

Synthesis and reaction of phthalazinone derivatives and their uses in separation of some nuclear elements

Thesis submitted

By

Sherif Mohamed khairy

M.Sc. (Chemistry) 2010

Supervisions

Prof. Dr. Maher Abdel Aziz EL-Hashash

Professor of Organic Chemistry, Chemistry Department, Faculty of Sciences, Ain Shams University.

Prof. Dr. Fakhry Abdelaziz El-bassiony

Professor of Organic Chemistry, Chemistry Department, Faculty of Sciences, Ain Shams University.

Asst.Prof. Dr. Sameh Ahmed Rizk

Associated Professor of Organic Chemistry, Chemistry Department, Faculty of Sciences, Ain Shams University.

Asst.Prof. Dr. Dalal Besanty Guirguis

Associated Professor of Organic Chemistry, Chemistry Department, Faculty of Sciences, Ain Shams University.

Prof. Dr. Laila.Atea Guirguis

Professor of Nuclear Chemistry. Department of Reactor Materials, Nuclear Material Authority Egypt.

Approval sheet

Name of candidate: Sherif Mohamed khairy

Degree: Ph.D.in chemistry

Thesis Title: *Synthesis and reaction of phthalazinone derivatives and their uses in separation of some nuclear elements*

This Thesis has been approved by:

1- Prof. Dr. Maher Abdel Aziz EL-Hashash

Professor of Organic Chemistry, Chemistry Department, Faculty of Sciences, Ain Shams University.

2-Prof. Dr. Fakhry Abdelaziz El-bassiony

Professor of Organic Chemistry, Chemistry Department, Faculty of Sciences, Ain Shams University.

3-Asst.Prof.Dr. Sameh Ahmed Rizk

Associated Professor of Organic Chemistry, Chemistry Department, Faculty of Sciences, Ain Shams University.

4-Asst.Prof .Dr. Dalal Besanty Guirguis

Associated Professor of Organic Chemistry, Chemistry Department, Faculty of Sciences, Ain Shams University.

5-Prof. Dr. Laila.Atea Guirguis

Professor of Nuclear Chemistry. Department of Reactor Materials , Nuclear Material Authority Egypt.

Approval

Prof .Dr.Ibrahim H.A.Badr
Head of Chemistry Department

Aim of the present work

Summary

Chapter (1): Introduction

Introduction	1
Biological application	1
phthalazine complex	2
Chemistry of phthalazines	5
Primary synthesis of phthalazine derivatives	6
1.1. From a benzene derivative as substrate and one synthon	6
1.1.1. From 1,2-dialkylbenzenes	6
1.1.2 From 1,2-dialdehydobenzenes	8
1.1.3. From 1-aldehydo-2-ketobenzenes	8
1.1.4. From 1-aldehydo-2-carboxybenzenes	9
1.1.5. From 1-aldehydo-2-bromo benzenes(O-bromoarylaldehyde1)	9
1.1.6. From 1-aldehydo-2-alkoxycarbonylbenzenes	11
1.1.7. From 1-aldehydo-2-cyanobenzenes	11
1.1.8. From 1,2-diketobenzenes	12
1.1.9. From 1-keto-2-carboxybenzenes	13
1.1.10. Using 1-keto-2-alkoxycarbonylbenzenes as substrates	19
1.1.11. From 1-keto-2-carbamoylbenzenes or the like	20
1.1.12. From 1,2-dicarboxybenzenes (phthalic acids)	21

1.1.13. From 1,2-dicyanobenzenes (phthalonitriles)	22
1.1.14. From 1-alkoxycarbonyl-2-cyanobenzenes	22
1.1.15. From 1,2-dialkoxycarbonylbenzenes(phthalicesters)	23
1.1.16.From 1,2-bis(chloroformyl)benzenes (phthaloyl chlorides)	24
1.2. From other carbocyclic derivatives as substrates	24
1.2.1. Bicyclo[4.2.0]octanes as substrates	24
1.2.2. Indenes as substrates	25
1.2.3Cyclheptanes as substrates	27
1.3. From Pyridazine derivatives as substrates	27
1.4. From 1,2,4,5-tetrazines as substrates	31
1.5. From heterobicyclic derivatives as substrates	33
1.5.1. 6-Azabicyclo[3.1.0]hexanes as substrates	33
1.5.2.2-Benzopyrans as substrates	33
1.5.3. 3,2,4-Benzothiadiazepine as substrate	34
1.5.4. 2,3-Benzoxazines as substrates	35
1.5.5. Cinnoline as substrates	35
1.5.5. Isobenzofurans as substrates	36
1.5.6.1.Using 1,3-dihydro-1,3-isobenzofurandiones (phthalic anhydrides)	36
1.5.6.2. Using 1,3-dihydro-1-isobenzofuranones (phthalides)	38
1.5.7. Isoindoles as substrates	43
1.5.7.1. Using <i>N</i> -unsubstituted-1,3-isoindolinediones	43
1.5.7.2. Using <i>N</i> -alkyl-1,3-isoindolinediones	43
1.5.7.3. Using <i>N</i> -hydroxy-1,3-isoindolinediones	44
1.5.7.4. Using 3-hydroxy-1-isoindolinones	44

1.5.7.5. Using 3-imino-1-isoindolinones or 1,3-isoindolinediimines	45
1.5.7.6. Using N-amino-1,3-isoindolinediones	45
1.5.8. Isoquinolens as substrates	46
1.5.9. Pyridazino[4,5-d]pyridazines as substrates	52
1.5.10. Thieno[3,4-d]pyridazines as substrates	52
1.5.11. 1,2,3-Triazolo[4,5-d]pyridazines as substrates	54
1.6. From heteropolycyclic derivatives as substrates	55
1.6.1. Benzo[1,2- <i>c</i> :4,5- <i>c'</i>]difurans-benzenetetracarboxylic (1,2,4,5-anhydrides) as substrates	
1.6.2. Imidazo[1,2- <i>b</i>]isoquinolines as substrates	55
1.6.3. Oxazolo[2,3- <i>a</i>]isoindoles as substrates	56
2. Reactions of phthalazines and phthalazinones:	56
2.1. <i>C</i> -Alkylation or arylation	56
2.1.1. <i>C</i> -Alkylation with organometallic synthons	56
2.1.2. Alkanalysis of halogeno- or alkoxyphthalazines	60
2.2. <i>N</i> -Alkylation or arylation	62
2.3. <i>N</i> -Acylation	64
2.4. Oxidation	64
2.5. Reduction	65
2.6. Nitration	67
2.7. Cyclic adduct formation	68
2.8. Rearrangements	69
2.9. The Reissert reaction	69
2.10. Ring fission reactions	71
2.11. Thiation	72

2.12. Polymer formation	73
3. Complex formation	76
3.1phthalazine with iron carbonyl complex	77
3.2 Phthalazine Hydrazone complex with Transition Metals	78
3.3Phthalazine iridium complex	83
3.4Ruthenium phthalazine complexes	85
4. Applications of phthalazine derivatives:	86
4.1. Antimicrobial activity	86
4.2. Antihypertensive activity	90
4.3. Antithrombotic activity	93
4.4. Antidiabetic activity	95
4.5. Anticonvulsant activity	95
4.6. Antimalarial activity	97
4.7. Anti-trypanosomal activity	97
4.8. Anti-inflammatory activity	98
4.9. Anti-depressant activity	101
4.10. Antitumor activities	101
4.11. organic light-emitting diodes(OLED)	102
4.12.carbon membranes	103
5.Uranium recovery from phosphoric acid	104
5.1.Purification of wet process phosphoric acid(WPA) by organic solvents	106
5.2.Extraction uranium from wet process phosphoric acid (WPA) by organic solvents	
5.2.1.First process sodium hydrosulfite ($\text{Na}_2\text{S}_2\text{O}_4$)	106
5.2.2.with octyl pyrophosphoric acid (OPPA)	107

5.2.3.The synergistic diethyl hexyl phosphoric acid – tri-octyl phosphine oxide (DEHPA-TOPO)	107
--	-----

5.2.4.Octyl phenyl phosphoric acid system (OPAP) which extracts tetravalent uranium

5.2.4.Pyrophosphoric Acid Esters Solvent Extraction for Uranium	108
---	-----

Chapter (2): Results and Discussion

Part one	111
----------	-----

1.Synthesis of 2,2-thiocarbonylbis(4-(3-chloro-4-methylphenyl)phthalazin-1(2H)-one

1.1.Synthesis of 6-(3-chloro-4-methylphenyl) –[1,2,4]triazolo[3,4-a] phthalazine - 3(2H)thione

2.Behaviour of towards 4-(3-Chloro-4-methylphenyl)phthalazin-1(2H)-one carbon electrophiles

2.1. Reaction with ethyl chloroacetate	114
--	-----

2.2. Reaction with halide monosaccharide	115
--	-----

2.2.1. Reaction with 1-bromo- α -D-glucopyranose	115
---	-----

2.2.2. Reaction with 1-bromo- α -D-arabinopyranose	115
---	-----

2.3. Reaction with amino acids	117
--------------------------------	-----

2.3.1. Reaction with amino acid β -chloroalanine	117
--	-----

2.3.2. Reaction with 2-amino-4-chloro-4-oxobutanoic acid	118
--	-----

2.3.3. Reaction with in 2-amino-5-chloro-5-oxobutanoic acid	118
---	-----

2.4. Reaction with benzoyl chloride.	119
--------------------------------------	-----

2.5. Reaction with allylbromide	120
---------------------------------	-----

2.6. Reaction with 2-choroethanol	121
-----------------------------------	-----

2.7. Reaction with phenyl isothiocyanate	123
--	-----

2.8. Reaction with ethyl cyanoacetate	124
---------------------------------------	-----

2.9. Reaction with piperidine under Mannich reaction .	125
--	-----

2.10. Reaction with ethanol amine .	127
2.11. Reaction with epichlorohydrine.	130
3. Reaction with hydrazine hydrate	132
4.Metal complex	135

Part two

Organic compounds could be used as ligand for uranium extraction	138
Extraction of uranyl ion by Use of prepared organic compounds in the liquid-liquid extraction	139
Extraction of uranyl ion	145
Precipitation of uranium from the strip solution	161

Chapter (3):Experimental	166
---------------------------------	-----
