**THE EFFECT OF SILICON CARBIDE CERAMIC
ON THE ELECTRICAL AND MECHANICAL
PROPERTIES OF CONDUCTIVE BUTYL
RUBBER COMPOSITES**

THESIS

**Submitted to the Physics Department ,
Faculty Of Science – Suez Canal University**

**IN PARTIAL FULFILMENT OF THE REQUIRMENTS FOR THE
DEGREE OF MASTER OF SCIENCE**

BY

**SOHEIR HUSSEIN ALI MOHAMED RASHED
(B.Sc.Physics)**

2000

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

" قالوا سبحنك لا علم لنا إلا ما علمتنا انك انت العليم الحكيم "

صدق الله العظيم

قال رسول الله ﷺ :

" من خرج للعلم فهو في سبيل الله حتى يرجع "

صدق رسول الله ﷺ

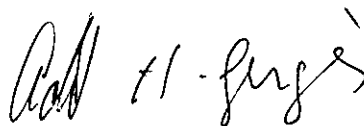

TO

*MY PARENTS, CHILDREN
AND MY HASBUND*

**"THE EFFECT OF SILICON CARBIDE CERAMIC
ON THE ELECTRICAL AND MECHANICAL
PROPERTIES OF CONDUCTIVE BUTYL RUBBER
COMPOSITES"**

APPROVED BY:

1-Prof. Dr. Adeeb Hanna Gergess

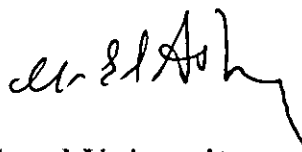

Prof. Of Physics Ain Shams.

2- Prof. Dr. Abd-Elwahab El-Sharkay

Dean of Science Faculty -Al-Azher University

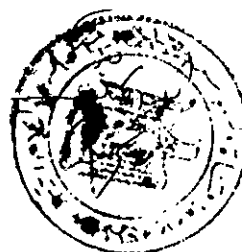

3- Prof. Dr. Magdy Yesien El-Ashry

Dean of Science Faculty - Suez Canal University

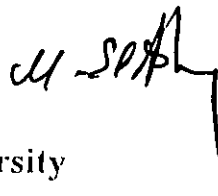

4- Prof . Dr. Fouad Sharaf

Prof . of Physics Faculty of Science- Suez Canal University

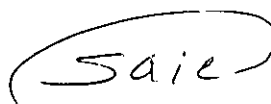

Supervisors

Prof. Dr. M.Y.EL-ASHRY
Professor of Theoretical Physics
Dean of Faculty of Science, Suez Canal University

Prof. Dr. F.S.SHARAF
Professor of experimental Optics
Faculty of Science, Suez Canal University

Dr. S.A.MANSOUR
Physics department
Faculty of Science, Suez Canal University

ACKNOWLEDGEMENT	
AIM OF THE WORK	
ABSTRACT	
CHAPTER 1	
INTRODUCTION AND LITRATURE SURVY	
1.1 Introduction	(1)
1.2 Preliminary Notes on polymeric Materials	(2)
1.2.1 Physical States of Polymers	(2)
1.3 Primarily Note on The Rubber Processing And Manufacturing	(4)
1.4 Butyl Rubber (IIR)	(4)
1.4.1 Processing of IIR	(5)
1.4.2 Properties	(5)
1.4.3 Uses of IIR	(6)
1.5 Rubber Additives	(6)
1.5.1 Fillers (or Pigments)	(6)
1.5.1.1 Black Fillers	(7)
1.5.1.2 Non-Black Fillers	(9)
1.5.2 Other Additive	(10)
1.6 Electrical Properties	(12)
1.6.1 Electrical Conduction Mechanism in Polymers	(12)
1.6.2 Electrical Properties of Conductive Polymeric Composites	(14)
1.6.3 Effect of Carbon Black;Type and Concentration	(14)

1.6.4	Effect of Processing and Other Factors on The Electrical Properties of Rubber	(15)
1.6.5	Effect of Electrode Types on The Electrical Conductivity of Conductive Polymers	(16)
1.6.6	Previous Works	(17)
1.7	Mechanical Properties	(20)
1.7.1	Stress and Strain	(21)
1.7.2	Theory of Filler Reinforcement	(22)
1.7.3	Effect of Various Factors on The Mechanical Properties of Polymers	(24)
1.7.3.1	Effect of Size and Shape of Supramolecular Structure	(24)
1.7.3.2	Effect of Filler	(25)
1.7.3.3	Effect of Crosslink Density	(25)
1.7.4	Stress Relaxation	(26)
1.7.5	Creep	(26)
1.7.6	Previous work	(29)

CHAPTER 2

EXPERIMENTAL WORK

2.1	Material Used in These Work	(33)
2.1.1	Butyl Rubber	(33)
2.1.2	Carbon Black	(33)
2.1.3	Silicon Carbide SiC	(33)
2.2	Preparation of Rubber Composites	(35)

2.3	Vulcanization Process	(38)
2.4	Swelling Test	(39)
2.5	Electrical Properties Measurements	(39)
2.5.1	Measuring The Electric Conductivity During the Vulcanization	(39)
2.5.2	Electric Conductivity Dependence on Temperature	(40)
2.5.3	Current - Voltage Relation	(41)
2.6	Mechanical Measurements	(42)
2.6.1	Stress - Strain Test	(42)
2.6.2	Stress Relaxation	(44)
2.6.3	Creep	(44)

CHAPTER 3

RESULTS & DISCUSSION

3.1	Electrical Conduction in Polymers	(46)
3.1.1	Variation of Electrical Conductivity During The Vulcanization Process	(46)
3.1.2	The current – voltage Relation	(48)
3.1.3	Temperature Dependence of The Electrical Conductivity	(49)
3.2	Swilling Test	(50)
3.2.1	The Effect Swilling on The SiC Loaded IIR	(50)
3.2.2	The Effect of The SiC Concentration on Q_{max}	(50)

3.2.3	The Effect of Time of Swilling on The Separation Distance Between SiC Aggregates, D(T)	(51)
3.3	Stress Strain	(53)
3.3.1	Stress Strain Relationship	(53)
3.3.2	Effect of SiC Concentration on σ_f , ϵ_f and E	(54)
3.4	Relaxation Stress	(55)
3.5	Isothermal Creep	(57)
3.5.1	Stress Dependence of Creep	(57)
3.5.2	Temperature Dependence of Creep	(58)
3.5.3	The Dependence of SiC Concentration on The Activation Volume (q)	(59)
3.5.4	The Effect of The SiC Concentration on The Stress Sensitivity Parameter,(m.)	(59)
3.5.5	The Effect of The Coefficient of Viscosity on The SiC Concentration	(59)

CONCLUSION

ARABIC SUMMARY

ACKNOWLEDGMENTS

Science, Suez Canal University . The present work has been done in the Physics Department , Faculty Of

I expressed my great thanks to **prof. Dr .WAHIB ATTIA** head of physics department for helpful facilities and encouragement .

I am most grateful to **Dr. M. Y.EL-ASHRY**, professor of theoretical physics, Physics Department, Dean of Faculty of science, Suez Canal University,for his supervision, valuable help and advice which have rendered many difficulties easily surmountable.

I expressed my cardial gratitude to **Dr. F. S.SHARAF**, professor of optical physics, Physics Department, Faculty of science, Suez Canal University,for his invaluable supervision, and helpful guidance throughout the work.

Sincere thanks to **Dr. S. A.MANSOUR**, Physics Department, Faculty of science, Suez Canal University,for his supervision, and encouragement.

It is also a great pleasure to thank all physists concerned with this work in, Suez Canal University and Zagazig University who gave kind help during this work.
