

Interleukin 6 level in gingival crevicular fluid following the use of diode laser in conjunction with closed mechanical debridement in patients with chronic periodontitis, a randomized control clinical trial.

Thesis

Submitted in partial fulfillment of the requirements for Master Degree in Oral Medicine, Periodontology, and Oral diagnosis.

By

Alia Emad Mohammed Gamal El Difry

B.D.S

Supervisors

Prof. Khaled Abdel Ghaffar

Professor of Oral Medicine, Periodontology, Oral Diagnosis, and Radiology. Dean of Faculty of Dentistry, Ain Shams University.

Dr. Ahmed Abdel Aziz

Lecturer of Oral Medicine, Periodontology, Oral Diagnosis and Radiology. Faculty of Dentistry, Ain Shams University.

Prof. Olfat Shaker

**Professor of Medical Biochemistry and Molecular Biology
Faculty of Medicine, Cairo University.**

2016

Acknowledgment

I would like to express my deep gratitude to ***Professor. Khaled Abdel Ghaffar***, Professor of Oral Medicine, Periodontology, Oral Diagnosis and Radiology. Dean of Faculty of Dentistry, Ain Shams University. My main supervisor for his valuable guidance and effort throughout my work from creation to completion.

I am proud to be supervised by ***Dr. Ahmed Abdel Aziz***, Lecturer of Oral Medicine, Periodontology, Oral Diagnosis and Radiology. For his sincere help, cooperation and helpful remarks during this study.

Special thanks to ***Professor. Olfat Shaker***, Professor of Medical Biochemistry and Molecular Biology ,Faculty of Medicine, Cairo University, for doing the biochemical analysis of my work.

Special thanks are devoted to ***Professor. Inas Elattar***, Professor of Biostatistics, Department of Biostatistics & Cancer Epidemiology, National Cancer Institute, Cairo University for all statistical work.

Deep appreciation goes out to ***Professor. Inas Sami***, Professor of dental biomaterials, Faculty of dentistry, Cairo University for her valuable support which started by lending me the laser device used in my experiment and then encouraging and helping me to finish this work.

I would like to convey my deep appreciation to all staff members and colleagues at the Oral Medicine and Periodontology, Oral Diagnosis and Radiology department Ain Shams University for their support and help.

List of Tables:

Table No.	Title	Page No.
Table (1)	Shows classification of a laser according to gain medium, output energy and the waveform.	13
Table (2)	Treatment scheme.	43
Table (3)	Shows the contents of the AviBion Human IL-6 ELISA Kit.	45
Table (4)	Shows gender distribution.	55
Table (5)	Shows age distribution.	56
Table (6)	Shows a comparison between the distribution of the Gingival Index (GI) of the control group (SRP+ Placebo) and study group (SRP+ Laser) over the study period.	57
Table (7)	Shows a comparison between the gingival index (GI) of the control group (SRP+ Placebo) and the study group (SRP+ Laser) over the study period.	58

Table (8)	Shows a comparison between the distribution of the Plaque Index (PI) of the control group (SRP+ Placebo) and the study group (SRP+ Laser biostimulation) over the study period.	60
Table (9)	Shows a comparison between the Plaque Index (PI) of the control group (SRP+ Placebo) and study group (SRP+ Laser) over the study period.	61
Table (10)	Shows a comparison between the distribution of the Papillary Bleeding Index (BI) of the control group (SRP+ Placebo) and study group (SRP+ Laser) over the study period.	63
Table (11)	Shows a comparison between the Papillary Bleeding Index (BI) of the control group (SRP+ Placebo) and study group (SRP+ Laser) over the study period.	64
Table (12)	Shows a comparison between the distribution of the Probing depth (PD) of the control group (SRP+ Placebo) and study group (SRP+ Laser) over the study period.	66
Table (13)	Shows a comparison between Probing Depth (PD) of the control group (SRP+ Placebo) and study group (SRP+ Laser) over the study period.	67

Table (14)	Shows a comparison between the distribution the of the Clinical Attachment Level (CAL) between the control group (SRP+ Placebo) and study group (SRP+ laser) over the study period.	69
Table (15)	Shows a comparison between Clinical Attachment Level (CAL) of the control group (SRP+ Placebo) and study group (SRP+ Laser) over the study period.	70
Table (16)	Shows a comparison between the level of Interleukin-6 (IL-6) in the gingival crevicular fluid (GCF) of the control group (SRP+ Placebo) and study group (SRP+ Laser) over the study period.	72
Table (17)	Shows spearman's correlation coefficient between IL-6 and CAL, BI, GI and PPD.	74

List of Figures:

Figure No.	Title	Page No.
Fig 1	Schematic drawing showing the most important components of a laser system.	11
Fig 2	Simplified schematic outline of a typical diode laser.	18
Fig 3	Schematic drawing (ribbon representation), shows the structure of IL-6 and its four long α -helices.	29
Fig 4	Composition of the Interleukin-6 receptor.	30
Fig 5	Showing IL-6 classical, trans-signaling, and sgp130 inhibition.	31
Fig 6	Whatmann filter paper (Whatmann International Ltd Maidstone, England).	40
Fig 7	Paper strips (2mm X 10mm) were carefully placed into a coded Eppendorf tubes.	40
Fig 8	Laser treatment was performed by using diode laser and a special tip for biostimulation.	42
