HISTOPATHOLOGICAL AND BIOCHEMICAL STUDIES ON THE EFFECT OF ANTIOXIDANTS ON DIABETES

A THESIS

Submitted to the Faculty of Science, El-Minia University
for The award of Ph.D. Degree in Zoology
(Histopathology and Histochemistry)

BY

IHAB ANWAR IBRAHIM

M. Sc.

Zoology department, Faculty of Science, El-Minia University

SUPERVISORS

PROF. DR.

Nagy S. Tawfik

Professor of physiological chemistry of
endocrine glands
and Head of Zoology department

DR.

Laila A. Abd-El Moneim

Assistant Professor of Histology

Zoology Department, Faculty of Science El-Minia
University

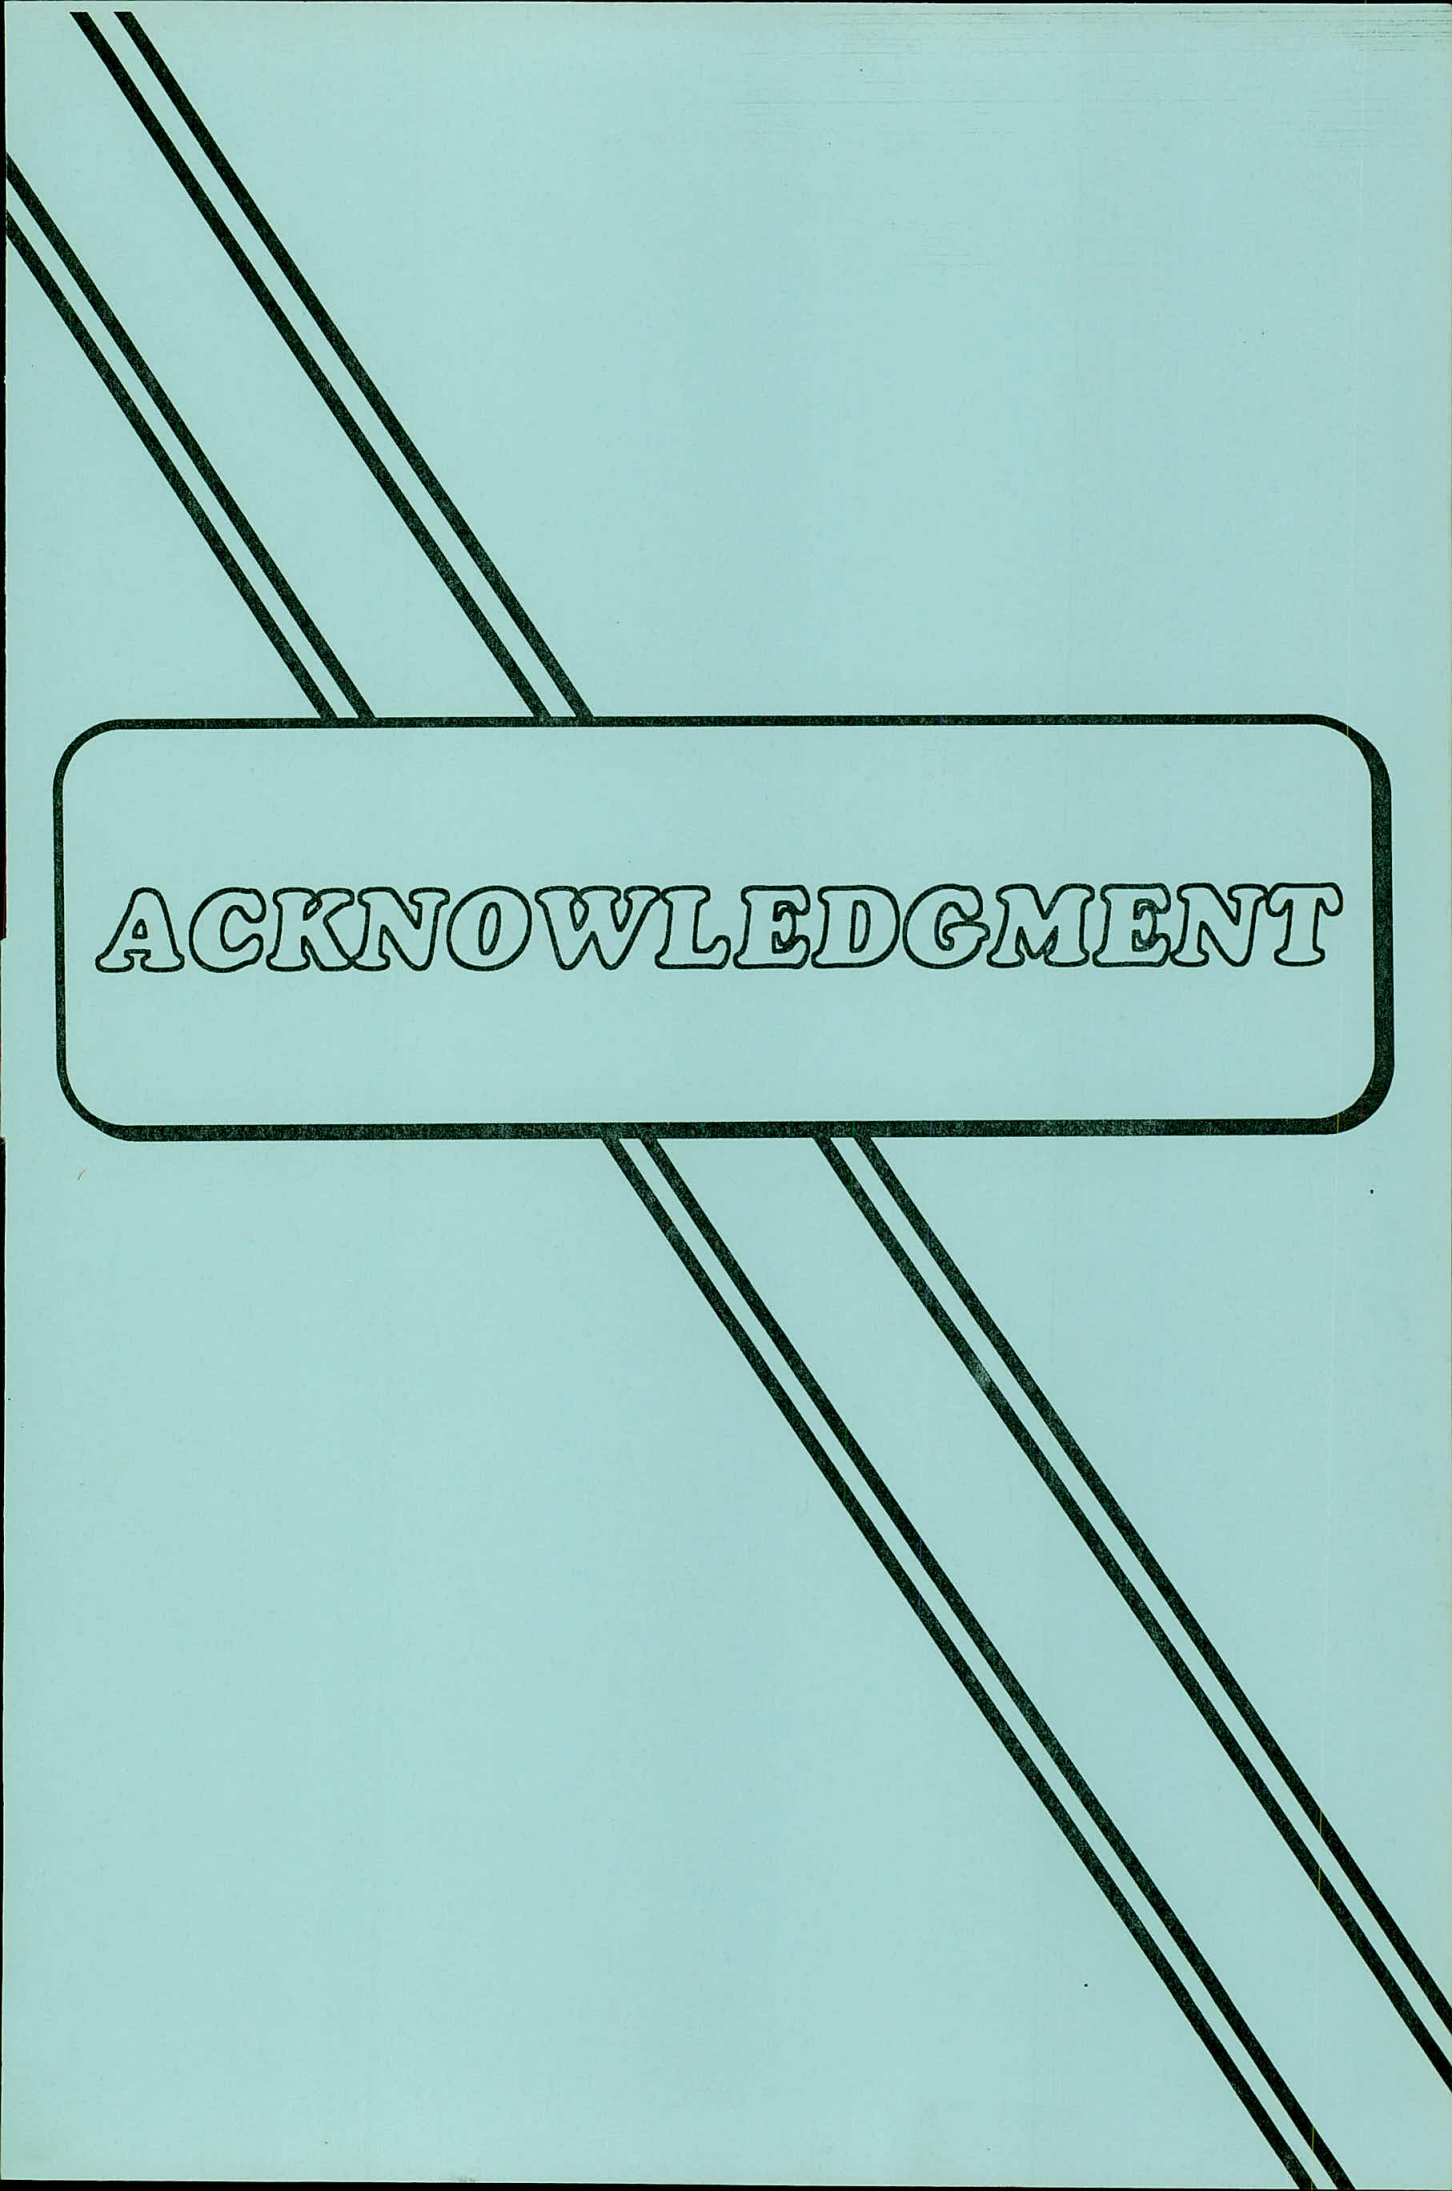

EL-Minia, Egypt

2005

B

1-AVE

ACKNOWLEDGMENT

Acknowledgment

"I do thank God for all gifts he gave me"

I would like to thank my supervisor Prof. Dr. Nagy S. Tawfek, Prof. of physiological chemistry of endocrine glands and head of zoology department, faculty of science, El-Minia University, **for his suggestion of this work**, continuous encouragement, his helpfulness **and discussion** had been most valuable throughout this work until final finishing.

I also thank and acknowledge with grateful appreciation Dr. Laila A. Abd El-Moneim, Assistant professor of histology, zoology department, and faculty of science, El-Minia University, for providing all laboratory facilities and for her continuous help during this work.

I also acknowledge Prof. Dr. E. M. Fadl, dean of the faculty of science, El-Minia University, for the facilities made available to me during this work.

My thanks are also extended to staff members and my colleagues of zoology department at El-Minia University, who tided me over the difficulties I met during this study.

Finally, I thank my parents, wife and all those provide me the support for their encouragement and patience during the time needed to complete this work.

The word "CONTENTS" is written in a bold, stylized, outlined font. It is centered within a light blue rounded rectangular box. The box is set against a light blue background with two sets of parallel diagonal lines, one set in the top-left corner and one set in the bottom-right corner.

List of Abbreviations

ACE	Angiotensin-converting enzyme
AGE	Advanced glycation end product
A group only	Azathioprine group only
ARB	Angiotensin receptor blocking agents
CD4	Cluster of differentiation 4
CML	Carboxymethyl lysine
COX-2	Cyclooxygenase
Cr	Creatinine
CSAD	Cysteine sulfinic acid decarboxylase
DCCT	Diabetes control and complication trial
DN	Diabetic neuropathy
DR	Diabetic retinopathy
ECM	Extracellular matrix
EPR	Electron paramagnetic resonance
ESRD	End-stage renal disease
F-1,6-Bpase	Fructose-1, 6-bisphosphatase
F-6-P	Fructose-6-phosphate
FBPase-2	Fructose bisphosphatase 2
GBM	Glomerular basement membrane
GDM	Gestational diabetes mellitus
GFR	Glomerular filtration rate
HbA1c	Glycosylated hemoglobin
HD	Hemodialysis
HDL	High density lipoprotein
HLA	Human lymphocytic antigen
HPL	Human placental lactogen
ICA	Islet cell antibodies
IDDM	Insulin dependent diabetes mellitus
IFN	Interferon
IGT	Impaired glucose tolerance
IL	Proinflammatory cytokines interleukin
MDA	Malondialdehyde
MGN	Membranous glomerulonephritis
MHC	Major histocompatibility complex
NASH	Nonalcoholic steatohepatitis
NCV	Nerve conduction velocity
NDDG	National diabetes data group

NF-[kappa]B	Necrosis factor-[kappa]B
NIDDM	NON Insulin dependent diabetes mellitus
NOD	Non-obese diabetic mouse
P5P	Pyridoxal-5'-phosphate
PBN	Phenyl-N-tert-butyl nitron
PEPCK	Phosphoenol-pyruvate carboxykinase
PFK2	Phosphofructokinase 2
PKC	Protein kinase C
PTH	Parathyroid hormone
Q of L	Quality of life
QAFT	Quantitative autonomic function tests
QST	Quantitative sensory tests
ROS	Reactive oxygen species
SOD	Superoxide dismutase
STZ	Streptozotocin
TBM	Tubular basement membrane
TNF	Tumor necrosis factor
T-S group	Taurine-selenium group
T-S&A	Taurine-selenium and azathioprine group
UAE	UKPDS
UKPDS	United Kingdom Prospective Diabetes Study
USRDS	US Renal Data System
VEGF	Vascular endothelial growth factor
WHO	World health organization

List of tables

Table 1: Effects of supplement of taurine, selenium, and /or azathioprine on diabetic rat's Glucose.

Table 2: Statistical analysis of the effects of supplement of taurine, selenium, and /or azathioprine on diabetic rat's Glucose.

Table 3: Effects of supplement of taurine, selenium, and /or azathioprine on diabetic rat's glycohemoglobin.

Table 4: Statistical analysis of the effects of supplement of taurine, selenium, and /or azathioprine on diabetic rat's glycohemoglobin.

Table 5: Effects of supplement of taurine, selenium, and /or azathioprine on diabetic rat's protein.

Table 6: Statistical analysis of the effects of supplement of taurine, selenium, and /or azathioprine on diabetic rat's protein.

Table 7: Effects of supplement of taurine, selenium, and /or azathioprine on diabetic rat's hemoglobin.

Table 8: Statistical analysis of the effects of supplement of taurine, selenium, and /or azathioprine on diabetic rat's hemoglobin.

Table 9: Effects of supplement of taurine, selenium, and /or azathioprine on diabetic rat's creatinine.

Table 10: Statistical analysis of the effects of supplement of taurine, selenium, and /or azathioprine on diabetic rat's creatinine.
