacidosis
HHS	Hyperosmolar Hyperglycemic State
AN	Autonomic Neuropathy
DAN	Diabetic Autonomic Neuropathy
